

(时间: 90 分钟, 满分: 100 分)

一、语法选择 (本大题共 15 小题, 每小题 1 分, 满分 15 分)

When you're leaning 1 new language, there are a lot of things to remember: spelling rules, grammar rules, punctuation rules...the list is endless. But there's 2 that can help you: mnemonics (助记符号).

Mnemonics are techniques to help you remember things. There are a variety of them, 3 rhymes, spelling acronyms (首字母缩略词) and sentence mnemonics.

Rhymes are a great way 4 things. The sounds, unusual words and rhythm of them help you recall ideas. Do you know when Columbus sailed to America? There's a rhyme to help you which goes like this, "5 fourteen-hundred and ninety-two, Columbus sailed the ocean blue." Most people 6 that since they 7 young and never forget it!

Spelling acronyms involve creating a sentence 8 on the letters of a target word. For example, the following sentence can help you with the spelling of the word "because", "Big elephants can always understand small elephants". Notice how the 9 letter of each word in the sentence spells out the word "because". This one 10 to remind you to include the "h" in the word "which", "Which house is Cath's house?" To spell Mississippi, a rhythm mnemonic is combined with a spelling one: "miss iss ippi". And 11 you can't remember the spelling of the word "mnemonics", use this one "Mike never eats meat or nuts in case he is sick."

Sentence mnemonics are also 12. The following can help you with the difference between the words "principal" and "principle", "A principal is your pal at school, and a principle is a belief or rule." Or this one to help you remember the difference in spelling between "deserts" (such as the Sahara) and "desserts" (such as Tiramisu), "A dessert has two sugars so it's 13 but a desert only has one." The two "sugars" mentioned in the sentence refer to the two s's in the word "dessert". Or this one to clear up the confusion between "stationery" and "stationary", "The car is stationary. An envelope is stationery".

You can learn grammar rules with sentence mnemonics too. For example, this one 14 help you with the position of adjectives, "Adjectives come before nouns just as 'A' comes before 'N'." And this one can help you learn about the use of apostrophes (撇号), "Apostrophes show possession (拥有)."

Mnemonics can help a lot with language learning. Why not 15 inventing a few of your own!

| 13. A. sweetest | B. sweet | C. sweeter | D. sweets |
| 14. A. should | B. can | C. had better | D. must |
| 15. A. try | B. to try | C. trying | D. tried |

二、完形填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

People have believed for a long time that laughter, as the old saying goes, is good for the soul. There is now scientific evidence that it is also good for the 16. Recent research has shown that laughter strengthens the heart, helps the flow of blood 17 the body, reduces pain, aids healing, fights infections, and decreases blood pressure. It also improves memory, makes people feel more confident, and 18 to a positive view of life.

Laughter Clubs None of this 19 would surprise Dr. Madan Kataria. After reading about some of the benefits of laughter, he 20 a “Laughter Club” in a public park in Bombay, India. That was in 1995. There are now more than 2,500 such clubs around the world following his practice.

Club meetings aren’t exactly 21, but that’s sort of the point. Although the noise may surprise those passing by, the participants know exactly what they’re doing and why they’re doing. It’s good for them. Meetings are often held 22 in the day, so people can get in a good twenty minutes or more of laughing before they head off for work. Once there, members believe, they concentrate (集中心思) better and are more 23.

Just Fake It How do these clubs find enough jokes to keep everyone howling? They don’t. According to Dr. Kataria, it doesn’t 24 if laughter is produced naturally, by actually finding something funny, 25 if it is faked (假的). The benefits to the body are the same. Laughter club leaders get things going without any comedians around to help.

22. A. late B. early C. soon D. sometime
23. A. productive B. impressive C. imaginative D. attractive
24. A. mean B. matter C. manage D. mistake
25. A. or B. so C. and D. but

三、阅读理解 (本大题共 15 小题, 每小题 2 分, 满分 30 分)

A

We have heard about people with special memories. Recently there has been a report about a woman from Australia who can remember almost every detail (细节) of all the events in her daily life.

Rebecca Sharrock, 25 years old, is one of just 80 people worldwide who have Highly Superior.

Autobiographical Memory (HSAM, 超级自传体记忆症). It means she can remember every small event, which most people would forget in days, as if it had happened just minutes ago.

“I remember my mum putting me in the driver’s seat of a car and taking a picture of me when I was 12 days old”, she said. “That’s my earliest memory. I remember every day since then. I can’t tell all the dates because I was too young to understand calendars, but I remember what I did that day, what the weather was like and so on.”

Rebecca can also reexperience taste. “When I was five years old, I ate my favorite food, Black Forest cake. The memory is so strong that every time I think of it, I can nearly taste it.”

However, sometimes her memories prove (证明) to be painful because they’re not just events that she remembers. “When I relive memories, the feelings return, too,” Rebecca said. “For example, I remember falling over when I was three at my grandparents’ house and hurting my left knee. Talking about it now, I feel painful in my left knee.”

“Last Halloween, I got very scared because of my classmate’s costume (戏服). At night, I have to sleep with the music and a soft light on,” she added. “If it’s too dark or quiet, my mind would be filled with all these memories and I can’t sleep.”

26. What is Rebecca different from normal people?

- A. She is an excellent woman. B. She can remember every detail of life.
- C. She comes from Australia. D. She speaks good English.

27. What does the underlined word “**relive**” probably mean in the passage?

- A. experience again B. record C. repeat D. express again

28. What is the time order of the following events that Rebecca experienced?

- ①She got very scared because of her classmate costume.
- ②She fell over at her grandparents' house and hurt her left knee.
- ③Her mom put her in the driver's seat and took a picture.
- ④She ate her favorite food, Black Forest cake.

A. ①③②④ B. ③④①② C. ③④②① D. ③②①④

29. What can we know from the passage?

- A. HSAM can do Rebecca good, but it also brings her pain.
- B. Rebecca feels painful if she recalls every experience.
- C. Rebecca studies well at school.
- D. HSAM can greatly improve Rebecca's living conditions.

30. What is the best title of the passage?

- A. Childhood Games B. Wonderful Halloween
- C. Unusual Memories D. Australian History

B

Is it *shi* (是) or *si* (斯) in the sentence “Thus when Heaven is about to confer a great office on any man (故天将降大任于是/斯人也)...”? Not long ago, people had a discussion online about this. Most people “clearly remember” that it's *si*, while their childhood textbooks say it's *shi*.

It shows how unreliable (不可靠的) our memory can be. According to US psychologist Fairn Brynie, memories can be influenced by imagination, belief and time. Many studies have shown that “feeling sure” about a memory sometimes has nothing to do with the facts.

Attitudes and beliefs change our memory.

Scientists at Cornell University, US, told college students a story about a man who walked out without paying a restaurant bill. The first group was told that the man “liked to steal”. The second group was told that he left because he got an emergency (紧急的) phone call.

One week later the first group remembered a higher bill—10 to 25 percent more than the bill actually was. The second group remembered a lower bill. The study showed that how we expect or believe things to happen can distort (扭曲) our memories.

Remembering things that never happened.

In another experiment (实验), people watched a film and were asked: “How fast was the white car going when it passed the barn (谷仓) while traveling along the country road?” Actually there was no barn in the film. But about 20 percent of the students said they had seen the barn. Northwestern University scientist Kenneth Paller said that parts of the brain for really seeing an object and imagining an object overlap (重叠). So imagination after getting a hint(暗示) could leave a memory trace (痕迹) in the brain.

Si or shi.

In the case of *si* or *shi*, some people said that *si* sounds more like ancient Chinese. That’s why most people “clearly remember” *si*. On the Internet, the version (版本) of *si* is also more widespread than *shi*, giving people a wrong hint.

31. In the first experiment, the first group remembered a higher bill because _____.
 A. the students forgot the bill completely
 B. the students thought the man was rich enough
 C. the scientists made the students believe the man was bad
 D. the scientists told the students that the man should pay more
32. What does the underlined word “hint” in the second experiment refer to?
 A. The sights in the film. B. Kenneth Paller’s words.
 C. A real barn in students’ memories. D. The word “barn” in the question.
33. What can we learn from the case of *si* or *shi*?
 A. Feelings can influence people’s memories. B. The version of *shi* is more widespread.
 C. People’s memories are always unreliable. D. There was no sound of *shi* in ancient Chinese.
34. The writer introduces two experiments in the text to _____.
 A. lead in the topic B. give explanations C. ask questions D. make comparisons (对比)
35. Which of the following is the best title for the passage?
 A. Are you really sure? B. Have you forgotten yet?
 C. What should be remembered? D. How is the memory improved?

C

If you don’t use it, you lose it. At least, that’s how the old saying goes. It refers to the idea that something that does not get used often quickly falls into a state of decline (衰退). For example, a hobby that you haven’t done for a few years, like playing the piano. The next time you pick it up, maybe you’ve forgotten altogether! In order to avoid this, people take usual exercise to keep their skills well-practiced.

Well, what about the brain? As we age, our brains can naturally begin to decline. In some cases, this can lead to certain brain problems: such as dementia (痴呆). However, all is not lost because these days it's easy to train your brain. Smartphones and apps provide programs that can test, keep and even improve our memories and a number of other brain skills. With a little practice every day, we can keep our brains active, right?

Well, no, actually. According to a report from the Global Council on Brain Health, even though many people think it is beneficial to play some online games that are designed to improve brain health, the evidence (证据) of the benefits is "weak to non-existent". Playing a "brain game" might cause improvements in game performance, yet it hasn't proven to a believable result in people's daily cognitive (认知的) abilities.

Don't lose heart, though. There are other ways to develop the brain. It suggests trying new activities which can make you think in new ways, let you connect with others socially and help you lead a healthy life. Among their suggestions are practicing Tai Chi, taking photography classes, learning new technologies, gardening, art projects or volunteering.

There's more good news, too. James Goodwin, chief scientist at Age UK, has said that brain decline is not unavoidable. As long as the activities are "new to you and require your full focus", they can provide benefits for brain health. So, hurry up, get out there and try something new. Maybe it's time to try that hobby you've always wanted to do.

36. Why is playing the piano mentioned in paragraph 1?

- A. To introduce the topic of brain decline.
- B. To explain how to keep physically healthy.
- C. To show the importance of practice.
- D. To describe the meaning of an old saying.

37. According to the passage, how can the brain training apps help you?

- A. It will improve our memory.
- B. It can make us smarter.
- C. It can do little to train our brains.
- D. It can protect us from ageing.

38. How can we develop the brain according to the passage?

- A. Using smart phone regularly.
- B. Trying some new activities.
- C. Playing brain games online.
- D. Doing what you are good at.

39. What can we infer (推断) from the passage?

- A. Playing brain games can improve people's daily cognitive abilities.
- B. Playing brain games has been proven to help the brain work better.
- C. Repeating the skills you already know will be good for your brain.
- D. James Goodwin believes we can do something about brain decline.

40. What does the passage mainly tell us?

- A. How to keep brain healthy and active. B. How to live meaningfully at an old age.
C. Disadvantages of using smart phones. D. Advantages of trying something new.

四、阅读还原 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

根据短文内容, 从下面方框中选择适当的选项补全短文。选项中有一项为多余选项。

Is there a relation between music and language? According to recent studies, the answer is yes.

41 _____ Here, we look at two examples.

A recent study by researcher Kraus shows that playing a musical instrument can improve a person's hearing ability. _____ 42 _____ The people in the first group were musicians, while those in the second group had no musical training. The musicians were able to hear the talking person more clearly.

_____ 43 _____ When the violinists play with the group, they hear their own instrument and many others, too. But the violinists must listen closely to what they are playing, and pay no attention to the other sounds. In this way, musicians are able to hear certain sounds, even with lots of noise.

Schlaug, a doctor, works with stroke (中风) patients. Because of their illness, these people cannot say their names, addresses, or other information normally. However, they can still sing. Schlaug was surprised to find that singing words helped them to speak. Why does this work? Music seems to make different parts of the brain work, including the damaged (损坏的) parts. _____ 44 _____

Music improves memories, listening skills, and our language abilities. _____ 45 _____ Music is not only enjoyable, but it's also good for us in many other ways.

- A. It can even help sick people get better.
B. Music improves certain language abilities in the brain.
C. This might help patients to use that part of the brain again.
D. The violinists develop their memories by playing the violin.
E. In his study, two groups of people listened to a person talking in a noisy room.
F. Musicians hear better because they learn to pay attention to (注意) certain sounds.

五、语法填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

阅读短文, 在空格处填入一个恰当的词或使用括号中词语的正确形式填空, 并将答案填写在答题卡规定的位置上。

Nearly all students want to have a good memory so that they can study well. Yan Jiashuo, a young girl, is quite lucky. She _____ 46 _____ (receive) the honor of "International Master of Memory" so far. About 300 people have been honored as masters. Yan Jiashuo is the _____ 47 _____ (young) among them.

Yan Jiashuo always has 48 good memory. And the good memory comes from good training. When she was 4 years old, her parents asked her 49 (memorize) ancient poems and books. She has practised a lot. So she can 50 (easy) and quickly recite texts in class at school. What's more, she loves reading. When she was in the 51 (three) grade, she could read one book a day.

Yan Jiashuo is good at both Chinese 52 Maths. For her, numbers are not boring at all. She can make up stories 53 these numbers. She said her 54 (succeed) was the result of years of hard training. "Everyone will have a good memory, if they train 55 (they) a lot. And there are plenty of ways," she added.

六、选词填空 (本大题共 10 小题, 每小题 0.5 分, 满分 5 分)

(用方框中所给单词的适当形式填空, 每次限用一次。)

maintain	normal	particular	lose	memory	affect	relax	advise	easy	stress
----------	--------	------------	------	--------	--------	-------	--------	------	--------

56. When you are preparing for your speech, don't try to _____ each word. Instead, just remember the key point.
57. We need to _____ a healthy lifestyle.
58. Listening to music and watching films are both _____ forms of entertainment.
59. Don't feel too _____ while you are taking an exam.
60. —What do you often do in the evening?
—We _____ do our homework and watch TV at home.
61. The earthquake that occurred last month led to serious damage and _____ the daily life of many people.
62. Cars make our life much _____, but they bring environmental problems.
63. When we meet problems, we should ask our parents and teachers for _____.
64. The teacher explained the Maths problem _____ so that everyone could understand it, even though it was quite challenging.
65. The _____ of his bike makes him feel really sad.

七、句子翻译 (本大题共 5 小题, 每小题 2 分, 满分 10 分)

66. 除非你定期复习, 否则你无法很好地记住新单词。(unless)

67. 尝试新的事物既能锻炼我们的大脑, 也能提高我们的记忆力。(as well as)

68. 最后但同样重要的是, 健康的饮食对记忆也非常重要。(last but not least)

69. 为了保持良好的记忆, 我们要保证锻炼大脑。(make a point of)

70. 我发现拥有良好的记忆对学习是非常重要的。(find it + adj. to do sth.)

八、书面表达（15 分）

71. 某英文报刊为中学生开辟专栏，请以“How to improve your memory”为题目写一篇英语短文，为报社投稿。

内容提示：

1. 记忆力很重要；
2. 改善记忆力的方法。

要点：

1. 词数 80-100；
 2. 字迹工整，内容完整连贯，语言准确规范；
 3. 短文包括所给内容信息，可以适当增加细节，以使行文连贯。
