Rabbits make the best pets

In my opinion, rabbits make the best pets.

Firstly, rabbits are extremely lovely with soft fur. Holding them in your arms feels warm and pleasant, which can always cheer you up when you're tired. Secondly, they are very clean and gentle. They never bark loudly or hurt people, making them friendly to everyone around. Thirdly, rabbits are clever. They use body language to show happiness, sadness or other feelings. Finally, rabbits are small, so they don't take up much space at home. Their basic needs like food and a cage aren't expensive either.

For these reasons, I believe that rabbits are the best choice for a pet.

【范文赏析】

Dear Andy,

With the improvement of our living standard, more and more people like to raise dogs as their pets in the living areas or settlements. Recently, according to this, our class have held a discussion on whether people should raise these dogs. Different opinions are as follows:

Those who are for it think that people should have the right to raise dogs as their pets. First, dogs can not only help their masters watch out houses ,but also bring them happiness and pleasure. Second, by keeping dogs, the only child and the old will not feel lonely. Third, we can learn to care for the lives.

However, quite a large number of the people think dogs should not be raised as pets in the living areas. For one reason, they make so much noise, especially at night, which have a bad effect on people's rest.

Second, they are dirty and they often make the environment dirty. At last, sometimes, some dog may even bite people. People are often feeling frightened whenever they meet them.

In my opinion, I am strongly against raising dogs in the public places such as living areas and settlements. For the sake of people's safety and living environment , raising dogs as pets should be forbidden.
