

基础过关练

一、单词默写。

- | | |
|-----------------------|--------------------|
| 1. _____ n. (印刷用的) 活字 | 2. _____ n. 混合物 |
| 3. _____ n. 金属 | 4. _____ v. 加热; 变热 |
| 5. _____ v. 注意到 | 6. _____ v. (被) 压 |

二、词组默写。

- | | |
|--------------------|-----------------|
| 1. 梦想成真 _____ | 2. 入睡 _____ |
| 3. 用黏土工作 _____ | 4. 铺开 _____ |
| 5. 用...固定... _____ | 6. 加热... _____ |
| 7. 压下 _____ | 8. 确保表面平整 _____ |
| 9. 醒来 _____ | 10. 最初的设计 _____ |

三、根据要求完成句子

1. 他如此忙碌以至于没有注意到她。

He was _____ he _____ her.

2. 在我可以印书之前, 我需要制作上千个活字。

I need to make _____ types before I can _____.

3. 400 年后, 德国工匠改进了你的发明并把金属活字印刷引入欧洲。

The German craftsman _____ and _____ metal movable type to Europe about 400 years later.

4. 那时, 简醒了过来。

At that moment Jane _____.

5. 相应地, 他的发明在被我们熟知的工业革命中起了巨大的作用。。

His invention in turn _____ what is now known as the Industrial Revolution.

6. 沃特对纽科门设计的改进提高了蒸汽机的动力。

Watt's improvement to Newcomen's design increased _____.

能力提升练

四、用适当词填空。

- He avoids _____ (fight) with parents on this issue.
- The invention of movable type has a number of _____ (benefit).
- He usually _____ (mixture) coffee with milk.
- He noticed the thief _____ (enter) Peter's house.
- There are different _____ (type) of collections in the museum.

6. He _____ (press) the button and turned on the machine.
7. He has trouble getting on well with his classmates because he always makes fun _____ others.
8. They are too young to depend _____ themselves.
9. He lives close to school, so he goes to school _____ foot every day.
10. _____ he left home early, he still encountered a traffic jam.

五、阅读下面短文，在空白处填入括号内单词的正确形式。

Before paper was invented, people wrote on materials such as bamboo, silk, animal hide and 1. _____ (wood) blocks. Writing materials were 2. _____ (real) expensive and few people learned to read. Therefore, few people wrote. This all changed, thanks 3. _____ a man named Cai Lun.

Paper had already existed (存在) in China, but the process for 4. _____ (produce) it was difficult and the paper was of low quality. Cai Lun began experimenting with many different materials and different 5. _____ (method) to turn those materials into paper. In the year 105, he made it from tree bark, bamboo, cloth rags, and fishing nets. His paper was 6. _____ (strong) and cheaper than any paper that had been made before.

With Cai Lun's papermaking method, Chinese culture grew more 7. _____ (rapid) over the next several centuries. That's because ideas were much easier to share 8. _____ more people learned to read. The use of paper spread abroad, 9. _____ (help) other cultures record and spread their ideas.

Today, Cai Lun is considered a national hero in China. But 10. _____ whole world should remember the clever Chinese papermaker forever.

拓展培优练

六、阅读还原。

Do you ever wonder what your workplace might be like in 20 years? Imagine walking into your office where the temperature is just perfect. You sit down and start your day happily. _____ 1 _____. It uses technology to give a more comfortable environment to workers.

_____ 2 _____ For example, it might make the back hurt. A company (公司) in Zhejiang called Xinoon has created UP1 to help with this problem. UP1 is a smart desk that can move up and down.

_____ 3 _____ When it's time for a break, it will send a message to your phone, giving you information to stop working.

What's more, this company has also invented a chair that goes with the desk. The chair is so smart as well, can change its arms and height according to your body shape. In these smart offices, you might not need paper notebooks anymore. _____ 4 _____ WIO, made by a company in Beijing called Hanvon Technology, is such a new kind "notebook." It has a screen that doesn't shine too brightly. Users write on it with an electronic pen. _____ 5 _____.

Do you expect to work in such a comfortable and environmentally friendly office in the future?

- A. It also knows how long a user sits on the chair.
- B. You can try e-books to keep all your work online.
- C. It truly feels like reading and writing on real paper.
- D. This is the smart office that engineers are trying to build.
- E. UP1 helps you sit in the right way, so you feel good when working.
- F. Sitting in front of a desk for too long can be harmful (有害的) for your health.

七、阅读理解。

New Energy Vehicles (NEVs), such as electric cars, are becoming more popular around the world. They use clean energy like electricity instead of gasoline (汽油), which helps reduce air pollution and slow down climate change. However, like any new technology, NEVs come with both hopes and problems.

NEVs are better for the planet. Unlike traditional cars that burn gasoline, they do not make harmful gases like carbon dioxide. For example, electric cars run on batteries (电池) and produce no smoke. This makes the air cleaner, especially in busy cities where traffic is heavy. Some NEVs even use sunlight energy, which is a type of power that never runs out. However, making NEVs is not completely clean. Digging up lithium (a material used in batteries) can harm the environment. Old batteries are also difficult to recycle and might be bad for the ground if not dealt with carefully. Scientists are trying to find better ways to reuse these batteries, but this is still a problem.

NEVs can help people save money in the long term. Electricity costs less than gasoline, so drivers spend less on fuel (燃料). Governments in many countries offer lower prices or free parking to encourage people to buy NEVs. On the other hand, NEVs are expensive to buy at first. A new electric car often costs 20%~50% more than a gasoline car. Even though fuel savings help in the long run, many families cannot buy a new electric car because of the high initial price. Also, fixing or replacing batteries can be very costly.

NEVs are filled with smart technology, which makes them smarter than traditional cars. Many NEVs come with modern technology like self-driving systems, parking assistants and touchscreens. They can even connect to your phone, which makes driving more convenient and fun. For example, some electric cars can stop by themselves if something or someone is in front of them. These smart tools make driving safer for drivers, passengers, and people on the street. And companies are working to make batteries last longer—some cars can now drive over 500 kilometers on a single charge (充电). Yet, NEVs still face challenges. Charging an electric car takes much longer than filling a gas tank—sometimes hours! Cold

weather can also reduce battery life by up to 40%. Many drivers worry about running out of power during long trips if they cannot find a charging station quickly.

Although there are many challenges, progress is clear. With better technology, smarter rules, and public support, clean cars could soon replace gasoline vehicles. As one driver in California said, “My electric car saves money and protects the Earth—it's worth every penny. ”

()1. Which of the following is TRUE according to the passage?

- A. We've found effective ways to deal with NEVs' batteries.
- B. NEVs produce harmful smoke because of the batteries.
- C. NEVs can make use of different types of energies.
- D. People like NEVs more than gasoline cars.

()2. What does “initial price” in Paragraph 3 probably mean?

- A. Parking price. B. Electricity bill. C. Fuel savings. D. Starting cost.

()3. What can smart tools in NEVs do?

- A. They can avoid some dangers on the street.
- B. They can charge the cars every 500 kilometers.
- C. They help visitors have some fun during long trips.
- D. They help cars drive for a longer time in cold weather.

()4. What's the best title for the passage?

- A. NEVs: The Winner of the Fuel War.
- B. NEVs: Saving Money and the Planet.
- C. NEVs: A Brighter Future with Challenges.
- D. NEVs: Smart Technology in Modern Cars.

八、完形填空。

Some old Chinese inventions have won wide 1. _____ around the world. Recently, a British woman used an ancient Chinese invention to help her son 2. _____ a math problem.

Dr. Mantri grew up in India. She was taught 3. _____ to use an abacus (算盘) to solve math problems when she was young. After noticing that her son Dhruv had great difficulty with math, she 4. _____ using the same ancient Chinese tool to help him after school.

“My son was in Grade 5 when I noticed he was 5. _____ in math,” said Dr. Mantri, “I would ask him 6. _____ very easy like ‘ $35-13=?$ ’, but he couldn't work it out. ”

“I never thought I would teach him to use such an old tool 7. _____ I realized I could try the Chinese abacus. It is a useful 8. _____ to help kids better understand numbers and basic calculations

(计算). Very soon I saw the results. After six days, Dhruv started to make progress 9. _____ with the help of the abacus. He even performed with the abacus at a school meeting. ”

Known as the fifth invention of ancient China, Chinese abacus is also considered as the earliest computer. It helped people solve many math problems in ancient China. As long as you remember the 10. _____, you can easily use it.

So far, the Chinese abacus has been listed as an intangible cultural heritage of human beings (人类非物质文化遗产) for 10 years ever since 2013.

- | | | | |
|-----------------|--------------|---------------|-----------------|
| 1. A. advantage | B. wonder | C. show | D. popularity |
| 2. A. deal with | B. play with | C. agree with | D. compete with |
| 3. A. what | B. how | C. where | D. when |
| 4. A. liked | B. started | C. refused | D. expected |
| 5. A. creative | B. talented | C. weak | D. successful |
| 6. A. something | B. anything | C. everything | D. nothing |
| 7. A. after | B. when | C. until | D. since |
| 8. A. sign | B. method | C. report | D. symbol |
| 9. A. politely | B. loudly | C. bravely | D. rapidly |
| 10. A. opinions | B. rules | C. mistakes | D. decisions |

思维进阶练

Project: Designing my invention

Imagine that you are an inventor. Think about what you are going to invent to make our lives better.

Part 1: Think and Discuss

In groups, brainstorm problems you want to solve. Use the questions and the example below to help you.

- What is the problem?
- Who needs help with this problem?
- What are the possible ways of solving this problem?

Example: problems

- A lot of people cycle to school and work. Bicycle helmets are not very convenient to carry around.
- It is difficult for old people to climb stairs.

The problems you have found out in your daily life.

Step 2 Discuss what kind of inventions can solve the problems.

Part 2: Read and Write

Design your invention in groups. Use the example below to help you.

Folding helmet

by James, Sara and Alex

INTRODUCTION

We are going to make a new kind of bicycle helmet. It will be a folding helmet.

PURPOSE

Alot of people don 't wear helmets because it is difficult to carry them around. Our folding helmet will fit into a bag easily! With our invention, more people will wear helmets. It will keep more people safe.

DESIGN

The helmet is going to be made of hard plastic. It will shine in the dark. It will fit everybody.

Your group 's design

Step 4 Present your invention to the class. Then vote for the best invention.

Evaluation	
Creativity (20)	How special is the invention?
Practicality (30)	Does the invention solve a real - world problem?
Design and Explanation (30)	Is the design useful in daily life and clearly presented?
Presentation Skills (20)	Is the presentation clear, attractive and well-organized?

基础过关练

一、单词默写。

- | | |
|-----------------------|--------------------|
| 1. _____ n. (印刷用的) 活字 | 2. _____ n. 混合物 |
| 3. _____ n. 金属 | 4. _____ v. 加热; 变热 |
| 5. _____ v. 注意到 | 6. _____ v. (被) 压 |

【答案】type; mixture; metal; heat; notice; press

二、词组默写。

- | | |
|--------------------|-----------------|
| 1. 梦想成真 _____ | 2. 入睡 _____ |
| 3. 用黏土工作 _____ | 4. 铺开 _____ |
| 5. 用...固定... _____ | 6. 加热... _____ |
| 7. 压下 _____ | 8. 确保表面平整 _____ |
| 9. 醒来 _____ | 10. 最初的设计 _____ |

【答案】1. dream come true; 2. fall asleep; 3. work with clay; 4. spread out; 5. fix ... with...; 6. heat up; 7. press down; 8. make sure the surface is even; 9. wake up; 10. original design

三、根据要求完成句子

1. 他如此忙碌以至于没有注意到她。

He was _____ he _____ her.

2. 在我可以印书之前, 我需要制作上千个活字。

I need to make _____ types before I can _____.

3. 400 年后, 德国工匠改进了你的发明并把金属活字印刷引入欧洲。

The German craftsman _____ and _____ metal movable type to Europe about 400 years later.

4. 那时, 简醒了过来。

At that moment Jane _____.

5. 相应地, 他的发明在被我们熟知的工业革命中起了巨大的作用。。

His invention in turn _____ what is now known as the Industrial Revolution.

6. 沃特对纽科门设计的改进提高了蒸汽机的动力。

Watt's improvement to Newcomen's design increased _____.

【答案】1. so busy that, didn't notice; 2. thousands of, print the book; 3. improved your invention, introduced; 4. woke up; 5. played a huge role in; 6. the power of steam engine

能力提升练

四、用适当词填空。

1. He avoids _____ (fight) with parents on this issue.
2. The invention of movable type has a number of _____ (benefit).
3. He usually _____ (mixture) coffee with milk.
4. He noticed the thief _____ (enter) Peter 's house.
5. There are different _____ (type) of collections in the musuem.
6. He _____ (press) the button and turned on the machine.
7. He has trouble getting on well with his classmates because he always makes fun _____ others.
8. They are too young to depend _____ themselves.
9. He lives close to school, so he goes to school _____ foot every day.
10. _____ he left home early, he still encountered a traffic jam.

【答案】1. fighting; 2. benefits; 3. mixes; 4. enter; 5. types; 6. pressed; 7. of; 8. on; 9. on; 10.

Although/Though

五、阅读短文并回答下列问题。

Before paper was invented, people wrote on materials such as bamboo, silk, animal hide and 1. _____ (wood) blocks. Writing materials were 2. _____ (real) expensive and few people learned to read. Therefore, few people wrote. This all changed, thanks 3. _____ a man named Cai Lun.

Paper had already existed (存在) in China, but the process for 4. _____ (produce) it was difficult and the paper was of low quality. Cai Lun began experimenting with many different materials and different 5. _____ (method) to turn those materials into paper. In the year 105, he made it from tree bark, bamboo, cloth rags, and fishing nets. His paper was 6. _____ (strong) and cheaper than any paper that had been made before.

With Cai Lun 's papermaking method, Chinese culture grew more 7. _____ (rapid) over the next several centuries. That 's because ideas were much easier to share 8. _____ more people learned to read. The use of paper spread abroad, 9. _____ (help) other cultures record and spread their ideas.

Today, Cai Lun is considered a national hero in China. But 10. _____ whole world should remember the clever Chinese papermaker forever.

【答案】1. wooden; 2. really; 3. to; 4. producing; 5. methods; 6. stronger; 7. rapidly; 8. and; 9. helping; 10. the

【解析】本文讲述了在纸被发明之前，因为价格昂贵，很少有人写作。蔡伦用树皮、竹子、破布和渔网制成了纸，他的纸比以前做的任何纸都更结实更便宜。纸的使用传播到国外，帮助人们记录和传播他们的思想。今天，蔡伦被认为是中国的民族英雄，但全世界应该永远记住这位聪明的中国造纸者。

1. 句意：在纸发明之前，人们在竹子、丝绸、兽皮和木块等材料上写字或画画。此处作定语修饰 blocks，用形容词形式，故填 wooden.
2. 句意：写作材料非常昂贵，很少有人学会阅读。此处从句中修饰的形容词 expensive，用副词形式，故填 really.
3. 句意：多亏了一个叫蔡伦的人，这一切都改变了。根据“This all changed”可知变化多亏了蔡伦，thanks to...”多亏了...”，是固定搭配。故填 to.
4. 句意：中国已经有了纸，但生产过程困难，纸张质量低。介词 for 后接其动名词形式 producing 作宾语。故填 producing.
5. 句意：蔡伦开始试验许多不同的材料和方法，把这些材料变成纸。此前有 many 修饰，使用名词复数形式，故填 methods.
6. 句意：他的纸比以前制造的任何一种纸都更结实、更便宜。根据"than"可知 strong 与 and 后的 cheaper 形式一致，用比较级 stronger 表示“更结实的”。故填 stronger.
7. 句意：有了蔡伦的造纸术，中国文化在接下来的几个世纪里发展得更快。此空修饰动词 grew，要用副词，故填 rapidly.
8. 句意：这是因为思想更容易分享，更多的人学会了阅读。前后两句构成并列关系，用 and 连接，故填 and.
9. 句意：纸的使用传播到国外，帮助其他文化记录和传播他们的思想。此空作伴随状语，应填现在分词，故填 helping.
10. 句意：但全世界都应该永远记住这位聪明的中国造纸商。“world”是独一无二的，用定冠词 the;the whole world“全世界”，是固定搭配。故填 the.

拓展培优练

六、阅读还原。

Do you ever wonder what your workplace might be like in 20 years? Imagine walking into your office where the temperature is just perfect. You sit down and start your day happily. _____ 1 _____. It uses technology to give a more comfortable environment to workers.

_____ 2 _____ For example, it might make the back hurt. A company (公司) in Zhejiang called Xinoon has created UP1 to help with this problem. UP1 is a smart desk that can move up and down.

_____ 3 _____ When it 's time for a break, it will send a message to your phone, giving you information to stop working.

What 's more, this company has also invented a chair that goes with the desk. The chair is so smart as well, can change its arms and height according to your body shape. In these smart offices, you might not need paper notebooks anymore. _____ 4 _____ WIO, made by a company in Beijing called Hanvon

Technology, is such a new kind “notebook.” It has a screen that doesn't shine too brightly. Users write on it with an electronic pen. 5 .

Do you expect to work in such a comfortable and environmentally friendly office in the future?

- A. It also knows how long a user sits on the chair.
- B. You can try e-books to keep all your work online.
- C. It truly feels like reading and writing on real paper.
- D. This is the smart office that engineers are trying to build.
- E. UP1 helps you sit in the right way, so you feel good when working.
- F. Sitting in front of a desk for too long can be harmful (有害的) for your health.

【答案】DFEBC

【解析】本文介绍了未来智能办公室的各种创新技术和设备，旨在提高员工的舒适度和工作效率。

1. 根据上文 "Imagine walking into your office where the temperature is just perfect. You sit down and start your day happily." 和下文 "It uses technology to give a more comfortable environment to workers." 可知，此处是办公室相关，且它是智能化的；选项 D “这就是工程师们正在努力建造的智能办公室。”符合语境。故选 D。
2. 根据下文 "For example, it might make the back hurt" 可知，背痛是长期坐在电脑前工作会导致的一种疾病；选项 F “长时间坐在办公桌前对你的健康有害。”符合语境。故选 F。
3. 根据上文 "UP1 is a smart desk that can move up and down." 可知，UP1 是一个智能办公桌；再跟 "When it's time for a break, it will send a message to your phone, giving you information to stop working. (当休息时间到了，它会给你的手机发信息，提醒你停止工作)" 可知，介绍 UP1 的提醒功能；由此推知此处与 UP1 的功能相关；选项 E “UP1 帮助你以正确的方式坐着，这样你工作时感觉很好”符合语境，介绍了 UP1 的功能，且与后文的休息提醒功能相呼应。故选 E。
4. 根据下文 “WIO, made by a company in Beijing called Hanvon Technology, is such a new kind 'notebook'” 可知，此处与电子笔记本相关；选项 B “你可以尝试用电子书把你所有的工作都保存在网上。”符合语境，引出了后文介绍的电子笔记本 WIO。故选 B。
5. 根据上文 "it has a screen that doesn't shine too brightly. Users write on it with an electronic pen." 可知，它的屏幕不会太亮，并且使用者用电子笔在上面写字，选项 C “感觉就像在真正的纸上阅读和写作。”符合语境，总结了电子笔记本 WIO 的优点。故选 C。

七、阅读理解。

New Energy Vehicles (NEVs), such as electric cars, are becoming more popular around the world. They use clean energy like electricity instead of gasoline (汽油), which helps reduce air pollution and

slow down climate change. However, like any new technology, NEVs come with both hopes and problems.

NEVs are better for the planet. Unlike traditional cars that burn gasoline, they do not make harmful gases like carbon dioxide. For example, electric cars run on batteries (电池) and produce no smoke. This makes the air cleaner, especially in busy cities where traffic is heavy. Some NEVs even use sunlight energy, which is a type of power that never runs out. However, making NEVs is not completely clean. Digging up lithium (a material used in batteries) can harm the environment. Old batteries are also difficult to recycle and might be bad for the ground if not dealt with carefully. Scientists are trying to find better ways to reuse these batteries, but this is still a problem.

NEVs can help people save money in the long term. Electricity costs less than gasoline, so drivers spend less on fuel (燃料). Governments in many countries offer lower prices or free parking to encourage people to buy NEVs. On the other hand, NEVs are expensive to buy at first. A new electric car often costs 20%~50% more than a gasoline car. Even though fuel savings help in the long run, many families cannot buy a new electric car because of the high **initial price**. Also, fixing or replacing batteries can be very costly.

NEVs are filled with smart technology, which makes them smarter than traditional cars. Many NEVs come with modern technology like self-driving systems, parking assistants and touchscreens. They can even connect to your phone, which makes driving more convenient and fun. For example, some electric cars can stop by themselves if something or someone is in front of them. These smart tools make driving safer for drivers, passengers, and people on the street. And companies are working to make batteries last longer—some cars can now drive over 500 kilometers on a single charge (充电). Yet, NEVs still face challenges. Charging an electric car takes much longer than filling a gas tank—sometimes hours! Cold weather can also reduce battery life by up to 40%. Many drivers worry about running out of power during long trips if they cannot find a charging station quickly.

Although there are many challenges, progress is clear. With better technology, smarter rules, and public support, clean cars could soon replace gasoline vehicles. As one driver in California said, “My electric car saves money and protects the Earth—it's worth every penny. ”

()1. Which of the following is TRUE according to the passage?

- A. We've found effective ways to deal with NEVs' batteries.
- B. NEVs produce harmful smoke because of the batteries.
- C. NEVs can make use of different types of energies.
- D. People like NEVs more than gasoline cars.

()2. What does “initial price” in Paragraph 3 probably mean?

- A. Parking price. B. Electricity bill. C. Fuel savings. D. Starting cost.

()3. What can smart tools in NEVs do?

- A. They can avoid some dangers on the street.
B. They can charge the cars every 500 kilometers.
C. They help visitors have some fun during long trips.
D. They help cars drive for a longer time in cold weather.

()4. What's the best title for the passage?

- A. NEVs: The Winner of the Fuel War.
B. NEVs: Saving Money and the Planet.
C. NEVs: A Brighter Future with Challenges.
D. NEVs: Smart Technology in Modern Cars.

【答案】CDAC

【解析】本文主要讲述了新能源汽车的环境优势、经济性和智能技术，同时也分析了其面临的挑战。

1. 细节理解题。根据 “electric cars run on batteries (电池)”，“Some NEVs even use sunlight energy, which is a type of power that never runs out” 可知，NEV 可以使用不同类型的能源。故选 C。

2. 词义猜测题。根据 “A new electric car often costs 20%~50% more than a gasoline car” 和 “many families cannot buy a new electric car because of the high initial price” 可知，initial price 指的是购买新能源汽车最初的花费，即起步成本。故选 D。

3. 细节理解题。根据 “some electric cars can stop by themselves if something or someone is in front of them. These smart tools make driving safer” 可知，NEV 的智能工具可以避免一些街道上的危险。故选 A。

4. 最佳标题题。通读全文，文章介绍了新能源汽车的优势以及面临的挑战，并提到其未来前景，因此最佳标题是 “新能源汽车：充满挑战的光明未来”。故选 C。

八、完形填空。

Some old Chinese inventions have won wide 1. _____ around the world. Recently, a British woman used an ancient Chinese invention to help her son 2. _____ a math problem.

Dr. Mantri grew up in India. She was taught 3. _____ to use an abacus (算盘) to solve math problems when she was young. After noticing that her son Dhruv had great difficulty with math, she 4. _____ using the same ancient Chinese tool to help him after school.

“My son was in Grade 5 when I noticed he was 5. _____ in math,” said Dr. Mantri, “I would ask him 6. _____ very easy like ‘35-13=?’, but he couldn’t work it out.”

“I never thought I would teach him to use such an old tool 7. _____ I realized I could try the Chinese abacus. It is a useful 8. _____ to help kids better understand numbers and basic calculations (计算). Very soon I saw the results. After six days, Dhruv started to make progress 9. _____ with the help of the abacus. He even performed with the abacus at a school meeting.”

Known as the fifth invention of ancient China, Chinese abacus is also considered as the earliest computer. It helped people solve many math problems in ancient China. As long as you remember the 10. _____, you can easily use it.

So far, the Chinese abacus has been listed as an intangible cultural heritage of human beings (人类非物质文化遗产) for 10 years ever since 2013.

- | | | | |
|-----------------|--------------|---------------|-----------------|
| 1. A. advantage | B. wonder | C. show | D. popularity |
| 2. A. deal with | B. play with | C. agree with | D. compete with |
| 3. A. what | B. how | C. where | D. when |
| 4. A. liked | B. started | C. refused | D. expected |
| 5. A. creative | B. talented | C. weak | D. successful |
| 6. A. something | B. anything | C. everything | D. nothing |
| 7. A. after | B. when | C. until | D. since |
| 8. A. sign | B. method | C. report | D. symbol |
| 9. A. politely | B. loudly | C. bravely | D. rapidly |
| 10. A. opinions | B. rules | C. mistakes | D. Decisions |

【答案】DABBC ACBDB

【解析】本文主要讲述了一位英国女士用中国古代发明算盘帮助儿子解决数学难题的故事。

1. 句意：中国一些古老的发明在世界各地广受欢迎。advantage 优势; wonder 奇迹; show 展示; popularity 普及度, 受欢迎程度。根据下文“a British woman used an ancient Chinese invention to help her son”可知, 一位英国女性使用了一种古老的中国发明来帮助她的儿子, 所以此处是指一些中国古代发明在全世界广受欢迎。故选 D。

2. 句意：最近, 一位英国女性使用了一种古老的中国发明来帮助她的儿子解决一个数学问题。deal with 外理, 应对; play with 和...一起玩; agree with 同意; compete with 与...竞争。根据空后“a math problem”可知, 此处是指解决数学问题, 应用 deal with。故选 A。

3. 句意：她小时候就学会了如何使用算盘来解决数学问题。what 什么; how 如何; where 在哪里; when 什么时候。根据空后“to use an abacus”可知, 此处是指如何使用算盘。故选 B。

4. 句意：在注意到她的儿子德鲁夫在数学上有很大的困难后, 她开始在放学后使用同样的古老中国工具来帮助他。liked 喜欢; started 开始; refused 拒绝; expected 期望。根据语境可知, 在注意

到儿子数学有困难后, 她开始使用同样的中国古代工具在放学后帮助他; 考查 **start doing sth.** “开始做事”, 固定搭配。故选 B。

5. 句意: “我会问他一些非常简单的问题, 比如 $35-13=?$ ” “我儿子五年级的时候, 我发现他在数学上很薄弱,” 曼特里博士说, 但他解不出来。creative 有创造力的; talented 有天赋的; weak 弱的, 不擅长的; succesful 成功的。根据上文 “her son Dhruv had great difficulty with math” 可知, 此处是指儿子数学方面比较薄弱; 考查 **be weak in** “在某方面薄弱”, 形容词短语。故选 C。

6. 句意: “我儿子五年级的时候, 我发现他在数学上很薄弱,” 但他解不出来。something “某事, 某物”, 通常用于肯定句; anything “任何事, 任何物”, 通常用于否定句或疑问句; everything 每件事, 每样物; nothing 没有什么。根据语境可知, 此处是指问他一些很简单的问题, 句子为肯定句, 应用 “something”, 符合语境。故选 A。

7. 句意: 我从未想过我会教他使用如此古老的工具, 直到我意识到我可以试试中国的算盘。after 在...之后; when 当... 时; until 直到; since 自从。根据 “never” 可知, 此处是指从没过会教他使用这样一个古老的工具, 直到意识到 “我” 可以试试中国算盘, 考查 **not ... until** “直到... 才...”, 固定搭配。故选 C。

8. 句意: 它是一种有用的方法, 可以帮助孩子们更好地理解数字和基本的计算。sign 标志, 符号; method 方法; report 报告; symbol 象征, 根据下文 “He even performed with the abacus at a school meeting” 可知, 他甚至在学校会议上用算盘进行了表演, 所以此处是指算盘是一种帮助孩子们更好地理解数字和基本计算的有用的方法。故选 B。

9. 句意: 六天后, 德鲁夫在算盘的帮助下开始迅速取得进步。politely 礼貌地; loudly 大声地; bravely 勇敢地; rapidly 迅速地。根据上文 “Very soon I saw the results,” 可知, 很快就看到了效果, 所以此处是指儿子开始迅速地取得进步。故选 D。

10. 句意: 只要你记住它的使用规则, 你就能很容易地使用它。opinions 观点; rules 规则; mistakes 错误; decisions 决定。根据常识可知, 算盘有其使用的规则, 记住规则才能操作。故选 B。

思维进阶练

Project: Designing my invention

Imagine that you are an inventor. Think about what you are going to invent to make our lives better.

Part 1: Think and Discuss

In groups, brainstorm problems you want to solve. Use the questions and the example below to help you.

- What is the problem?
- Who needs help with this problem?
- What are the possible ways of solving this problem?

Example: problems

- A lot of people cycle to school and work. Bicycle helmets are not very convenient to carry around.
- It is difficult for old people to climb stairs.

The problems you have found out in your daily life.

Step 2 Discuss what kind of inventions can solve the problems.

Part 2: Read and Write

Design your invention in groups. Use the example below to help you.

Folding helmet

by James, Sara and Alex

INTRODUCTION

We are going to make a new kind of bicycle helmet. It will be a folding helmet.

PURPOSE

A lot of people don't wear helmets because it is difficult to carry them around. Our folding helmet will fit into a bag easily! With our invention, more people will wear helmets. It will keep more people safe.

DESIGN

The helmet is going to be made of hard plastic. It will shine in the dark. It will fit everybody.

Your group's design

Step 4 Present your invention to the class. Then vote for the best invention.

Evaluation	
Creativity (20)	How special is the invention?
Practicality (30)	Does the invention solve a real - world problem?
Design and Explanation (30)	Is the design useful in daily life and clearly presented?
Presentation Skills (20)	Is the presentation clear, attractive and well-organized?

【答案】 本题无标准答案，言之有理即可。
