

基础过关练

一、根据音标写出单词

1. Visual memory is the _____ /ə'biləti/ to remember pictures, shapes, and so on
2. When she finishes, _____ /rɪ'pi:t/ the numbers after her.
3. Scientists think that list B is harder because the words in list B sound _____ /'sɪmələ(r)/.
4. After a long holiday, it's important to get _____ /'mentəli/ ready for school.
5. I love all fruits, _____ /ɪ'speʃəli/ apples and bananas.

二、根据首字母完成单词

1. You can add an _____ (洋葱) to your salad. It tastes a little spicy but is good for health.
2. Look! An _____ (蚂蚁) carrying a small piece of crumb.
3. Please read the sentence again and think about its _____ (上下文).
4. The teacher showed us an i _____ of the Great Wall in class. It looked very grand.
5. I have a happy m _____ of my 12th birthday—my family bought me a big cake.
6. We will have an English t _____ tomorrow. Let's review the new words together.
7. Too much screen time may a _____ your eyesight. You should rest every 30 minutes.
8. To learn English well, you need to r _____ new sentences every day.
9. My new shoes are s _____ to yours. They are both white and blue.
10. Try to be a _____ in PE class. Playing sports with classmates is fun!

三、补全对话

Student 1: Hi, I feel really upset these days. I always forget English words quickly.

Student 2: Oh, that's not a good thing, but forgetting is totally normal! 1. _____.

Student 1: Really? Then what methods can I use? Could you tell me?

Student 2: _____. For example, you can take notes often, and do some brain training.

Student 1: Taking notes? 3. _____?

Student 2: When you take notes, you write down what you've learned. Then you can review it regularly.

Repeat this again and again, and you'll remember the words well. As the saying goes, "A good memory is not as good as a bad pen. "

Student 1: That makes sense! 4. _____?

Student 2: Of course. Brain training can help improve your memory ability.

Student 1: How do I do brain training?

Student 2: It's easy. You can play word guessing games, for example. Also, eating healthy food and doing exercise regularly are good ways to improve your memory.

Student 1: Thank you so much for your help! 5. _____.

Student 2: You're welcome! I believe you'll get better soon.

- A. Sure! There are a few good ways.
- B. Can you introduce other memory methods too
- C. I'll try my best to do these things and improve my memory
- D. What are the benefits of that?
- E. You can practice more to improve your memory.

四、听选信息

听选信息 1

1. When should the girl first review new words?

(She should review them in two days. / She should review them right after learning. / She should review them after a week.)

2. What can the girl do if she gets the word wrong?

(She can use a new flash card. / She can write it ten times. / She can review it again.)

听选信息 2

3. Where was Emma yesterday afternoon?

(She was in the library. / She was in the club room. / She was in her kitchen.)

4. What's the key to the method?

(It's writing your own storybook. / It's using funny pictures. / It's drawing actual pictures of your bedroom.)

听选信息 3

5. What is the girl's problem?

(She often stays up watching TV. / She has a memory problem. / She can never find her books.)

6. How will she deal with the problem tonight?

(She will go to bed earlier. / She will try some new food. / She will organize her books again.)

A 短文填词

There are several great 1. m_____ to remember English words.

Firstly, keeping a notebook is very helpful. You can write down new words, their meanings, and example sentences in the notebook. Then, set aside time each day to review what you've written. This 2. r_____ review helps reinforce (加强) your memory of the words.

Secondly, learning words in 3. c_____ is essential. Instead of just 4. m_____ a word alone, try to understand how it's used in a sentence, a story, or a conversation. For example, when you come across the word "benefit", seeing it in "We can benefit a lot from reading books" helps you grasp its meaning and usage more 5. c_____.

Thirdly, making a word web works well. Choose a core word and then write down related words around it. If your core word is "happy", you can add words like "joyful", "glad", "delighted", and also antonyms like "sad" or "unhappy". This way, you not only remember the target word but also expand your vocabulary by 6. c_____ it to other words.

B 语法填空

Most adults find it hard to remember the things that happened while they were children. Now scientists have found exactly when these memories ____1____ (appear).

A new study has found that most three-year-old children can remember a lot of what happened to them a year ____2____ (early), and these memories are still clear while they are 5 and 6, but by the time they are over 7, these memories become weak ____3____ (quick).

Most children by the age of 8 or 9 can only remember 35% of their experiences from under the age of 3 according to the new studies.

The scientists say this is ____4____ at around this age the way we form memories begins to change. They say that before the age of 7 children do not have a sense of time and place in their memories. In older children, however, the early things they can remember become more adult-like ____5____ the way they are formed. Children also have a far faster speed of ____6____ (forget) than adults. The discoveries also help to explain ____7____ children can often have clear memories of what they have done, but then forget them just several years later.

The children were organized to the laboratory for the first time at the age of 3 and discussed 6 impressed (印象深刻的) things from their past, such ____8____ the first relaxing trip with your family, the first accident you met with, and the first day of school. The children then returned for a second period between the ____9____ (age) of 5 and 9 to discuss the same things. The scientists found that between the ages of 5 and 7, the amount (量) of memories that the children could remember ____10____ (remain) between 63%—72%. However, between the ages of 8 to 9, the amount of memories that the children could remember fell to between 35%—36%.

拓展培优练

八、语法选择

Most people hope to have a memory which helps them succeed in study, work and life. Can memory be improved? Luckily, ____1____ studies in the past 50 years have already given us a clear answer.

A healthy lifestyle keeps your brain young and memory ____2____. First of all, it is necessary ____3____ a healthy diet. Eating more food rich in B vitamins and Vitamin E, such as vegetables and lean meat, ____4____ you have a better memory. Second, doing exercise can keep your brain alive, too. Proper exercise provides much needed oxygen for the brain. Running, riding a bike, swimming and even walking two or three times a week are helpful. Third, ____5____ enough sleep is important. Only when your brain gets a good rest, can it work well. The healthier your lifestyle is, ____6____ your memory will become, but do not expect a sudden change—it takes a long time to make a ____7____.

Memory skills help you remember things better. The following three are the most widely used. Chunking is

_____ 8 _____ way of remembering a piece of information by _____ 9 _____ it into smaller ones. For example, _____ 10 _____ a ten—digit telephone number 2127983630, you can divide the digits into three groups: first 212, then 798, and lastly 3630. This method is much _____ 11 _____. Organization means organizing information into groups of the same kind. For example, trees, grass and flowers are plants; tigers, pandas, horses and cows are animals. Imagery is remembering newly learnt information by using your imagination and connecting it with something that you are familiar with.

However, memory skills will hardly work _____ 12 _____ you don't understand the information. What's more, only a regular (有规律的) review can make the memory _____ 13 _____ long. That is why students are always advised to go over what they have learnt after one day and then after three days, and then use it as _____ 14 _____ as possible.

Human brains are like muscles that need nutrients and exercise to become stronger. If you make a few lifestyle changes and try some memory skills, you _____ 15 _____ certainly improve your memory.

九、完形填空

“Time’s up!” Mr. Crane started collecting (收) the test paper. Andy felt his face get 1 and he set his pencil down anxiously (焦急地). It wasn’t the first time he handed in a blank (空白的). 2 No matter how hard he studied, nothing seemed to stay in his brain (大脑) for long.

Later that day, the paper went back to them. Everybody did fine except (除了) Andy. So after school, Andy was the only one standing in Mr. Crane’s office. But Mr. Crane wasn’t in a hurry to let Andy take the exam again right away. He 3 the back wall and said, “Could you help me tidy up a bit first?” “Sure,” Andy said, as he walked to the back of the room. On the wall hung a 4. And he found some magnets (磁铁) on the floor, each with the name of a state (州) on it.

Without putting the magnets into a box, Andy stepped forward and 5 them up. “There,” Andy said and stuck the New Jersey magnet into place. “Utah was the washing machine! Michigan is…” The memory tricks (记忆窍门) seemed to appear in his mind suddenly when he was moving the pieces around. Soon, Andy placed all magnets on the map in order and it was the first time that he felt so 6. “It is a good way to practise, right? How about coming here and trying it again tomorrow” Mr. Crane got up from his seat and said. The next day after school, Andy stopped by Mr. Crane’s 7 again. When he looked at the map, he felt more confident (自信的) and 8 the task in less time. Then, Andy said, “I guess I’ll see you tomorrow for the retake.” “How about right now? You look 9 to me,” Mr. Crane suggested: Feeling a little worried, Andy decided to have a try. Ten minutes later, he was more than glad to see an “88” on the paper.

Now, he had found his own 10 to study. He was no longer afraid of taking memory tests.

十、阅读理解

A

Language students often think they have memory problems. They worry because they can't remember words. In fact, the problem usually isn't with their memory. The problem is with how they study.

To remember words better, you need to understand how memory works. There are two kinds of memory: short-term and long-term. When you see, hear, or read something, it goes first into short-term memory. But short-term memory lasts for only a few seconds. You will only remember something longer if it goes into long-term memory. **Your long-term memory is like a very big library with many, many books. And like a library, it's organized** (有条理的). When you put away a book-or memory-you can't just leave it anywhere. You have to choose a place where you can find it again.

How can you do this with vocabulary? The answer is to work with the word and think about the word in new ways. You can do this by writing new sentences that include it. Even better, you can invent a little story about the word, with people or places that you know. Another way is to make picture in your mind with the word. For example, if the word is height, you can think of the tallest person you know and try to guess his or her height. All of these activities are good ways to think about words. They make the meaning of words stronger in your long-term memory. And they give a way to find a word when you need it.

1. In the writer's opinion, students can't remember words because _____.
A. they are too worried
B. they don't like to study
C. they have memory problems
D. they don't use a proper way
2. Which is TRUE about memory according to the passage?
A. Short-term memory is seldom used.
B. What we see goes into long-term memory first.
C. We will never forget a word if it goes into long-term memory.
D. We will forget a word soon if it goes into short-term memory.
3. The underlined part in Paragraph 2 means long-term memory _____.
A. works like a well-organized library
B. keeps many books like a large library
C. provides any book you want
D. leaves memory anywhere
4. Which is one example of "thinking about the word in new ways" in Paragraph 3?
A. Talking with people that you know.
B. Listening to some familiar stories.
C. Making sentences with the word.
D. Drawing pictures of the word on paper.
5. This passage mainly tells us about _____.
A. how to improve ways to remember words
B. how to make the meaning of words stronger

C. short-term and long-term memory

D. language students' problems in study

B

Many of us learn how to ride a bicycle at a young age. As we grow older, we may stop riding—most of us go to school by bus or by subway. But whenever we get on a bicycle, it's like we've never stopped biking. This is strange. In many other cases, our memories let us down. We often find it hard to remember the name of a person or a place, don't we? So why can we still ride a bicycle after we stopped riding a long time ago?

There are many types of memories. Memories of experiences (e. g. , our first day at school) and of factual knowledge (e.g., the capital of France) are declarative memories. These memories can be communicated to others. Skills such as playing an instrument or riding a bike are procedural memories. These memories are responsible for our performance.

Scientists have done many experiments on different memory types. Perhaps the most famous of them was carried out on Henry Gustav Molaison, an epileptic (癫痫患者). In an operation in the 1950s, part of his brain was taken away. After that, the man suffered less from epilepsy. But there was a new problem! Molaison's memory system went wrong. Through tests, scientists found he could learn new skills (slowly, though). However, he could never remember having been trained to learn a new skill. In other words, Molaison could develop new procedural, but not declarative, memories.

Scientists have concluded that even with serious brain injuries, procedural memories last much longer. However, they haven't yet found out why. Some say procedural memories are more lasting because they are stored in the brain's center.

Now, "It is just like riding a bicycle" has been used as an idiom (习语) in our daily life.

1. In the first paragraph, the writer leads into the topic by _____.

A. listing numbers

B. giving examples

C. describing scenes

D. explaining reasons

2. Which of the following is about a procedural memory?

A. The climate of Asia.

B. A birthday party with friends.

C. A trip to the USA.

D. Swimming.

3. What might be Henry Gustav Molaison's new problem after the operation in the 1950s?

A. He couldn't remember anything.

B. He couldn't learn a new skill.

C. He couldn't remember factual knowledge.

D. He suffered more from epilepsy.

4. The idiom “It is just like riding a bicycle” probably means “_____.”
- A. Once learned, it is never forgotten B. It’s never too late to learn
- C. You should learn with all your heart D. People can learn from their mistakes

基础过关练

一、根据音标写出单词

1. Visual memory is the _____ /ə'biləti/ to remember pictures, shapes, and so on

听选信息 1

1. When should the girl first review new words?

(She should review them in two days. / She should review them right after learning. / She should review them after a week.)

2. What can the girl do if she gets the word wrong?

(She can use a new flash card. / She can write it ten times. / She can review it again.)

听选信息 2

3. Where was Emma yesterday afternoon?

(She was in the library. / She was in the club room. / She was in her kitchen.)

4. What's the key to the method?

(It's writing your own storybook. / It's using funny pictures. / It's drawing actual pictures of your bedroom.)

听选信息 3

5. What is the girl's problem?

(She often stays up watching TV. / She has a memory problem. / She can never find her books.)

6. How will she deal with the problem tonight?

(She will go to bed earlier. / She will try some new food. / She will organize her books again.)

听选信息 1

W: I find it hard to remember English words. What can I do?

M: You can review words on Day 1, 2, 4, 7 ...

听力

W: Why these days?

M: Our brain forgets the fastest in the first day!

W: How can I review?

M: Use flash cards. Write the word on one side, the meaning on the other. When you see the word, try to tell its meaning.

W: What if I get it wrong?

M: Check the correct answer and try again. It's better than writing the word ten times.

【答案】1. She should review the new words right after learning. /Right after learning. 2. She can review it again. /

She can review it again if she gets the word wrong. /Review it again.

听选信息 2

M: Hi Emma, you missed the club meeting yesterday afternoon. Where were you?

W: I went to an interesting lecture at the library. We learnt a trick called the "Memory Palace". It helps to remember anything!

M: Memory ...Palace? Sounds strange! How does it work?

W: It's like turning your house into a storybook. First, pick a room, like your kitchen or bedroom.

M: OK, how does that help with memory?

W: You imagine funny things in those rooms, and that's the key. Want to remember "milk"? Picture a milk shower!

M: Wait, won't I get confused with those funny pictures?

W: Actually, no. Your brain remembers funny things better.

【答案】3. She was in the library. /In the library. 4. It's using funny pictures. /Using funny pictures.

听选信息 3

W: Dad, I'm having some problems these days.

M: What's troubling you, Mary?

W: I always forget things, my books, my pens and so on.

M: Hmm, let's think about this: When do you go to bed recently?

W: Well, pretty late, usually after 11 p. m.

M: So that's your answer. You've been staying up too late. Not getting enough sleep makes it harder to focus and remember things.

W: Really? So my bad sleep has led to my poor memory?

M: Yes, our brain organizes memories when we sleep. Without enough rest, it's like a library with books all over the place!

W: No wonder I can't find my books sometimes. Is there anything else that helps improve memory?

M: The right food also helps, like fish, eggs and nuts. They give your brain energy.

W: Hmm, I'll try eating those later. And yeah, I definitely need to sleep earlier tonight.

M: That's a smart plan! I'm sure it'll help.

【答案】5. She has a memory problem. 6. She will go to bed earlier.

五、回答问题

7. What kind of competition did Sarah win?

8. How many full names did Sarah remember?

9. Where did Sarah's success come from?

10. What did Sarah learn from others?

听力原文及答案

Everyone says Sarah is talented in remembering things. A few days ago, she won first place in a memory competition. During the event, she did something really amazing: she successfully remembered the full names of 110 people after seeing their photos only once. After that, many people asked her about the secret to her memory. Sarah replied that she didn't have any special talent. Her success came from hard work. She made sure to eat and sleep well every day. That has been good for her brain and memory. She also learnt useful memory techniques from others. Sarah said that with practice and good methods, anyone could improve their memory.

【参考答案】7. She won a memory competition. / A memory competition.

8. She remembered 110 full names. / 110 9. Her success came from hard work. / Hard work 10. She learnt useful memory techniques from them. / Useful memory techniques.

How Ben Improved Memory

Ben is my best friend. He used to have a very bad memory. He often forgot his homework, his sports things and his family's birthdays. He felt sorry about it.

One day, he asked someone for advice. They told him to write things down in a notebook. Ben decided to try. He carefully wrote down daily tasks like "Chinese homework" and "Basketball practice" in his notebook. He also recorded important dates, such as birthdays and phone numbers. Each day, he checked his notes to see what he needed to do.

After just one week, Ben didn't forget anything! His family and I were all surprised. He smiled and said, "My memory is bad, but my pen isn't!"

【参考答案】

Ben used to have a very bad memory. He often forgot his homework, his sports things and his family's birthdays. He felt sorry about it. One day, he asked someone for advice. They told him to write things down in a notebook. Ben decided to try. He carefully wrote down daily tasks in his notebook. He also recorded important dates. The scientists found that between the ages of 5 and 7, the amount (量) of memories that the children could remember ____10____ (remain) between 63%—72%. However, between the ages of 8 to 9, the amount of memories that the children could remember fell to between 35%—36%.

【答案】1. disappeared 2. earlier 3. quickly 4. because 5. in 6. forgetting 7. why
8. as 9. ages 10. remained

八、语法选择

Most people hope to have a memory which helps them succeed in study, work and life. Can memory be improved? Luckily, ____1____ studies in the past 50 years have already given us a clear answer.

A healthy lifestyle keeps your brain young and memory ____2____. First of all, it is necessary ____3____ a healthy diet. Eating more food rich in B vitamins and Vitamin E, such as vegetables and

lean meat, ____4____ you have a better memory. Second, doing exercise can keep your brain alive, too. Proper exercise provides much needed oxygen for the brain. Running, riding a bike, swimming and even walking two or three times a week are helpful. Third, ____5____ enough sleep is important. Only when your brain gets a good rest, can it work well. The healthier your lifestyle is, ____6____ your memory will become, but do not expect a sudden change—it takes a long time to make a ____7____.

Memory skills help you remember things better. The following three are the most widely used. Chunking is

____8____ way of remembering a piece of information by ____9____ it into smaller ones. For example, ____10____ a ten—digit telephone number 2127983630, you can divide the digits into three groups: first 212, then 798, and lastly 3630. This method is much ____11____. Organization means organizing information into groups of the same kind. For example, trees, grass and flowers are plants; tigers, pandas, horses and cows are animals. Imagery is remembering newly learnt information by using your imagination and connecting it with something that you are familiar with.

However, memory skills will hardly work ____12____ you don't understand the information. What's more, only a regular (有规律的) review can make the memory ____13____ long. That is why students are always advised to go over what they have learnt after one day and then after three days, and then use it as ____14____ as possible.

Human brains are like muscles that need nutrients and exercise to become stronger. If you make a few lifestyle changes and try some memory skills, you ____15____ certainly improve your memory.

- | | | | |
|--------------------|----------------|-----------------|-----------------|
| 1. A. hundred of | B. hundreds of | C. hundreds | D. hundred |
| 2. A. sharply | B. sharper | C. sharp | D. more sharply |
| 3. A. to have | B. having | C. have | D. had |
| 4. A. helped | B. helping | C. to help | D. helps |
| 5. A. gets | B. getting | C. got | D. gotten |
| 6. A. better | B. the better | C. the best | D. best |
| 7. A. difference | B. different | C. differences | D. differently |
| 8. A. the | B. an | C. \ | D. a |
| 9. A. to cut | B. cut | C. cutting | D. cuts |
| 10. A. to memorize | B. memorize | C. memorizing | D. memorizes |
| 11. A. help | B. helpful | C. more helpful | D. helpless |
| 12. A. if | B. because | C. although | D. until |
| 13. A. last | B. to last | C. lasting | D. lasted |

14. A. regular B. more regular C. regularly D. more regularly
15. A. must B. need C. should D. can

【答案】BCADB BAACA CAACD

【解析】本文介绍提高记忆的方法。

1. B 考查数词用法。句意：数以百计的研究···hundreds of 是正确的表述。答案选 B
2. C 考查形容词作宾语补语的用法。句意：健康的生活方式能让你的大脑保持年轻，记忆敏锐。Keep+宾语+形容词。这里形容词作宾语补语，补充说明宾语。没有比较的不用比较级。答案选 C
3. A 考查不定式用法。这里 it 是形式主语，用“不定式”作真正主语。答案选 A
4. D 考查动词时态用法。句意：多吃富含 B 族维生素和维生素 E 的食物，如蔬菜和瘦肉，有助于增强记忆力。这里主语是“Eating more food”故用动词三单现的形式。答案选 D
5. B 考查非谓语动词用法。句意：充足的睡眠很重要。动词作主语故用 Ving 形式。答案选 B
6. B 考查句式用法。句意：你的生活方式越健康，你的记忆力就会越好。The +比较级，the+比较级。表示越来越。答案选 B
7. A 考查用固定搭配法。Make a difference 产生影响。答案选 A
8. A 考查冠词用法。句意：分块是一种通过将信息切成小块来记忆信息的方法。这里特指，指分块这种记忆的方法。用定冠词。答案选 A
9. C 考查非谓动词用法。句意：分块是一种通过将信息切成小块来记忆信息的方法。By 介词后面接 Ving 形式。答案选 C
10. A 考查不定式用法。句意：为了记住一个十位数的电话号码 2127983630，您可以将这些数字分成三组：首先是 212，然后是 798，最后是 3630。不定式表示“目的”答案选 A
11. C 考查形容词比较级用法。这里是系表结构，要用形容词，much 修饰比较级。答案选 C
12. A 考查连词用法。句意：然而，如果你不理解这些信息，记忆技能就很难起作用。前后句子表示条件关系。答案选 A
13. A 考查动词用法。make sb do 动词用原形，使。。。做某事。答案选 A
14. C 考查副词及句式用法。句意：然后尽可能经常地使用它。As。。。as 用形容词或副词原级。这里修饰动词用副词。答案选 C
15. D 考查情态动词用法。句意：如果你改变一些生活方式，尝试一些记忆技能，你肯定能够提高你的记忆力。这里用 can 表示“能够”“会”一种能力。答案选 D。

九、完形填空

“Time’s up!” Mr. Crane started collecting (收) the test paper. Andy felt his face get 1 and he set his pencil down anxiously (焦急地). It wasn’t the first time he handed in a blank (空白的). 2 No matter how hard he studied, nothing seemed to stay in his brain (大脑) for long.

Later that day, the paper went back to them. Everybody did fine except (除了) Andy. So after school, Andy was the only one standing in Mr. Crane’s office. But Mr. Crane wasn’t in a hurry to let Andy take the exam again right away. He 3 the back wall and said, “Could you help me tidy up a bit first?” “Sure,” Andy said, as he walked to the back of the room. On the wall hung a 4. And he found some magnets (磁铁) on the floor, each with the name of a state (州) on it.

Without putting the magnets into a box, Andy stepped forward and 5 them up. “There,” Andy said and stuck the New Jersey magnet into place. “Utah was the washing machine! Michigan is…” The memory tricks (记忆窍门) seemed to appear in his mind suddenly when he was moving the pieces around. Soon, Andy placed all magnets on the map in order and it was the first time that he felt so 6. “It is a good way to practise, right? How about coming here and trying it again tomorrow” Mr. Crane got up from his seat and said. The next day after school, Andy stopped by Mr. Crane’s 7 again. When he looked at the map, he felt more confident (自信的) and 8 the task in less time. Then, Andy said, “I guess I’ll see you tomorrow for the retake.” “How about right now? You look 9 to me,” Mr. Crane suggested: Feeling a little worried, Andy decided to have a try. Ten minutes later, he was more than glad to see an “88” on the paper.

Now, he had found his own 10 to study. He was no longer afraid of taking memory tests.

- | | | | |
|------------------|-------------|-------------|---------------|
| 1. A. dirty | B. bright | C. hot | D. fat |
| 2. A. book | B. paper | C. diary | D. menu |
| 3. A. walked by | B. put on | C. took off | D. pointed at |
| 4. A. map | B. light | C. painting | D. photo |
| 5. A. picked | B. took | C. turned | D. got |
| 6. A. tired | B. glad | C. bored | D. worried |
| 7. A. class | B. home | C. office | D. car |
| 8. A. introduced | B. finished | C. taught | D. joined |
| 9. A. interested | B. quiet | C. polite | D. ready |
| 10. A. way | B. dream | C. story | D. job |

【答案】1. C 2. B 3. D 4. A 5. A 6. B 7. C 8. B 9. D 10. A

【知识点】个人经历、记叙文、方法/策略

【导语】本文是一篇记叙文。文章主要讲述了安迪记忆力不好，每次考试都交白卷，克兰先生没有

让他立刻重新考试，而是让他整理墙上挂着的有各州名字的铁磁，在整理的过程中，安迪突然有了记忆窍门，能很快记住各州的位置，最终他找到了适合自己的学习方法，不再害怕记忆测试。

1. 句意：安迪感觉自己的脸变热了，他焦急地放下铅笔。

dirty 脏的；bright 明亮的；hot 热的；fat 胖的。根据“he set his pencil down anxiously”可知，安迪因为焦虑脸变热了。故选 C。

2. 句意：这不是他第一次交白卷了。

book 书；paper 试卷；diary 日记；menu 菜单。根据上文“Mr. Crane started collecting (收) the test paper”可知，此处指交白卷。故选 B。

3. 句意：他指着后墙说：“你能先帮我整理一下吗？”

walked by 走过；put on 穿上；took off 脱下；pointed at 指着。根据“the back wall”可知，此处指指着后墙。故选 D。

4. 句意：墙上挂着一幅地图。

map 地图；light 灯；painting 画；photo 照片。根据下文“Soon, Andy placed all magnets on the map in order”可知，墙上挂着一幅地图。故选 A。

5. 句意：安迪没有把磁铁放进盒子里，而是走上前去把它们捡了起来。

picked 捡起；took 拿走；turned 转动；got 得到。根据“them up”可知，此处指把它们捡了起来，pick up 捡起。故选 A。

6. 句意：很快，安迪把所有的磁铁都按顺序放在了地图上，这是他第一次感到如此高兴。

tired 累的；glad 高兴的；bored 无聊的；worried 担心的。根据上文“The memory tricks (记忆窍门) seemed to appear in his mind suddenly”可知，安迪突然有了记忆窍门，能很快记住各州的位置，所以他感到很高兴。故选 B。

7. 句意：第二天放学后，安迪又来到了克兰先生的办公室。

class 班级；home 家；office 办公室；car 汽车。根据上文“So after school, Andy was the only one standing in Mr. Crane’s office”和“again”可知，此处指安迪又来到了克兰先生的办公室。故选 C。

8. 句意：当他看着地图时，他感到更加自信，并在更短的时间内完成了任务。

introduced 介绍；finished 完成；taught 教；joined 加入。根据“the task in less time”可知，此处指在更短的时间内完成了任务。故选 B。

9. 句意：你现在看起来已经准备好了。

interested 感兴趣的；quiet 安静的；polite 礼貌的；ready 准备好的。根据上文“How about right now?”和下文“Feeling a little worried, Andy decided to have a try”可知，克兰先生认为安迪已经准备好了，可以重新考试了。故选 D。

10. 句意：现在，他已经找到了自己的学习方法。

way 方法; dream 梦想; story 故事; job 工作。根据下文“He was no longer afraid of taking memory tests”可知, 安迪不再害怕记忆测试了, 说明他已经找到了自己的学习方法。故选 A。

十、阅读理解

A

Language students often think they have memory problems. They worry because they can't remember words. In fact, the problem usually isn't with their memory. The problem is with how they study.

To remember words better, you need to understand how memory works. There are two kinds of memory: short-term and long-term. When you see, hear, or read something, it goes first into short-term memory. But short-term memory lasts for only a few seconds. You will only remember something longer if it goes into long-term memory. **Your long-term memory is like a very big library with many, many books. And like a library, it's organized** (有条理的). When you put away a book-or memory-you can't just leave it anywhere. You have to choose a place where you can find it again.

How can you do this with vocabulary? The answer is to work with the word and think about the word in new ways. You can do this by writing new sentences that include it. Even better, you can invent a little story about the word, with people or places that you know. Another way is to make picture in your mind with the word. For example, if the word is height, you can think of the tallest person you know and try to guess his or her height. All of these activities are good ways to think about words. They make the meaning of words stronger in your long-term memory. And they give a way to find a word when you need it.

- In the writer's opinion, students can't remember words because _____.
 A. they are too worried
 B. they don't like to study
 C. they have memory problems
 D. they don't use a proper way
- Which is TRUE about memory according to the passage?
 A. Short-term memory is seldom used.
 B. What we see goes into long-term memory first.
 C. We will never forget a word if it goes into long-term memory.
 D. We will forget a word soon if it goes into short-term memory.
- The underlined part in Paragraph 2 means long-term memory _____.
 A. works like a well-organized library
 B. keeps many books like a large library
 C. provides any book you want
 D. leaves memory anywhere
- Which is one example of “thinking about the word in new ways” in Paragraph 3?

- A. Talking with people that you know. B. Listening to some familiar stories.
C. Making sentences with the word. D. Drawing pictures of the word on paper.
5. This passage mainly tells us about _____.
A. how to improve ways to remember words B. how to make the meaning of words stronger
C. short-term and long-term memory D. language students' problems in study

【答案】DDACA

【解析】本文是一篇说明文。主要通过记忆的工作原理告诉我们如何提高记忆力，如何高效记单词。

1. 细节理解题。根据“In fact, the problem usually isn't with their memory. The problem is with how they study.”可知，问题是他们没有用正确的方法去学习。故选 D。
2. 细节理解题。根据“But short-term memory lasts for only a few seconds.”可知，短期记忆只能持续几秒钟，因此单词很容易遗忘。故选 D。
3. 词句猜测题。根据“Your long-term memory is like a very big library with many, many books. And like a library, it's organized.”可知，长时记忆就像图书馆一样，是非常有条理的。故选 A。
4. 推理判断题。根据“You can do this by writing new sentences that include it.”可知，你可以通过写包含它的新句子来记忆。故选 C。
5. 主旨大意题。根据全文内容可知，主要讲述了如何提高记忆力。故选 A。

B

Many of us learn how to ride a bicycle at a young age. As we grow older, we may stop riding—most of us go to school by bus or by subway. But whenever we get on a bicycle, it's like we've never stopped biking. This is strange. In many other cases, our memories let us down. We often find it hard to remember the name of a person or a place, don't we? So why can we still ride a bicycle after we stopped riding a long time ago?

There are many types of memories. Memories of experiences (e. g. , our first day at school) and of factual knowledge (e.g., the capital of France) are declarative memories. These memories can be communicated to others. Skills such as playing an instrument or riding a bike are procedural memories. These memories are responsible for our performance.

Scientists have done many experiments on different memory types. Perhaps the most famous of them was carried out on Henry Gustav Molaison, an epileptic (癫痫患者). In an operation in the 1950s, part of his brain was taken away. After that, the man suffered less from epilepsy. But there was a new problem! Molaison's memory system went wrong. Through tests, scientists found he could learn new skills (slowly, though). However, he could never remember having been trained to learn a new skill. In other words, Molaison could develop new procedural, but not declarative, memories.

Scientists have concluded that even with serious brain injuries, procedural memories last much longer. However, they haven't yet found out why. Some say procedural memories are more lasting because they are stored in the brain's center.

Now, “It is just like riding a bicycle” has been used as an idiom (习语) in our daily life.

1. In the first paragraph, the writer leads into the topic by _____.
A. listing numbers
B. giving examples
C. describing scenes
D. explaining reasons
2. Which of the following is about a procedural memory?
A. The climate of Asia.
B. A birthday party with friends.
C. A trip to the USA.
D. Swimming.
3. What might be Henry Gustav Molaison's new problem after the operation in the 1950s?
A. He couldn't remember anything.
B. He couldn't learn a new skill.
C. He couldn't remember factual knowledge.
D. He suffered more from epilepsy.
4. The idiom "It is just like riding a bicycle" probably means "_____. "
A. Once learned, it is never forgotten
B. It's never too late to learn
C. You should learn with all your heart
D. People can learn from their mistakes

【答案】 1. B 2. D 3. C 4. A

【知识点】科普知识、说明文

【导语】 本文主要讲述了不同类型的记忆及其在大脑中的存储方式。

1. 推理判断题。根据“Many of us learn how to ride a bicycle at a young age. As we grow older, we may stop riding—most of us go to school by bus or by subway. But whenever we get on a bicycle, it’s like we’ve never stopped biking…”可知第一段以“骑自行车”为例，引出本文主题，故选 B。
2. 细节理解题。根据“Skills such as playing an instrument or riding a bike are procedural memories”可知程序性记忆与技能相关，游泳是一种技能，属于程序性记忆。故选 D。
3. 细节理解题。根据“Memories of experiences (e. g. , our first day at school) and of factual knowledge (e. g. , the capital of France) are declarative memories.”以及“However, he could never remember having been trained to learn a new skill. In other words, Molaison could develop new procedural, but not declarative, memories.”以及陈述性记忆包括 factual knowledge 可知术后他无法形成新的陈述性记忆，即记不住事实知识。故选 C。
4. 词句猜测题。根据“It is just like riding a bicycle”可知，这句话是与第一段的举例骑自行车的事实

相呼应，在第一段中提到只要学会了自行车，哪怕是很久不骑，但每当骑上自行车，就好像从未停止过骑车，也就是说“一旦学会，就永远不会忘记”，故选 A。
