In ancient China, there was a story about the invention of silk. People believed that silk was first invented by Leizu, the wife of the Yellow Emperor. Leizu learned how to make cocoons (蚕茧) into soft and strong cloth. This cloth became known as “silk”.

During the Han Dynasty, a brave officer Zhang Qian traveled west to Central Asia and brought silk there. As years passed by, silk became so important that the trade road from Europe to China got its name—the Silk Road.
