Petrol cars and electric cars

**Part 1: Think and Compare**

What are the differences between petrol cars and electric cars? (使用比较级造句)

Part 2: Read and Explore

Are electric cars (电车) good for the Earth? Many of us would probably say yes. But Robert Sansone knows the answer isn't that simple. Sansone is called a natural-born engineer. It is not surprising if you know the 17-year-old has completed nearly 60 engineering projects.

A couple of years ago, Sansone watched a video about the advantages and disadvantages of electric cars. The video explained how the motors (发动机) of these cars are made. Most of them use rare-earth metals (稀土金属). These materials are very expensive. Even worse, they are often collected in ways that are harmful to the Earth. "Must we use these metals? Is there a more environmentally-friendly way?" Sansone thought. He had heard of the synchronous reluctance motor (同步电动机) before. But its performance should be improved.

Over the following year, Sansone put one design after another to the test. Things didn't go well at first. He failed fourteen times before coming up with a working model. The model is about 40% more powerful than a traditional one. And it doesn't use rare-earth metals. These efforts have helped Sansone win a big award. He took part in this year's Regeneron International Science and Engineering Fair (大奖赛) with his motor. It's the world's largest pre-college science competition. He stood out from more than 1,800 competitors to win first prize.

Sansone, however, isn't yet done with his invention because it is far from perfect. It is difficult to make. This means it's hard to become widely used. So Sansone has continued to improve and test his motor. Hopefully Sansone's design will completely change the electric car industry one day.

Part 2: Skills Challenge

Task 1: Critical Thinking (根据文章内容回答下列问题)

1. What are the disadvantages of electric cars?

2. Why isn't Sansone done with his invention yet?

3. What do you think of Sansone?

Task 2: Creative Project

【答案】CDADC BAAAD

【解析】本文是一篇记叙文。文章主要讲述了克拉克先生的儿子迈克对电灯的发明产生了兴趣，通过提问“为什么爱迪生的父亲没有发明电灯”，反驳了父亲“父亲总是比儿子懂得多”的观点，体现了孩子的好奇心和独特的思维方式

1. 句意：他喜欢读书，经常从图书馆借书。find 找到；sell 卖；borrow 借；buy 买。根据"from the library"可知，此处是指从图书馆借书；考查 borrow...from... "从...借..."，动词短语。故选 C。

2. 句意：他每天早上听收音机，晚饭后读报纸。CD 光盘；music 音乐；TV 电视；newspaper 报纸。根据空前 reads 可知，此处指读报纸。故选 D。

3. 句意：他也喜欢读书，用"also"表示“也”，符合逻辑。故选 A。

4. 句意：克拉克先生总认为他太小，理解不了，于是选择最容易的问题来回答。more difficult 更难的；the most difficult 最难的；easily 容易地，副词；the easiest 最容易的。根据上文"he's too young to understand him"可知，他太小，理解不了，所以此处是指父亲会选择最容易的问题来回答，应用形容词最高级"the easiest"，在句中作定语，修饰“ones”。故选 D。

5. 句意：一天，迈克读到一些关于电灯的内容，并且对它产生了兴趣。everything 一切；nothing 没什么；something 某事/物，用于肯定句；anything 任何事/物，用于否定句或疑问句。根据“read. . . about the electric lights”可知，本句是肯定句，是指读到一些关于电灯的内容，“something”符合语境。故选 C。

6. 句意：一天，迈克读到一些关于电灯的内容，并且对它产生了兴趣。be worried about 担心…；be interested in 对…感兴趣；be afraid of 害怕…；be angry with 对…生气。根据下文“he went on thinking of it”

可知，他继续思考这件事，所以此处是指他对电灯感兴趣，应用“be interested in”。故选 B。

7. 句意：然后他的父亲说：“父亲总是比儿子懂得多！”more 更多，比较级；most 最多，最高级；less 更少，比较级；least 最少，最高级。句中“than”提示用比较级；再根据下文“Why didn't his…invent them, then?”可知，迈克用“爱迪生的父亲为什么没发明电灯”反驳父亲的看法，所以此处是指克拉克先生认为父亲总是比儿子懂得多。故选 A。

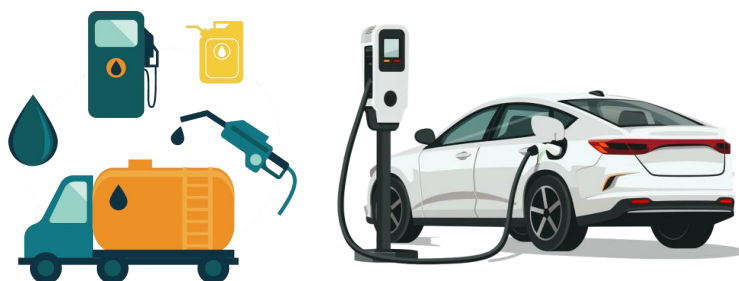

8. 句意：迈克没有回答，反而问道：“谁发明了电灯？”instead 反而，代替；carefully 仔细地；quickly 快速地；brightly 明亮地。根据“Mike didn't answer and asked…”可知，此处迈克没有回答父亲的问题，反而提出了自己的问题，应用“instead”，符合语境。故选 A。

9. 句意：迈克没有回答，反而问道：“谁发明了电灯？”Who 谁；Where 哪里；When 何时；What 什么。根据下文答语“Thomas Edison.”可知，此处是询问谁发明了电灯，应用 who 作特殊疑问词。故选 A。

10. 句意：“那么，为什么他的父亲没有发明电灯呢？”teacher 老师；mother 母亲；son 儿子；father 父亲。根据上文“Thomas Edison”可知，托马斯·爱迪生发明了电灯，所以迈克用“爱迪生的父亲为什么没发明电灯”来反驳他父亲的看法（父亲总是比儿子懂得多）。故选 D。

Petrol cars and electric cars

Part 1: Think and Compare

What are the differences between petrol cars and electric cars? (使用比较级造句)

Part 2: Read and Explore

Are electric cars (电车) good for the Earth? Many of us would probably say yes. But Robert Sansone knows the answer isn't that simple. Sansone is called a natural-born engineer. It is not surprising if you know the 17-year-old has completed nearly 60 engineering projects.

A couple of years ago, Sansone watched a video about the advantages and disadvantages of electric cars. The video explained how the motors (发动机) of these cars are made. Most of them use rare-earth metals (稀土金属). These materials are very expensive. Even worse, they are often collected in ways that are harmful to the Earth. “Must we use these metals? Is there a more environmentally-friendly way?” Sansone thought. He had heard of the synchronous reluctance motor (同步电动机) before. But its performance should be improved.

Over the following year, Sansone put one design after another to the test. Things didn't go well at first. He failed fourteen times before coming up with a working model. The model is about 40% more powerful than a traditional one. And it doesn't use rare-earth metals. These efforts have helped Sansone win a big award. He took part in this year's Regeneron International Science and Engineering Fair (大奖赛) with his motor. It's the world's largest pre-college science competition. He stood out from more than 1,800 competitors to win first prize.

Sansone, however, isn't yet done with his invention because it is far from perfect. It is difficult to make. This means it's hard to become widely used. So Sansone has continued to improve and test his motor. Hopefully Sansone's design will completely change the electric car industry one day.

Part 2: Skills Challenge**Task 1: Critical Thinking** (根据文章内容回答下列问题)

1. What are the disadvantages of electric cars?

2. Why isn't Sansone done with his invention yet?

3. What do you think of Sansone?

Task 2: Creative Project

假设你是未来汽车设计师，要创造一辆“理想汽车”(Ideal Car for Future)，需包含：
你设计时所考虑的因素

1 个创新点子（如：汽车可以变化适应不同的路面情况）

用英语简单说明。

I am a car designer and I will introduce my ideal car for future. My car _____
and _____. Also, it _____.

【答案】

Part 1

1. Electric cars are greener than petrol cars.
2. Petrol cars can usually travel farther distances.

Part 2

Task 1

1. The motors of these cars are made by using rare-earth metals. These materials are very expensive. Even worse, they are often collected in ways that are harmful to the Earth.
2. Because it is far from perfect. It is difficult to make. This means it's hard to become widely used. So Sansone has continued to improve and test his motor.
3. He is smart, creative and always pursues excellence.

Task 2

I am a car designer and I will introduce my ideal car for future. My car is environmentally-friendly and it can travel farther distances than common cars. Also, it is suitable for different conditions with the help of AI analysis. So you can go wherever you want with it. Besides, the price of the car is as low as 200,000 yuan.
