

(时间: 90 分钟, 满分: 100 分)

## 一、单项选择 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

1. \_\_\_\_\_ he is ill, \_\_\_\_\_ he goes to school.  
A. Although; but      B. /; /      C. Although; /      D. /; although
2. It's wise of young people to avoid \_\_\_\_\_ the same mistakes again and again.  
A. make      B. to make      C. making      D. to making
3. I think Guangzhou is as \_\_\_\_\_ as Beijing.  
A. beautiful      B. beautifully      C. more beautiful      D. more beautifully
4. You may contact John on 3364-8830 for \_\_\_\_\_ information.  
A. far      B. farther      C. further      D. furthest
5. —Now I know how to do these things well by \_\_\_\_\_.  
—So you don't have to \_\_\_\_\_ your parents.  
A. me; depend on      B. myself; depend in      C. myself; depend on      D. me; depend in
6. English is spoken by \_\_\_\_\_ people in the world.  
A. a large number of      B. the number of      C. huge amounts of      D. the great number of
7. Mr Li is always strict \_\_\_\_\_ our studies and never makes fun \_\_\_\_\_ us.  
A. in, about      B. with, of      C. about, about      D. about, of
8. Students have many problems. \_\_\_\_\_, they often feel worried before an exam.  
A. For instance      B. Such as      C. Like      D. As for
9. —I want to know why Mr. Chen divided us \_\_\_\_\_ four groups?  
—\_\_\_\_\_ doubt, he wants to try out for the group teaching.  
A. into; For      B. on; In      C. into; Without      D. at; To
10. When I arrived home, I noticed my sister \_\_\_\_\_ with her toys.  
A. plays      B. played      C. to play      D. playing

## 二、完形填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

Every school day, we use schoolbags to carry all of our things to school. They are a big part of our lives. But have you ever thought about the \_\_\_\_\_ 11 \_\_\_\_\_ of the schoolbag?

In the Han Dynasty, when old-style private schools were opened, students used bamboo boxes to carry books to school. People considered the bamboo box to be the \_\_\_\_\_ 12 \_\_\_\_\_ schoolbag. There were usually two or three layers(层) in the \_\_\_\_\_ 13 \_\_\_\_\_. Kids put different things, like books, brushes, ink stones(砚) and paper in the boxes. You can see the bamboo box in many TV shows. \_\_\_\_\_ 14 \_\_\_\_\_, in the Legend of the White Snake, Xu Shilin carries a bamboo box to the capital to take an exam.

Hundreds of years \_\_\_\_\_ 15 \_\_\_\_\_, people developed a new kind of schoolbags called the “budai”, or the “hip-pocket”. The “budai” was lighter than the bamboo box. With the founding of the People’s Republic of China, military rucksacks(军用帆布包) became popular. Ask your grandparents or parents about these bags. Maybe they can tell you about their \_\_\_\_\_ 16 \_\_\_\_\_ of carrying them when they were in school.

A new style of schoolbags has \_\_\_\_\_ 17 \_\_\_\_\_ in recent years. Many of them have colorful and fashionable \_\_\_\_\_ 18 \_\_\_\_\_ on them, such as pictures of cartoons or pop stars. And they are more comfortable to use. Some students pull wheeled bags \_\_\_\_\_ 19 \_\_\_\_\_ with heavy textbooks and others carry backpacks.

Schoolbags are still changing. Can you imagine \_\_\_\_\_ 20 \_\_\_\_\_ future schoolbags will be like?

- |                    |                   |              |                |
|--------------------|-------------------|--------------|----------------|
| 11. A. weight      | B. history        | C. shape     | D. color       |
| 12. A. most famous | B. most beautiful | C. lightest  | D. earliest    |
| 13. A. an bag      | B. pocket         | C. hole      | D. box         |
| 14. A. However     | B. Moreover       | C. That is   | D. For example |
| 15. A. before      | B. later          | C. ago       | D. after       |
| 16. A. experiences | B. pictures       | C. invention | D. dreams      |
| 17. A. produced    | B. came           | C. appeared  | D. lost        |
| 18. A. people      | B. wheels         | C. designs   | D. words       |
| 19. A. covered     | B. filled         | C. carried   | D. poured      |
| 20. A. how         | B. when           | C. which     | D. that        |

### 三、阅读理解 (本大题共 15 小题, 每小题 2 分, 满分 30 分)

#### A

Benjamin Franklin came into the world on January 17, 1706. The family was a big one with several children. Ben went to school when he was 8. Although he did well in his study, there was not enough money for his education. So he left school after two years. But he never stopped learning. In 1742, he invented the famous Franklin stove.

Before Ben invented the Franklin stove, people heated their homes with fire in the traditional fireplace (壁炉). Using such kind of fireplace was not good because most of the heat went into the chimney (烟囱). And it was also dangerous because the fire in the fireplace could set the house on fire. Ben came up with the idea of using the baffle (折流板) system to make the heat travel throughout the stove. The Franklin stove used less wood and was safer to heat the room.

What’s more, Ben was interested in electricity. After many years of hard work, he finally had a plan to prove (证明) that lightning was electricity and he was successful at last in the kite experiment.

Although he had many inventions in life, he never kept them to himself. He wanted to share them

with people all over the world.

21. What can we know from the first paragraph?

- A. Ben went to school in 1716.                      B. Ben was born in a poor family.  
C. Ben was the only child of the family.              D. Ben was not interested in inventing.

22. How did the invention of the Franklin stove help us?

- A. It helped us buy more warm houses.              B. It helped us read more books.  
C. It helped us save wood and keep safer.              D. It helped us save some time to heat.

23. What does the third paragraph tell us?

- A. Ben and his stove.    B. Ben and his family.    C. Ben's hard life.              D. Ben and electricity.

24. Which of the following is TRUE according to the passage?

- A. Ben kept his inventions to himself.              B. Ben went to school for only a year.  
C. Ben did badly in his study.                      D. Ben did the kite experiment.

25. Why did the writer write the passage?

- A. To encourage us to write.                      B. To tell us to learn more at school.  
C. To tell us a famous inventor.                      D. To encourage us to invent something.

B

The Development of Transportation

Transportation has developed greatly over the centuries. In ancient times, people mainly traveled on foot or by riding animals like horses. It was a slow and tiring way to travel.

Then, the invention of the wheel changed transportation. People could use carts pulled by animals to carry goods and travel. In the 19th century, the steam engine was invented. Trains and steamships became popular. They could travel longer distances and carry more people and goods.

In the 20th century, the invention of the car and the airplane brought even greater changes. Cars made it more convenient for people to travel short distances. Airplanes made long-distance travel much faster. Now, high-speed trains are also becoming more and more common in many countries.

The development of transportation has made the world smaller. People can travel to different places more easily, and it also promotes international trade and cultural exchange.

26. How did people travel in ancient times?

- A. By car.                                              B. By train.  
C. On foot or by riding animals.                      D. By airplane.

27. What invention changed transportation after ancient times?

- A. The steam engine.    B. The car.                      C. The wheel.                      D. The airplane.

28. What became popular after the invention of the steam engine?

- A. Cars and airplanes.
- B. Trains and steamships.
- C. Bicycles and motorcycles.
- D. High-speed trains.

29. What is the advantage of high-speed trains?

- A. They are very cheap.
- B. They can carry the most people.
- C. They make long-distance travel faster.
- D. They are very comfortable.

30. What is the main idea of the passage?

- A. The history of transportation development.
- B. The importance of transportation.
- C. The future of transportation.
- D. The types of transportation.

C

On January 20, 2025, A Chinese technology (科技) company named DeepSeek created a new AI called DeepSeek-R1. This smart AI can solve math problems, write code (代码), and answer questions like top AI models such as OpenAI's GPT-40, but it cost much less money to build. The team spent only \$5.58 million (1/70 of OpenAI's cost) and used 2,048 computer chips (芯片) for two months to build it. This shows that good ideas can beat big money.

How It Learns

DeepSeek-R1 learns by trying many times and getting better, just like students practicing math problems. Other AIs need lots of prepared examples, but R1 improves by itself. This special learning way helped it get 79.8% right in an international math test, even better than OpenAI's model! A simpler version (版本) of R1 can even work on low-cost computers, helping schools and small companies.

Free for Everyone

DeepSeek-R1 is free to use and change. On its first day online, over 19,000 programmers from different countries started using it. A German scientist said experiments with R1 only cost \$10 instead of \$300 with other AIs. Even scientists from big companies like Meta said "This kind of free AI could change the world."

Big Reactions (反应)

The success of DeepSeek-R1 has made some U.S tech companies worried. Meta plans to spend \$65 billion more on AI research. Technology experts say China is improving very fast in AI development. A report in Nature magazine called R1 a "big step forward." showing that smart ideas beat expensive tools.

As a DeepSeek engineer said, "We want AI to be a friend, not something only rich people can use." With DeepSeek-R1, China has shown that great things come from creative ideas and hard work, not just from spending lots of money.

31. What is the passage mainly talking about?
- A. A new AI model can solve math problems.  
B. How computer chips work.  
C. The difference between Chinese AI and American's.  
D. Chinese AI Model DeepSeek-R1 stuns (震惊) the World.
32. What does “good ideas can beat big money” mean in Paragraph1?
- A. Big money is the main thing for success, and good ideas are less important.  
B. Good ideas can be more useful than having a lot of money.  
C. Good ideas can only work when used with a lot of money.  
D. Good ideas and big money are both important.
33. What can we learn from the passage?
- A. DeepSeek-R1 can only solve math problems and answer questions.  
B. DeepSeek-R1 learns by trying many times and getting better, not like how students practice maths.  
C. Compared with other AIs which need lots of prepared examples, R1 improves by itself.  
D. On R1's third day online, over 19,000 programmers worldwide started projects to study it.
34. How much do the German scientist's experiments with R1 cost?
- A. \$300                      B. \$5.58                      C. \$10                      D. \$65
35. Why is DeepSeek-R1 called a “big step forward”?
- A. It proves (证明) that smart ideas beat expensive tools.  
B. It uses the most expensive tools.  
C. It made U.S. tech companies worried.  
D. It can only help rich people.

#### 四、阅读还原 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

阅读下面短文, 从短文后的选项中, 选出可以填入空白处的最佳选项。选项中有一项为多余选项。

China is a great and old country in the world. \_\_\_\_36\_\_\_\_. Do you want to know some of them?  
Let's have a look.

The first invention is silk. Chinese people started to make silk thousands of years ago. They used silk to make clothes, and they wrote on it. They also used it to do many other things. 37. It started the first trade between the eastern world and the western world.

Many people know the Silk Road. 38. And it ends in Rome. It has great importance for Chinese trade with other countries.

The second is china (瓷器) which is made of china stones and other things. This invention was invented about three thousand years ago. Early china looked very simple, and people mainly used it to hold things. It became more and more beautiful gradually with its development. 39.

There are many kinds of china, such as Ruyao, Dingyao and Geyao. The china in Jingdezhen City is very famous in China. Now people usually use it to have dinner, make tea and so on.

There are also other great inventions in Chinese history, such as paper and the kite. They are an important part of Chinese history, 40.

- A. Silk is one of the most important inventions in Chinese history
- B. There are many valuable inventions in China
- C. And people started to enjoy china because of its beauty and value
- D. so nobody would like to pay attention to them
- E. so every Chinese should value them
- F. It starts from Xi'an, Shaanxi Province

#### 五、语法填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

阅读短文, 在空白处填入一个适当的单词或者用括号内所给词的正确形式填空, 使短文通顺、连贯。

Chopsticks are useful tools to have meals in China. Chopsticks first appeared in ancient China. They were invented before Shang Dynasty (朝代). The earliest chopsticks 41 (make) of bronze (青铜). They were 26 centimetres long and 1.1 to 1.3 centimetres wide. People used them 42 (pick) up food at that time.

Most people believe that Chinese invented chopsticks. There are many 43 (story) about the inventor of chopsticks. Someone says that Jiang Ziya, a wise man, created chopsticks. 44 (actual), no one knows for sure. We can only say the inventor was a clever ancient Chinese.

Chopsticks are usually 45 the shape of being square above and circle below. Chinese believe that 46 Earth is square and the sky is circle. This 47 (show) respect to the nature. Many people think it's difficult to use chopsticks. In fact, it's not. Hold them between the thumb (拇指) 48 other fingers. The key is to hold one piece tight and move the other to control movement and force.

Chopsticks are also an 49 (importance) part of Chinese culture. In China, it is nice to pick up food for the old by using chopsticks. But it's impolite to point at others with them. And never make 50 (you) chopsticks stand straight in a rice bowl.

#### 六、单词拼写 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

51. A\_\_\_\_\_ it is rainy, these children are still playing happily.
52. I can't find the cat. Did you see it a\_\_\_\_\_?
53. Good health d\_\_\_\_\_ on good food, exercise and good sleep.
54. As we all know, bikes usually have two w\_\_\_\_\_ while cars usually have four.
55. Try to a\_\_\_\_\_ drinking too much coffee, or you can't sleep well.
56. This \_\_\_\_\_ (国际的) event attracted people from around the world.
57. I live with my grandpa in \_\_\_\_\_ (中心的) London.
58. The workers are going to decorate the room with lots of \_\_\_\_\_ (气球).
59. Can you \_\_\_\_\_ (拉) the trailer by yourself?
60. The company produces the food without \_\_\_\_\_ (疑问).

#### 七、完成句子 (本大题共 5 小题, 每小题 2 分, 满分 10 分)

61. 黄河为我们提供大量的水。

The Yellow River provides us with \_\_\_\_\_ water.

62. 如果天气好, 我更喜欢步行去上学, 而不是坐公共汽车。

If the weather is nice, I prefer to go to school \_\_\_\_\_ instead of taking the bus.

63. 毫无疑问, 人们依靠机器人来做许多事情。

\_\_\_\_\_, people \_\_\_\_\_ robots to do lots of things.

64. 会议应于 6 月 5 日举行。

The meeting should \_\_\_\_\_ on the fifth of June.

65. 取笑别人是不礼貌的。

\_\_\_\_\_ is impolite to \_\_\_\_\_ others.

#### 八、书面表达(15 分)

66. 假设你发明了一种会飞的房子 (a flying house)。请你根据下面的提示内容，以“My Invention”为题写一篇英语短文，介绍你的发明。

|    |                |
|----|----------------|
| 外观 | ①两个翅膀；②.....   |
| 特点 | ①飞行速度快；②.....  |
| 功能 | ①节省大量空间；②..... |

要求：

- 1. 要点齐全，每条第②项均须适当发挥；
- 2. 词数 80 左右；
- 3. 文中不得出现真实姓名和校名。

参考词汇：翅膀 wing；节省 save

My Invention
