| 20. A. make up | B. grow up | C. stay up | D. get up |

三、阅读理解 (本大题共 15 小题, 每小题 2 分, 满分 30 分)

A

When the famous scientist Albert Einstein was 16 years old, he imagined himself riding alongside a beam (束) of light. He used this picture in mind to help him when working out the "theory of relativity (相对论)". "Imagination is more important than knowledge," said Einstein.

Daydreaming, called "thought experiments(实验)" by Einstein, can make you have wild imaginings, like flying around in space. It lets your mind walk slowly around ideas, memories and experiences that aren't happening right now. It means thinking ahead to a holiday or remembering how much you enjoyed

a birthday party. According to China's health authorities (权威机构), daydreaming for a while each day can improve your health and creativity.

Disappearing into a daydream lets your mind escape when things are difficult. It helps you deal with worries and fears. For example, imagining how you're going to speak up in class is like practicing the scene in your head, which can make you feel calmer. Daydreaming also inspires (激励) creativity and lets you find new worlds where there are no limits (限制) to what you can do or who you are. Guo Qiang, an expert in thoughts and feelings, thinks we should all make time to daydream. "Thinking for pleasure can be a powerful tool to shape our feelings," he said.

However, try not to let your mind be absent when you need to focus (聚焦) in class or cross the road. Instead, find a time when you don't have to focus on anything, like going for a walk or brushing your teeth. Guo suggests you can start by focusing on a happy memory or imagining a future success, like scoring a goal in the World Cup.

To encourage creativity, think about interesting ideas and see where your mind takes you. Research shows that people often come up with more solutions (解决方法) to problems after they've taken a break. So next time you're stuck with homework, stop for a moment and see where your daydreams take you.

21. Which writing skill is used in paragraph 1?

A. Giving an example. B. Raising a question. C. Listing numbers. D. Comparing facts.

22. What does the underlined word "absent" in Paragraph 4 probably mean in Chinese?

A. 耐心的 B. 走神的 C. 专注的 D. 骄傲的

23. Guo Qiang first suggests _____.

A. escaping from the hard time B. looking for new worlds
C. finding time to imagine D. focusing on success

24. What is mentioned in paragraph 4?

A. The steps to daydream. B. The things to daydream of.
C. The reasons for daydreaming. D. The meanings of daydreaming.

25. Which of the following is TRUE according to the text?

A. Daydreaming is not helpful in developing creativity.
B. Disappearing into a daydream helps you deal with worries and fears.
C. You can't let your mind be absent when you don't have to focus on anything.
D. Daydreaming lets your mind walk slowly around ideas that are happening right now.

B

If you put your history notes under your pillow (枕头) and sleep on them the night before an exam, will you do any better in the exam? Most of us have hoped this may help. However, knowledge can't go through the pillow into your brain. But that doesn't mean you can't learn while you are asleep.

Scientists aren't exactly sure how it works, but they have discovered that the brain can learn things during sleeping hours.

In one experiment (实验), researchers gave German speakers some Dutch words to learn. Then, they divided them into three groups. The researchers played the Dutch words for people in Group 1 while they were asleep, without telling these German speakers what they were doing. The sound was low so it didn't wake them up, and only the newly introduced words were used.

Another group listened to the same words while they were awake. The researchers found the people in Group 1 were better able to identify (识别) and translate (翻译) the words later. This was true only for the words that were played while they slept. The third group listened to the words when they walked. The walkers didn't have the same success in remembering the words as the sleeping group.

The researchers later found that people had more slow-wave brain activities all over the night. They said that more slow waves made people have a better memory for the new words.

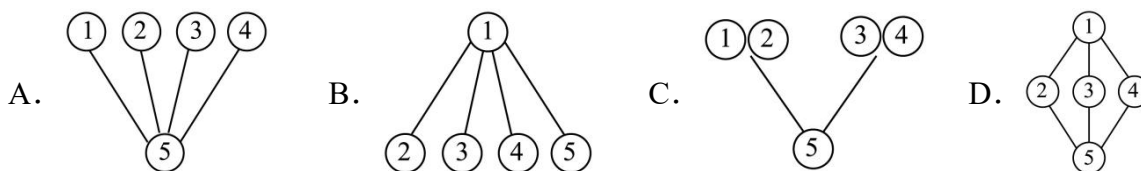

26. When did the researchers play foreign words for people in Group 1 in the experiment?

- A. Before they went for a walk. B. Before they went to bed.
C. When they were asleep. D. When they were having dinner.

27. What does the underlined word "them" refer to in Paragraph 3?

- A. Dutch words. B. German speakers. C. Dutch speakers. D. German words.

28. What's the structure of this passage?

29. What can we learn from the passage?

- A. Scientists think people can't learn during sleeping hours.
B. German speakers enjoy learning Dutch words.
C. Slow-wave brain activities can help people have a good sleep.
D. People in Group 3 didn't remember the words as well as those in Group 1.

30. Where is the passage most probably from?

- A. A history textbook. B. A science magazine. C. A travel newspaper. D. A modern novel.

C

Memory is a wonderful and complex function of our brain. There are two main types of memory: short-term and long-term. Short-term memory is like a temporary storage. It can hold a small amount of information for a short time, such as a phone number you just heard. Long-term memory, on the other hand, can store information for a long time, even a lifetime. To improve memory, we can use several strategies. First, pay full attention to new information. If you don't focus, you won't remember it. Second, repeat the information. Repeating helps move it from short-term to long-term memory. Third, connect new information to something you already know. This makes it easier to remember. Also, getting enough sleep is crucial because sleep helps strengthen memories.

31. What are the two main types of memory?

- A. Good and bad. B. Short-term and long-term.
C. Fast and slow. D. Big and small.

32. What is short-term memory like?

- A. A permanent storage. B. A temporary storage.
C. Can store a lot of information. D. None of the above.

33. How can we move information from short-term to long-term memory?

- A. By paying attention. B. By repeating.
C. By connecting to known information. D. By sleeping.

34. Why is sleep important for memory?

- A. Because it helps strengthen memories. B. Because it makes us forget.
C. Because it increases short-term memory. D. None of the above.

35. What is the main idea of the passage?

- A. The types of memory and ways to improve it. B. How to have a good sleep.
C. What long-term memory is. D. None of the above.

四、阅读还原 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

以下是一则短文, 请阅读短文, 并从下列的六个句子中选择五个还原到原文中, 使原文的意思完整、连贯。

In our daily lives, procrastination (拖延症) often happens to us. When procrastination becomes a habit, it can make our lives terrible. 36

Make daily “to-do” lists.

Before your day ends, make a plan for tomorrow. List tasks in order of importance. 37

Break large tasks up into small ones.

If a project (项目) looks too big, you may not want to do it. 38 Begin by breaking your task up into smaller parts. This helps take away the unneeded fear of having to do a large project all at a time.

39

If your study place is full of distractions (使人分心的事), you'll need to make some changes. You may need to take away your phone or TV from your study place. Make sure it's quiet and bright for you!

Follow the five-minute rule.

The hardest part about any task is getting started. One way to solve this problem is to schedule (安排) a time daily to work on your big project. Work on it for only five minutes. 40 Surprisingly, once you've begun, you may be able to keep going and finish the task.

- A. Change your environment.
- B. As you finish each task, check it off.
- C. Then decide whether or not to continue.
- D. But every project can be finished if you break it into small steps.
- E. However, taking a few steps can help you avoid (避免) it!
- F. Sometimes you can ask your parents for help.

五、语法填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

根据内容填写所缺单词或用所给单词的正确形式填空, 使语篇意思完整。

Our feelings influence almost every decision we make. Instead 41 living a boring life, positive feelings can help us a lot. The pity is that sometimes we become victims (受害者) of feelings. In one of my 42 (late) books, I compare people's ability to the controls (控制键) on a media player. Just like the controls can help you enjoy wonderful songs, these methods will be 43 (choice) for you to manage feelings successfully.

1. Pause

Take time to stop and think twice before you speak or act. Of course, you may feel sorry if you like doing something without 44 (think) twice—like sending 45 angry email or posting something bad on social media. If you feel your feelings getting out of control, pause. If possible, go for a short walk. Once you've calmed down, decide how you want to move forward.

2. Volume control (音量控制)

Have you ever noticed that when 46 (speak) with someone, your style or tone is a mirror of the other person's? If you stay calm or quiet, they'll follow you. Shout or scream, and they'll do just like you. If a 47 (discuss) starts to become worse, try to change it by softening your tone or lowering your voice.

3. Record

If you want to learn more about another _____ 48 _____ (person) thoughts, recording, a way of careful listening, may help. You don't need to reply at once. Instead, you're listening to understand. Through listening _____ 49 _____ (careful), it can help you discover misunderstandings you don't know. Don't judge (评价) or offer advice _____ 50 _____ you know more about others and the topic.

六、单词拼写 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

51. She is good at many subjects, e_____ English.
52. The n_____ temperature of human body is between 36°C and 37°C.
53. Mr White likes to r_____ on the sofa with a newspaper.
54. We'll have an exam next week, it makes us s_____ out.
55. To be an excellent host in a TV program, you need to have a good s_____ of humor.
56. Please r_____ what you said just now. I didn't hear clearly.
57. Mary is an American girl. She is used to having dinner with knives and f_____.
58. You had better make a shopping l_____ before you go shopping.
59. Of all the subjects, I like _____ (化学) best.
60. Fruits and vegetables _____ (包含) vitamins, minerals and fiber.

七、完成句子 (本大题共 5 小题, 每小题 2 分, 满分 10 分)

61. 阅读在我们的日常生活中正发挥着重要作用。

Reading is _____ in our daily life.

62. 他保证每天花半小时练习书法。

He _____ spending half an hour practicing calligraphy every day.

63. 她反复思考了好几天, 终于弄清楚了这道数学难题的解法。

She thought hard for several days and finally _____ the solution to this math problem.

64. 他经常制作识字卡片来学习英语。

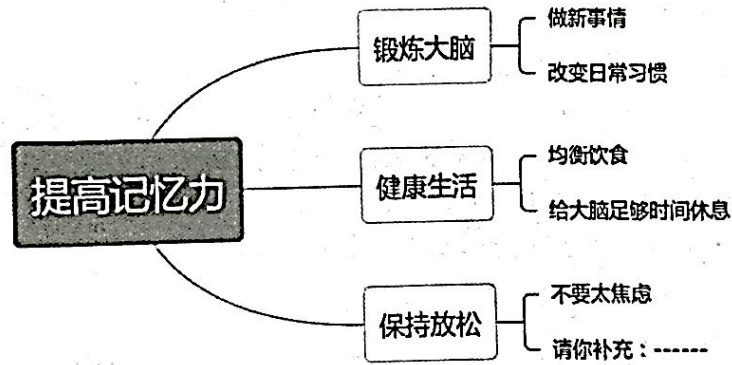

He often makes _____ to study English.

65. 最后但同样重要的是, 我们要学会尊重身边的每一个人。

_____, we should learn to respect everyone around us.

八、书面表达 (15 分)

66. 假设你是李华, 你的英国笔友 Tom 向你请教如何提高记忆力。请你根据以下提示给他写封回信, 提出你的建议。短文需要包含以下要点。

要求：

- 1.词数：80 词左右（短文的开头和结尾已给出，不计入词数）。
- 2.不得透露学校、姓名等任何个人信息，否则不予评分。

Dear Tom,

I'm glad to give you some advice on how to improve your memory.

I hope my advice can help you. I am looking forward to your improvement.

Best wishes!

Yours,
Li Hua
