九、阅读理解

A

While the mobile Internet is changing the way we live, more and more old people in China are getting in on the digital (数字的) world.

Yang Su, a 61-year-old micro vlogger (短视频博主), has more than 2.3 million followers on China's famous short video app Douyin. “Two and a half years ago, my son put a short video of me playing the piano at home on Douyin, and hours later it was played over 1 million times,” Yang remembered.

After finishing his studies in the Shanghai Conservatory of Music, he became a pianist. With the development of the Internet, he walked into a new world. He filmed over 600 short videos and opened an official account (官方账户) on WeChat to share articles and offer online piano lessons.

However, do other old people get used to the digital world like Yang? Ding Qiulin is a 73-year-old

man from Hunan. “I got my smartphone more than one year ago, but I only use WeChat for video calls,” he said. Ding finds it hard to learn to use other apps.

▲ Luo Xu, a post-90s volunteer, joined a non-profit (非营利性的) group in Beijing nine years ago to teach old people how to use the Internet. “While I am helping people aged between 50 and 90 years old, I have a strong feeling of satisfaction.” Luo said.

1. How did Yang become famous at first?

A. By sharing articles on WeChat.

B. By playing the piano in a short video.

C. By giving online piano lessons.

2. How did the writer show not all old people get used to the digital world?

A. By telling a joke.

B. By using numbers.

C. By using an example.

3. Which of the following sentences can be put into ▲?

A. In fact, many other old people have the same feeling as Ding.

B. Luckily, younger people are building a bridge between the digital world and the old.

C. However, many young people find it hard to teach the old to use the Internet.

4. What did Luo Xu think of his work in the non-profit group?

A. Relaxing.

B. Meaningful.

C. Difficult.

AI Brings Textbook Characters to Life: A New Chapter in Learning

Imagine opening your history textbook and seeing Confucius, Leonardo da Vinci, or Marie Curie step out of the pages to talk to you! Thanks to artificial intelligence (AI), this dream is becoming reality in classrooms around the world.

In Wuhan Gangcheng No. 4 Middle School, students ask questions to a 3D-animated Confucius (孔子). One student once asked, “Does ‘ren’ (kindness) still matter in a world full of competition?” The digital Confucius smiled and explained how kindness helps people live together peacefully. This isn’t magic—it’s AI! Using tools like Jimeng (即梦 Ai) and Keling (可灵 Ai), teachers can turn flat textbook pictures into lively characters. These AI tools add details to old paintings, make the characters move, and even let them speak. For example, Aristotle can now explain logic with hand gestures, and Li Qingzhao (李清照) can recite her poems with gentle expressions.

AI isn’t just fun; it’s changing how we study. In Nanjing’s Stone Shadow Art Museum, AI turns ancient Chinese paintings into modern art styles. When visitors use a special flashlight, ink-and-wash mountains become colorful Impressionist scenes. This mix of old and new helps us understand culture

better. In classrooms, AI helps students learn at their own pace. A smart system can give students different learning materials based on their questions. An AI wrong-answer notebook (AI 错题本) finds mistakes and makes practice plans. In a history class about the Maya civilization (玛雅文明), students explore how climate change affected cities through AI - made videos. “History isn’t just dates anymore,” says student Wu Boyu. “It’s like touching the past. ”

However, there are problems. Some people use AI to change history characters in bad ways. We need rules to stop this. Also, while AI helps us learn, teachers remind us not to forget the human side of learning—like sharing ideas face-to-face. Looking ahead, AI will do more. Students might use AI to understand art or create digital exhibitions. As one teacher says, “Technology isn’t the goal. It’s a way to help every student shine. ”

From old books to smart screens, learning is always evolving. With AI, textbook characters aren’t just words anymore — they’re friends who guide us through the amazing journey of knowledge.

1. What tools do teachers use to make textbook pictures lively?

- A. ChatGPT and DeepSeek.
- B. Jimeng and Keling.
- C. Photoshop and Illustrator.
- D. WeChat and TikTok.

2. Why does Wu Boyu say “History isn’t just dates anymore”?

- A. History books have colorful pictures now.
- B. History exams became easier.
- C. AI makes history about famous people.
- D. AI helps students experience history vividly.

3. What does the flashlight example in Nanjing museum show?

- A. AI makes art exhibitions brighter.
- B. Technology connects traditional and modern culture.
- C. Visitors prefer Impressionist paintings.
- D. Flashlights are essential for museum tours.

4. What is the article mainly about?

- A. Famous AI companies in China.
- B. The history of digital textbooks.
- C. Why museums need new technologies.
- D. How AI makes learning interactive and evolving.

九、阅读理解

A

While the mobile Internet is changing the way we live, more and more old people in China are getting in on the digital (数字的) world.

Yang Su, a 61-year-old micro vlogger (短视频博主), has more than 2.3 million followers on China's famous short video app Douyin. “Two and a half years ago, my son put a short video of me playing the piano at home on Douyin, and hours later it was played over 1 million times,” Yang remembered.

After finishing his studies in the Shanghai Conservatory of Music, he became a pianist. With the development of the Internet, he walked into a new world. He filmed over 600 short videos and opened an official account (官方账户) on WeChat to share articles and offer online piano lessons.

However, do other old people get used to the digital world like Yang? Ding Qiulin is a 73-year-old man from Hunan. “I got my smartphone more than one year ago, but I only use WeChat for video calls,” he said. Ding finds it hard to learn to use other apps.

▲ Luo Xu, a post-90s volunteer, joined a non-profit (非营利性的) group in Beijing nine years ago to teach old people how to use the Internet. “While I am helping people aged between 50 and 90 years old, I have a strong feeling of satisfaction.” Luo said.

1. How did Yang become famous at first?

- A. By sharing articles on WeChat.
- B. By playing the piano in a short video.
- C. By giving online piano lessons.

2. How did the writer show not all old people get used to the digital world?

- A. By telling a joke.
- B. By using numbers.
- C. By using an example.

3. Which of the following sentences can be put into ▲?

- A. In fact, many other old people have the same feeling as Ding.
B. Luckily, younger people are building a bridge between the digital world and the old.
C. However, many young people find it hard to teach the old to use the Internet.
4. What did Luo Xu think of his work in the non-profit group?
- A. Relaxing. B. Meaningful. C. Difficult.

【答案】1. B 2. C 3. B 4. B

【解析】本文是一篇记叙文。文章主要讲述了中国老年人如何适应数字化世界，并通过杨苏和丁秋林的例子展示了不同老年人的数字化生活现状，以及年轻人罗旭帮助老年人学习使用互联网的故事。

1. 细节理解题。根据“Two and a half years ago, my son put a short video of me playing the piano at home on Douyin, and hours later it was played over 1 million times”可知，杨苏是通过一个弹钢琴的短视频而走红的。故选 B。

2. 推理判断题。根据“However, do other old people get used to the digital world like Yang? Ding Qiulin is a 73-year-old man from Hunan...Ding finds it hard to learn to use other apps.”可知，作者通过丁秋林的例子说明并非所有老年人都能适应数字化世界。故选 C。

3. 推理判断题。上文举例说明了并非所有老年人都习惯了数字化世界；空后又讲了 90 后志愿者罗旭加入一个非营利组织去教老年人如何使用互联网，因此，空白处应体现年轻人对老年人数字化生活的帮助，可推知，B 项符合。故选 B。

4. 观点态度题。根据“‘While I am helping people aged between 50 and 90 years old, I have a strong feeling of satisfaction.’ Luo said.”可知，罗旭认为他的工作很有意义。故选 B。

AI Brings Textbook Characters to Life: A New Chapter in Learning

Imagine opening your history textbook and seeing Confucius, Leonardo da Vinci, or Marie Curie step out of the pages to talk to you! Thanks to artificial intelligence (AI), this dream is becoming reality in classrooms around the world.

In Wuhan Gangcheng No. 4 Middle School, students ask questions to a 3D-animated Confucius (孔子). One student once asked, “Does ‘ren’ (kindness) still matter in a world full of competition?” The digital Confucius smiled and explained how kindness helps people live together peacefully. This isn’t magic—it’s AI! Using tools like Jimeng (即梦 Ai) and Keling (可灵 Ai), teachers can turn flat textbook pictures into lively characters. These AI tools add details to old paintings, make the characters move, and even let them speak. For example, Aristotle can now explain logic with hand gestures, and Li Qingzhao (李清照) can recite her poems with gentle expressions.

AI isn’t just fun; it’s changing how we study. In Nanjing’s Stone Shadow Art Museum, AI turns

ancient Chinese paintings into modern art styles. When visitors use a special flashlight, ink-and-wash mountains become colorful Impressionist scenes. This mix of old and new helps us understand culture better. In classrooms, AI helps students learn at their own pace. A smart system can give students different learning materials based on their questions. An AI wrong-answer notebook (AI 错题本) finds mistakes and makes practice plans. In a history class about the Maya civilization (玛雅文明), students explore how climate change affected cities through AI - made videos. “History isn’t just dates anymore,” says student Wu Boyu. “It’s like touching the past. ”

However, there are problems. Some people use AI to change history characters in bad ways. We need rules to stop this. Also, while AI helps us learn, teachers remind us not to forget the human side of learning—like sharing ideas face-to-face. Looking ahead, AI will do more. Students might use AI to understand art or create digital exhibitions. As one teacher says, “Technology isn’t the goal. It’s a way to help every student shine. ”

From old books to smart screens, learning is always evolving. With AI, textbook characters aren’t just words anymore — they’re friends who guide us through the amazing journey of knowledge.

1. What tools do teachers use to make textbook pictures lively?

- A. ChatGPT and DeepSeek. B. Jimeng and Keling.
C. Photoshop and Illustrator. D. WeChat and TikTok.

2. Why does Wu Boyu say “History isn’t just dates anymore”?

- A. History books have colorful pictures now.
B. History exams became easier.
C. AI makes history about famous people.
D. AI helps students experience history vividly.

3. What does the flashlight example in Nanjing museum show?

- A. AI makes art exhibitions brighter. B. Technology connects traditional and modern culture.
C. Visitors prefer Impressionist paintings. D. Flashlights are essential for museum tours.

4. What is the article mainly about?

- A. Famous AI companies in China. B. The history of digital textbooks.
C. Why museums need new technologies. D. How AI makes learning interactive and evolving.

【答案】 1. B 2. D 3. B 4. D

【解析】 本文是一篇说明文，主要介绍了人工智能如何通过将教科书中的历史人物和艺术作品变得生动，从而改变学习方式，使学习更具互动性和趣味性。文章还提到了人工智能在教育中的其他应用以及潜在的问题。

1. 细节理解题。根据“Using tools like Jimeng (即梦 AI) and Keling (可灵 AI), teachers can turn flat textbook pictures into lively characters.”可知，教师使用的工具是即梦 AI 和可灵 AI。故选 B。
2. 推理判断题。根据“In a history class about the Maya civilization (玛雅文明), students explore how climate change affected cities through AI-made videos.”可推知，吴博宇说“历史不再只是日期了”是因为在学习玛雅文明的历史课上，学生们通过人工智能制作的视频探索气候变化如何影响城市，人工智能让学生们能够生动地体验历史，而不只是学习枯燥的日期。故选 D。
3. 推理判断题。根据“In Nanjing’s Stone Shadow Art Museum, AI turns ancient Chinese paintings into modern art styles. When visitors use a special flashlight, ink-and-wash mountains become colorful impressionist scenes.”可知，在南京的石影艺术馆，人工智能将中国古代绘画转变为现代艺术风格，当游客使用特殊手电筒时，水墨画的山变成了色彩斑斓的印象派场景，这种新旧的融合帮助我们更好地理解文化，说明科技连接了传统和现代文化。故选 B。
4. 主旨大意题。本文主要介绍了人工智能如何通过将教科书中的历史人物和艺术作品变得生动，从而改变学习方式，使学习更具互动性和趣味性。文章还提到了人工智能在教育中的其他应用以及潜在的问题。因此，文章主要是关于人工智能是如何使学习更具互动性和发展性的。故选 D。
