

There is a big difference between knowing a country from social media and experiencing it in person. This is what students from the US and China discovered during an eight-day exchange journey.

From March 24 to 31, a group of 15 students from the US went on an educational and cultural \_\_\_\_\_1\_\_\_\_\_ in China.

For 15-year-old Ian Sierra, a 10th grader, this was his first trip abroad. He felt nervous before leaving home. “I was \_\_\_\_\_2\_\_\_\_\_ about everything—new people, strange food, and how to adapt \_\_\_\_\_3\_\_\_\_\_ surroundings(环境),” he said. But things went better than he expected. In Beijing, he tried douzhi, a fermented bean juice. It’s a \_\_\_\_\_4\_\_\_\_\_ even for locals. Surprisingly, he finished three bowls!

Ian loved the homestay at Beijing No. 4 High School International Campus. At first, he worried he might feel \_\_\_\_\_5\_\_\_\_\_, but Chinese students were very friendly. “After class, I played table tennis. Chinese students are so good—they surprised me!” he said. “In the US, we play sports for fun, but here they take it seriously.”

The learning was two-sided. Li Weiyou, a 15-year-old student at the school, was Michael Sosa’s homestay partner. Li used to think US students were only \_\_\_\_\_6\_\_\_\_\_ and didn’t care about study. But Michael \_\_\_\_\_7\_\_\_\_\_ him—he did well in both study and life. “He taught me how to \_\_\_\_\_8\_\_\_\_\_ difficult situations, and I taught him Chinese,” Li said.

With technology and media developing quickly, teenagers can get information about other countries online \_\_\_\_\_9\_\_\_\_\_. But online stories are just a small part of real cultural exchange. “If I hadn’t come, I’d never know how kind Chinese students are,” said Ian.

This trip even changed Ian’s plans. “I used to want to be a math teacher in the US. Now, I hope to teach English in Beijing or Shanghai!” he said.

Through this tour, Chinese and US students learned more about each other and \_\_\_\_\_10\_\_\_\_\_ the beauty of different cultures.

Long long ago, at the end of the Qin Dynasty, there was a big war in China. Two leaders, Liu Bang and Xiang Yu, fought for the country. Han Xin was a good general under Liu Bang. He needed to lead soldiers to beat Wei Wangbao, who \_\_\_\_1\_\_\_\_ Hedong.

Wei Wangbao knew the importance of a ferry (渡口) named Puban. He sent many soldiers there to \_\_\_\_2\_\_\_\_ it. He also took all the boats away. He thought, "Han Xin must attack Puban. If I hold Puban, I will win!"

When Han Xin arrived at the west bank of the Yellow River, he saw Wei Wangbao's \_\_\_\_3\_\_\_\_. He didn't want to fight hard at Puban, so he had an idea—"deceive the east and attack the west".

First, Han Xin told his soldiers to build a big camp opposite Puban. Every day, the soldiers cut trees and made boats. When Wei Wangbao saw this, he thought he was right, \_\_\_\_4\_\_\_\_, he sent more men to Puban.

But at the same time, Han Xin chose some brave soldiers. He told them to go north along the river \_\_\_\_5\_\_\_\_. They found a quiet ferry called Xiayang. There were few guards there. At night, they crossed the river and \_\_\_\_6\_\_\_\_ Wei's land quietly. Then they made their way to Wei's capital, Anyi.

Wei Wangbao was still waiting for Han Xin at Puban. Suddenly, someone told him: "Han Xin's soldiers are near Anyi!" He was \_\_\_\_7\_\_\_\_. He had to send his soldiers from Puban back to save Anyi. But those soldiers were tired. On the way back, Han Xin's brave men attacked them. They \_\_\_\_8\_\_\_\_ the tired soldiers easily.

When Puban had few guards left, Han Xin led his main army to attack Puban. The guards there couldn't stop them. Han Xin crossed the river and met his brave men near Anyi. Finally, they \_\_\_\_9\_\_\_\_ Anyi and captured Wei Wangbao.

Han Xin succeeded in winning the \_\_\_\_10\_\_\_\_. His "deceive the east and attack the west" became a famous military (军事的) trick in Chinese history.

Do you sometimes forget things? Everybody knows that it is important to have a good memory. Here are some good ways about how to remember things for you

First, build a \_\_\_\_\_ 1 \_\_\_\_\_ between what you want to remember and a clear action. For example, you often put down your phone or wallet and then forget where they are. Next time, when you place something in a \_\_\_\_\_ 2 \_\_\_\_\_ spot, say the location aloud. You can say, "I'm putting my wallet on the chair by the door." This small action \_\_\_\_\_ 3 \_\_\_\_\_ the thing to its place in your mind, so you'll find it easily later.

Second, \_\_\_\_\_ 4 \_\_\_\_\_ remembering of what you need to. If you don't pay attention to it, you'll forget it quickly. Sometimes you forget people's names. In fact, \_\_\_\_\_ 5 \_\_\_\_\_ a person's name several times can help you focus on it better.

Third, make time to relax and manage stress. When you're too \_\_\_\_\_ 6 \_\_\_\_\_, your brain can't work well, and it's harder to remember things. After a busy day, try simple activities: listen to soft music, take a short walk, or just sit quietly for 10 minutes. Relaxing your mind helps your memory work better.

Fourth, don't forget about exercise and a healthy diet. Regular exercise, like walking or playing ball games, gets your blood flowing to the brain—it keeps your brain active and helps prevent memory \_\_\_\_\_ 7 \_\_\_\_\_. A good diet helps too: eat more fish, eggs, vegetables, and fruits. These foods give your brain the nutrients(营养) it needs to remain \_\_\_\_\_ 8 \_\_\_\_\_.

Finally, practice \_\_\_\_\_ 9 \_\_\_\_\_ to maintain your memory. Spend 30 minutes each night reviewing what you learned or did that day. You can also write important things down in a \_\_\_\_\_ 10 \_\_\_\_\_. Reading your notes again and again helps you remember them for a long time.

Many people say these ways work well. Try them, and little by little, you'll find it easier to remember things. I believe they can help you a lot!

We went to an animal shelter to adopt(收养) puppy, but in reality, it was the puppy who adopted us. Unless we looked into the cage, small, three-month-old-beagle(小猎兔狗) puppy began wagging(摇摆) her tail. She \_\_\_\_\_ 16 \_\_\_\_\_ to say, “Oh, you’re the family I’ve been looking for!” And for the next fifteen years, Puddin’ (we named her Puddin’ because she was as sweet as a pudding dessert) became part of our \_\_\_\_\_ 17 \_\_\_\_\_.

Pet ownership has always been popular in Western countries. Now, China is also discovering its love for cats and dogs. It now ranks No. 3 in the \_\_\_\_\_ 18 \_\_\_\_\_ for pet ownership. The pet industry(产业), which sells food and toys as well as grooming(刷洗梳毛) and veterinarian(pet doctor) services, is one of the country’s fastest-growing industries.

Pets bring lot of \_\_\_\_\_ 19 \_\_\_\_\_ to your home, but they are also big responsibility. Pets are not toys. You cannot put them away when you are \_\_\_\_\_ 20 \_\_\_\_\_ of playing with them. Dogs, in particular, need to be trained to behave properly and they need exercise. Even in bad \_\_\_\_\_ 21 \_\_\_\_\_, you have to take them for walks or for a run in the park. And, while you are training your dog, your dog is also training you to think about others and \_\_\_\_\_ 22 \_\_\_\_\_ others, not just about yourself.

Puddin’ was my best friend when I was growing up. We sat \_\_\_\_\_ 23 \_\_\_\_\_ on the sofa and watched television. She kept me company(陪伴) when I was doing homework. And when came home, she was always there to \_\_\_\_\_ 24 \_\_\_\_\_ me, leaping up and barking and wagging her tail.

Puddin’ is now \_\_\_\_\_ 25 \_\_\_\_\_, but you can still recognize her in old family photos: She is the one wearing fur.

Silent Honor is an unforgettable TV series that tells the true stories of underground fighters in Taiwan in the 1940s and 1950s. These heroes, such as Wu Shi and Zhu Feng, \_\_\_\_\_ 1 \_\_\_\_\_ their identities and carried out secret tasks to help their motherland. They faced grea\_\_\_\_\_ 2 \_\_\_\_\_ every day, yet they never let go of their beliefs.

The characters in the show are both brave and gentle. Wu Shi, a sharp and calm leader, always made careful plans to \_\_\_\_\_ 3 \_\_\_\_\_ his teammates. It also passes on \_\_\_\_\_ 7 \_\_\_\_\_ energy and helps young people learn about important historical \_\_\_\_\_ 8 \_\_\_\_\_ they might not know much about.

The educational meaning of Silent Honor is profound. It makes us notice that the peaceful life we have today was bought with the blood and lives of heroes, so we should value it \_\_\_\_\_ 9 \_\_\_\_\_. We should learn from these heroes and become responsible, kind people who contribute to society.

This series does more than just entertain—it educates too. It reminds us never to forget the unknown heroes who gave their all for our country.

Chen - Ning Yang, one of the greatest physicists of the 20th century, passed away in Beijing at the age of 103. His life was a wonderful combination of academic excellence and deep love for the \_\_\_\_1\_\_\_\_.

Born in Hefei in 1922, Yang moved to Tsinghua Garden with his family in 1929. He received his early education there and developed a strong \_\_\_\_2\_\_\_\_ in physics. After the war broke out, he traveled a long way to Kunming and entered National Southwestern Associated University. There, he built a good base for his future \_\_\_\_3\_\_\_\_.

In 1945, Yang went to the US as a government-funded student. He earned his PhD at the University of Chicago and later worked at top research institutions. In 1954, he \_\_\_\_4\_\_\_\_ the “Yang - Mills gauge theory” with Robert Mills. This theory became an important part of \_\_\_\_5\_\_\_\_ physics. Five years later, he won the Nobel Prize in Physics with Tsung - Dao Lee for their research on parity non-conservation.

Though he was successful in other countries, Yang always \_\_\_\_6\_\_\_\_ his country. In 1971, he made a very important visit to China. This made many Chinese scholars who lived abroad come back to help the country. He also \_\_\_\_7\_\_\_\_ money to help Chinese scholars study in other countries. Many of them later became important people in China's science field.

In 1999, Yang went back to Tsinghua University to be a \_\_\_\_8\_\_\_\_. He spent all his time helping young people become talents. He even taught basic physics to first - year college students. To help academic research, he gave more than 2,000 books and manuscripts to Tsinghua in 2021.

Yang's \_\_\_\_9\_\_\_\_ went far beyond his scientific achievements. He lived a simple life and often encouraged young people to pursue truth and \_\_\_\_10\_\_\_\_ the country. He will always be remembered as a scientific giant and a loyal son of China.

## My Summer Camp Adventure

Last month, I joined an international robotics summer camp in Beijing. On the first day, I \_\_\_\_\_ 1 \_\_\_\_\_ a number of students from different countries working together on their projects. The \_\_\_\_\_ 2 \_\_\_\_\_ activity at the camp was a robot-building contest, it was the main event that determines who would win. Every team had to make machines that could find their way through a maze(迷宫).

Our team had three Chinese students and two from Australia, and we faced \_\_\_\_\_ 3 \_\_\_\_\_ right from the start. We \_\_\_\_\_ 4 \_\_\_\_\_ each other's skills: Li Wei, who is good at coding, used special \_\_\_\_\_ 5 \_\_\_\_\_ to program the robot's movements, while I focused on putting the machine parts together. One day, our robot kept running into walls. We realized we should \_\_\_\_\_ 6 \_\_\_\_\_ hurrying. Instead, we needed to check each part one by one. This taught us patience and teamwork.

During the competition, I was amazed by the creativity of other teams. Some used solar panels to \_\_\_\_\_ 7 \_\_\_\_\_ their robots, while others added sensors to detect obstacles. Thanks to Li Wei's exact coding. Our robot, named "Explorer," performed well. \_\_\_\_\_ 8 \_\_\_\_\_ we didn't win first place, we learned how to solve problems together.

Personally, this experience was life-changing. I attach great importance to the friendships I made and the skills I got. The camp showed me that new ideas \_\_\_\_\_ 9 \_\_\_\_\_ everyone, no matter where they are from. There's no \_\_\_\_\_ 10 \_\_\_\_\_ this summer will stay with me—it changed how I love science. I can't wait to see what future inventions will come from young minds like ours.

During the Spring and Autumn Period (770–476 BC), two powerful states in ancient China—Wu and Yue—often fought for land and power. In 494 BC, Yue’s king, Gou Jian, led his army against Wu but suffered a terrible defeat. To save his people from further \_\_\_\_\_ 1 \_\_\_\_\_, Gou Jian made a painful choice: he gave in to Wu’s king, Fu Chai, and went to Wu as a \_\_\_\_\_ 2 \_\_\_\_\_.

For three years in Wu, Gou Jian put up with shame. He did lowly jobs like feeding Fu Chai’s horses, cleaning his palace, and even \_\_\_\_\_ 3 \_\_\_\_\_ the king when he was ill. He hid his anger and desire for revenge, acting as if he had completely given up his royal pride. Fu Chai, fooled by his obedience, finally \_\_\_\_\_ 4 \_\_\_\_\_ Gou Jian to return to Yue in 491 BC.

Back in his homeland, Gou Jian was determined to rebuild Yue and take revenge. To never forget his \_\_\_\_\_ 5 \_\_\_\_\_ in Wu, he slept on a pile of rough brushwood instead of a \_\_\_\_\_ 6 \_\_\_\_\_ bed. Every night before eating, he would taste a bitter gall to \_\_\_\_\_ 7 \_\_\_\_\_ himself of his failure. He also worked closely with his people: He helped farmers produce more food, trained soldiers \_\_\_\_\_ 8 \_\_\_\_\_, and lived simply to save resources.

After ten years of hard work, Yue became \_\_\_\_\_ 9 \_\_\_\_\_ enough. In 482 BC, Gou Jian led his army to attack Wu and won. This story later became a famous \_\_\_\_\_ 10 \_\_\_\_\_, teaching people that with strong will, patience, and hard work, one can overcome great hardships and achieve their goals.

I recently watched a touching and funny film called *Nobody*. What moved me the most were the four main characters. They all come from simple backgrounds and hold little importance in the monster world, but they still fight for the 1 and stand up for what is right. This made me think of real life: Even if we are 2, we can still be brave and keep going.

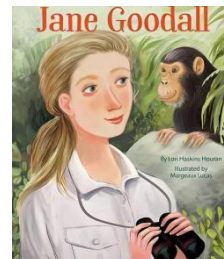

When I think about my own school life, I feel the same way. Sometimes in math class, I get 3 about raising my hand to answer hard math problems, because I worry I'll be wrong. When my team falls behind in a basketball game, my legs feel heavy and I often want to 4. But just like the characters in the movie, we may not be the most noticeable. But our small brave acts—like 5 raising that hand or running one more time in the game—are very 6.

At the end of the movie, just as they smile and are ready to say their names to remember each other, they 7 turn back into their small animal forms one by one. They become quiet and unseen again. 8 the movie never tells us their names, I was deeply moved by their quiet courage and kind heart. I believe the director really wanted to 9 ordinary people in life who show quiet bravery.

Here's to every brave person who dares to start their 10, and to the "us" in this movie who never drop, no matter how hard the road is. Because those small, brave steps can make a big difference.

Jane Goodall, the world-famous primatologist and UN Messenger of Peace, passed away on October 1, 2025, at the age of 91. She died of natural causes in California, US while on a speaking tour \_\_\_\_1\_\_\_\_.

Goodall loved animals deeply even when she was a little kid. At 8, she saved her pocket money little by little to buy the book Tarzan. Later, she also fell in love with Doctor Dolittle—these books made her more and more \_\_\_\_2\_\_\_\_ about wild animals. Her mother \_\_\_\_3\_\_\_\_ this passion instead of dismissing it, which \_\_\_\_4\_\_\_\_ her to dream of studying animals in Africa, a place she finally visited in 1957.

In 1960, Goodall started her important \_\_\_\_5\_\_\_\_ on chimpanzees in Tanzania's Gombe Park. She didn't have formal science training, but she watched chimpanzees very \_\_\_\_6\_\_\_\_ every day. She found that chimpanzees could make tools—they take leaves off small branches to get termites to eat. This finding \_\_\_\_7\_\_\_\_ the long-held belief that only humans used tools.

When Goodall got older, she turned her focus from research to advocating for nature. She set up the Jane Goodall Institute to keep working for nature protection and started the "Roots and Shoots" program. This program helped young people around the world do small things to protect the environment. Even when she was over 80, she traveled more than 300 days a year to \_\_\_\_8\_\_\_\_ messages about protecting the environment to more people.

Her influence still lives on. UN Secretary-General Guterres said she left a great legacy for humans and nature. For many, she is a symbol of \_\_\_\_9\_\_\_\_—proving that passion and persistence can change the world. Her death made people all over the world sad: a museum in India planned an exhibition called "Celebrating Jane" to honor her, and a school in California planted a tree \_\_\_\_10\_\_\_\_ her and her work. Jane Goodall is gone, but her spirit will always encourage people to care for our Earth.

One day a little boy decided to dig a hole behind his house after watching a science program. As he was working, a couple of boys stopped by to watch. “What are you doing?” asked one of them. “I want to dig a deep hole all the way through the 21!” The boy answered 22. The older boys began to laugh, telling him that it was 23 to do it. Then they left.

The little boy kept on digging and digging. Suddenly, a few small colorful stones caught his eye. He 24 them up and put them into a glass jar patiently. Humming a song, he went on digging. The jar was 25 soon. Then he talked to himself calmly and proudly, “Maybe I can’t finish digging all the way, but look at what I have 26 in the process of digging!”

The boy’s goal was too difficult, but it did cause him to 27 working! Not every goal will be achieved. Not every job will end up with success. Not every dream will 28. However, when you can’t achieve your goal, you can say, “Yes, but look at what I’ve found along the way! There are so many wonderful things that have come into my life because I 29 to do something!” It is in the digging that life is lived. It is the unexpected 30 on the journey that really has meaning.

I'm Lisa. I live in year 2095. I'm a student from Nova Middle School and I really love it!

At the school gate, a fingerprint recognition system helps ensure \_\_\_\_\_ 21 \_\_\_\_\_ as only students and school staff can enter.

Every week, we have a pet training programme where students can \_\_\_\_\_ 22 \_\_\_\_\_ their pets. While students are in class, AI-powered trainers teach pets problem-solving skills and even basic communication. Thanks to this, my dog Coco has become more \_\_\_\_\_ 23 \_\_\_\_\_ .

Getting to different classes is easy. We just step onto the teleportation (远距离传送) stand, and within a second, we \_\_\_\_\_ 24 \_\_\_\_\_ at the right classroom! Floating desks can be \_\_\_\_\_ 25 \_\_\_\_\_ around the room, which allows students to rearrange their learning space easily.

As for homework, we complete it on a holographic (全息图的) interactive board, which provides real-time feedback and detailed explanations. We have already replaced pens with the power of our \_\_\_\_\_ 26 \_\_\_\_\_ to control digital ink, making writing faster and easier. This means we don't need to move or say a single word. We just need to be focused and think clearly.

PE classes are great! My favourite part is the underwater racetrack, where we ride small underwater motorcycles. In a health class, we sometimes use wheelchairs. It helps us better understand the great difficulties faced by the \_\_\_\_\_ 27 \_\_\_\_\_ students in class. Field trips are also exciting. Our school bus is \_\_\_\_\_ 28 \_\_\_\_\_ a special kind of strong glass. It runs on clean energy and can \_\_\_\_\_ 29 \_\_\_\_\_ travel on land, underwater, in the air, and even in space. Even a primary school student can operate it without any difficulty. Underwater, it swims like a fish, and in the sky, it flies like a bird.

What do you think of my school? To me, it's not just a school, but a wonderful place that truly \_\_\_\_\_ 30 \_\_\_\_\_ the way of learning.

One day when I was 12, my mother gave me an order. She asked me to walk to the public library and \_\_\_\_\_ 21 \_\_\_\_\_ at least one book for the summer. This was one way for me to solve my problem--inability to read.

In the library, I sat down on the floor and pulled a few books off the shelf. The cover of a book caught my attention. It was a \_\_\_\_\_ 22 \_\_\_\_\_ of a beagle(小猎兔狗). I had recently had a beagle, the first and only animal friend I ever had. But one morning, he was gone, given away to someone who had the space and the money to care for him. I never \_\_\_\_\_ 23 \_\_\_\_\_ my beagle.

The beagle on the cover looked like my dog. I ran my fingers over the picture of the dog on the cover. My \_\_\_\_\_ 24 \_\_\_\_\_ ran across the title, *Bobby, the Beagle with a Plan*. Unknowingly, I had read the title. Without opening the book, I took it out of the library.

Under the shade of a bush. I started to read about Bobby. I read very, very \_\_\_\_\_ 25 \_\_\_\_\_ with difficulty. I got the main idea of the story about a dog. Like mine, he had been away from his family and finally found his way back home. That dog was my dog, and I was the little boy in the book. \_\_\_\_\_ 26 \_\_\_\_\_ the story, my mind continued the final scene of getting together, on and on, until my own lost dog and I were running together in my mind.

My mother's call returned me to the real world. I suddenly \_\_\_\_\_ 27 \_\_\_\_\_ something: I had read a book, and I had loved reading the book. Everyone knew I could not read. But I had read it. Books could be really \_\_\_\_\_ 28 \_\_\_\_\_ and I was going to read them.

I never told my mother about my "miraculous (奇迹般的)" \_\_\_\_\_ 29 \_\_\_\_\_ that summer, but she saw a slow but surprising improvement in my classroom performance during the next year. And years later, she was \_\_\_\_\_ 30 \_\_\_\_\_ that her son had read thousands of books, and wrote his own books, articles, and poetry.

A man kept driving for 3 hours and felt sleepy. Suddenly, he drove off the road into a ditch (沟). Though he wasn't \_\_\_\_ 1 \_\_\_\_, his car was stuck deep in the ditch. So the man walked to a nearby farm to ask for \_\_\_\_ 2 \_\_\_\_\_. "Warwick can get the car out of that ditch," said the farmer, pointing to an old mule (骡子) standing in a field. The man looked at the old mule, thinking that it was \_\_\_\_ 3 \_\_\_\_ for it to do that.

The farmer noticed the \_\_\_\_ 4 \_\_\_\_ on the man's face and repeated, "Yep, old Warwick can do the job. I believe in him." The man thought he had nothing to lose, \_\_\_\_ 5 \_\_\_\_ the two men and the mule then made their way to the ditch. The farmer tied the mule to the car. Then he pulled the rope and shouted, "Pull, Fred! Pull, Jack! Pull, Ted! Pull, Warwick!"

Soon, the mule pulled the car out of the ditch \_\_\_\_ 6 \_\_\_\_\_.

He thanked the farmer and Warwick. But he was still \_\_\_\_ 7 \_\_\_\_ about how Warwick did it. So he asked, "Why did you call out all those \_\_\_\_ 8 \_\_\_\_ before you called Warwick?"

The farmer smiled, saying, "Old Warwick is just about blind. But as long as he believes he's part of a team, he doesn't mind pulling and tries his \_\_\_\_ 9 \_\_\_\_\_."

Just as it is with Warwick, being in a \_\_\_\_ 10 \_\_\_\_\_ always makes us more positive, because we know we are supported all the time.

Giraffe was very proud and often looked down upon (瞧不起) other animals. His friend, Mouse Deer, seldom received any \_\_\_\_1\_\_\_\_ from him. Though Mouse Deer felt unhappy, he never argued and always kept his \_\_\_\_2\_\_\_\_ to himself.

One day, Mouse Deer decided to \_\_\_\_3\_\_\_\_ Giraffe to catch him. Giraffe agreed. When the competition began, Mouse Deer ran quickly along the narrow (狭窄的) road thanks to his \_\_\_\_4\_\_\_\_ size. Giraffe could run faster in open areas. But sometimes he had difficulty \_\_\_\_5\_\_\_\_ Mouse Deer's sharp turns because of his large body. Soon, Mouse Deer ran into a dark cave (洞穴). Giraffe ran right after him confidently.

“Ouch! Help me!” Suddenly, Giraffe fell to the ground and hurt his leg. Mouse Deer quickly turned back and found Giraffe lying in \_\_\_\_6\_\_\_\_ “Don't worry,” said Mouse Deer in a gentle voice. “I'll help you stand. Look, the light is not far. That's our way out.”

By working together, they got out of the cave \_\_\_\_7\_\_\_\_. Mouse Deer used some leaves to treat Giraffe's leg. Giraffe was \_\_\_\_8\_\_\_\_ and asked, “Why did you help me even though I was never kind to you?” Mouse Deer replied, “Because we are friends. That means we should \_\_\_\_9\_\_\_\_ each other. Everyone has their own strengths and weaknesses. No one is perfect.”

Giraffe finally understood. From that day on, he became a more caring friend. And their \_\_\_\_10\_\_\_\_ grew stronger than ever.

Once upon a time, there was a greedy man. He only thought about how to get money. He \_\_\_\_\_16\_\_\_\_\_ the words such as “please” “thank you” and “you are welcome”. These words were nothing but a waste to him. So he spent a lot of time inventing a machine to steal those \_\_\_\_\_17\_\_\_\_\_ words. He was sure no one would notice those words suddenly \_\_\_\_\_18\_\_\_\_\_. When he had stolen these words, he planned to break the words into letters and sell them to make more money.

After he \_\_\_\_\_19\_\_\_\_\_ the machine, when people tried opening their mouths to say kind words, nothing came out. All the words ended up inside the machine. At first, nothing happened. It seemed people didn't need to be kind at all. But soon, people always felt \_\_\_\_\_20\_\_\_\_\_. In a few days, everyone was angry and argued over little things.

The man was very happy with his \_\_\_\_\_21\_\_\_\_\_. But he didn't notice some special girls. They used body language to communicate because they were unable to \_\_\_\_\_22\_\_\_\_\_ or speak. The machine couldn't steal \_\_\_\_\_23\_\_\_\_\_, so these girls continued to be kind and polite. Soon they realized what the man had done. They followed him and saw the big machine breaking words into letters. When the man went to sleep, the girls walked \_\_\_\_\_24\_\_\_\_\_ to the machine and started communication, being kind to each other. The machine couldn't steal anything from their communication and it started to suffer a power overload (超负荷). Suddenly—BOOM! The machine broke!

After that, everyone could say “please” and “thank you” again. Everyone \_\_\_\_\_25\_\_\_\_\_ arguing and became friendly again. This proves that good manners are very useful for keeping people happy together.

On a late afternoon, I was walking home after work as usual when I met an old lady. She was waving her phone at me \_\_\_\_\_ 16 \_\_\_\_\_, speaking in a language I couldn't understand. I quickly realized she was \_\_\_\_\_ 17 \_\_\_\_\_ and didn't know any English.

She showed me a map, but I didn't know how to read it. So, I immediately downloaded a translation app (翻译应用程序). We used it to \_\_\_\_\_ 18 \_\_\_\_\_.

I soon realized she needed to go home, and it was quite far on foot. So, I decided to \_\_\_\_\_ 19 \_\_\_\_\_ her to a bus stop where she could call her daughter to pick her up. As we walked, we tried to communicate with gestures and simple words. Sometimes we made funny misunderstandings, but we still laughed a lot.

When we arrived at \_\_\_\_\_ 20 \_\_\_\_\_, she called her daughter. She looked really \_\_\_\_\_ 21 \_\_\_\_\_. She kept patting my hand and saying something in her language, which I guessed was her \_\_\_\_\_ 22 \_\_\_\_\_. I smiled and told her it was okay.

After a while, her daughter arrived. She was very thankful too and wanted to give me some money as a reward. I politely \_\_\_\_\_ 23 \_\_\_\_\_. I said helping others made me happy, and that was enough. They both smiled at me, and the old lady gave me a warm hug.

Watching their car drive away, I felt a sense of satisfaction. This small act of \_\_\_\_\_ 24 \_\_\_\_\_ really made my day. It's true that when you reach out to \_\_\_\_\_ 25 \_\_\_\_\_ others, you not only bring joy to them but also enrich your own life.

Once upon a time, a wise man was walking from one town to another with a few of his students. As they were tired, they stopped by a lake to rest. The wise man said to one of his students, “I am very 21. Could you please get me some water?”

The student walked to the lake as the wise man requested. Right at that moment several ducks started 22 the lake. They moved so happily that they made waves on the water. As a result, the mud (泥) from the bottom of the river made water dirty. The student was disappointed when he saw this and quickly 23 told the wise man that the water was very dirty and not fit to drink.

After about an hour, the wise man asked the same student to get him some water again. When the student reached the lake, he was very 24. He found that the water in the lake was not dirty anymore. So he 25 the water bottle and took it to the wise man.

The wise man drank the water and looked up at his student, “See what you did to make the water 26?” The student was puzzled because he did nothing.

“You let it be for a/an 27. As time passed, the mud settled down on its own.” The wise man continued. “Just like the lake, when your mind is 28, it will become clear with more time.”

When we find ourselves nervous or angry next time, we should stop and 29 for a while. By doing so, we can bring peace to our 30. Only in this way can we control our feelings better and lead a healthy life.

There is a big difference between knowing a country from social media and experiencing it in person. This is what students from the US and China discovered during an eight-day exchange journey.

From March 24 to 31, a group of 15 students from the US went on an educational and cultural \_\_\_\_1\_\_\_\_ in China.

For 15-year-old Ian Sierra, a 10th grader, this was his first trip abroad. He felt nervous before leaving home. “I was \_\_\_\_2\_\_\_\_ about everything—new people, strange food, and how to adapt \_\_\_\_3\_\_\_\_ surroundings(环境),” he said. But things went better than he expected. In Beijing, he tried douzhi, a fermented bean juice. It’s a \_\_\_\_4\_\_\_\_ even for locals. Surprisingly, he finished three bowls!

Ian loved the homestay at Beijing No. 4 High School International Campus. At first, he worried he might feel \_\_\_\_5\_\_\_\_, but Chinese students were very friendly. “After class, I played table tennis. Chinese students are so good—they surprised me!” he said. “In the US, we play sports for fun, but here they take it seriously.”

The learning was two-sided. Li Weiyou, a 15-year-old student at the school, was Michael Sosa’s homestay partner. Li used to think US students were only \_\_\_\_6\_\_\_\_ and didn’t care about study. But Michael \_\_\_\_7\_\_\_\_ him—he did well in both study and life. “He taught me how to \_\_\_\_8\_\_\_\_ difficult situations, and I taught him Chinese,” Li said.

With technology and media developing quickly, teenagers can get information about other countries online \_\_\_\_9\_\_\_\_. But online stories are just a small part of real cultural exchange. “If I hadn’t come, I’d never know how kind Chinese students are,” said Ian.

This trip even changed Ian’s plans. “I used to want to be a math teacher in the US. Now, I hope to teach English in Beijing or Shanghai!” he said.

Through this tour, Chinese and US students learned more about each other and \_\_\_\_10\_\_\_\_ the beauty of different cultures.

Our team had three Chinese students and two from Australia, and we faced 3 right from the start. We 4 each other's skills: Li Wei, who is good at coding, used special 5 to program the robot's movements, while I focused on putting the machine parts together. One day, our robot kept running into walls. We realized we should 6 hurrying. Instead, we needed to check each part one by one. This taught us patience and teamwork.

During the competition, I was amazed by the creativity of other teams. Some used solar panels to 7 their robots, while others added sensors to detect obstacles. I recently watched a touching and funny film called Nobody. What moved me the most were the four main characters. They all come from simple backgrounds and hold little importance in the monster world, but they still fight for the 1 and stand up for what is right. This made me think of real life: Even if we are 2, we can still be brave and keep going.

When I think about my own school life, I feel the same way. Sometimes in math class, I get 3 about raising my hand to answer hard math problems, because I worry I'll be wrong. When my team falls behind in a basketball game, my legs feel heavy and I often want to 4. But just like the characters in the movie, we may not be the most noticeable. But our small brave acts—like 5 raising that hand or running one more time in the game—are very 6.

At the end of the movie, just as they smile and are ready to say their names to remember each other, they 7 turn back into their small animal forms one by one. They become quiet and unseen again. 8 the movie never tells us their names, I was deeply moved by their quiet courage and kind heart. I believe the director really wanted to 9 ordinary people in life who show quiet bravery.

Here's to every brave person who dares to start their 10, and to the "us" in this movie who never drop, no matter how hard the road is. Because those small, brave steps can make a big difference.
