

Now, exchange trips are getting more and more popular with students. Many young people want to go on these trips. They think it's a great chance to see new places, meet new people, and learn things they can't get from books.

Before you go, it's good to get ready in your mind. Try to be open to new things. Remember, life in another country might be different from home—and that's okay! Don't be afraid to make mistakes when you speak the new language. It's part of learning. Also, be ready to try things you've never done before, like eating strange-looking food or joining a new game.

Exchange trips have many wonderful benefits. First, they help you learn a new language better. In your daily life, you have to use the language: talking to your host family, buying snacks at the store, or asking for directions. This is much more useful than just studying words in a classroom. You'll get better at speaking and listening quickly.

Second, you'll learn a lot about other cultures. You can eat local food (maybe spicy or sweet, different from yours!), watch how people celebrate festivals, or see how families live. This makes you understand that the world is full of different ways of life, and that's interesting.

Third, you'll become more independent. You might need to plan your own time, solve small problems (like forgetting your way home), or take care of yourself when you feel a little sad. Doing these things makes you stronger and more confident.

However, there are some things to pay attention to. One common challenge is culture shock. For example, local customs might be very different from what you're used to—maybe people greet each other in a strange way, or food tastes completely new. To deal with this, it's helpful to learn about the country's culture before the trip. You can read books, watch videos, or talk to people who have been there. Keeping an open mind and trying to understand instead of judging will also make it easier to fit in.

Exchange trips are amazing experiences. They help you learn languages, know more about the world, and grow into a stronger person. With a little preparation, you'll have a great time and make memories that last forever.

1. Why do exchange trips help improve language skills better than classroom study?

- A. Classroom teachers are not as qualified as local people.
- B. Students have to use the language in real-life situations daily.
- C. Foreign countries have better language learning resources.
- D. There are no exams during exchange trips.

2. What is NOT mentioned as a way to deal with culture shock?
- A. Learning about the country's culture before the trip.
 - B. Reading books and watching videos about the country.
 - C. Avoiding talking to local people to reduce misunderstandings.
 - D. Keeping an open mind and trying to understand local custom
3. What can we know from the passage?
- A. Exchange trips can help students understand and respect cultural differences.
 - B. Culture shock is easy to avoid with no preparation.
 - C. Host families will solve all problems for exchange students.
 - D. Students need to be perfect in a foreign language before the trip.
4. What is the main idea of the passage?
- A. How to choose a good exchange program.
 - B. The advantages and considerations of exchange trips.
 - C. The history of student exchange programs.
 - D. Why classroom learning is less effective than travel.
5. What is the author's attitude towards exchange trips?
- A. Negative B. Neutral C. Positive D. Doubtful

In Ancient Arab, there were many fables (传说), and people could learn a lot by reading the stories. Here is a story about wisdom. Long ago, a young prince had just recently become a king. In order to rule his kingdom, he decided to learn all the wisdom of the world. Therefore, he gathered all the wise men from his kingdom and abroad and ordered them to look for books for him to read and learn from.

Five years passed quickly. The wise men returned with their camels, carrying 5,000 books full of wisdom. Seeing so many books, the king was so shocked that he didn't know how to start. Then one day he had an idea—he ordered the wise men to condense all the 5,000 books and bring them back to him.

Another five years passed. The wise men again went to see the king, this time bringing 500 books, but the king still thought there were too many books for him to read.

Five more years passed. The wise men brought back 50 books. At this time, the king was troubled with many problems, but he still felt there were too many books.

During the next five years, the wise man worked hard to condense the 50 books into one book and presented it to the king. The king took no interest in reading this book, nor did he have time to learn from it. More problems broke out in his kingdom—his enemies endlessly attacked and diseases spread all over his country and many of his people became ill. He did not have the wisdom to solve these problems. He did not know what to do!

Waiting for wisdom to come to you is just a way of being lazy. If there is no action, there can be no gain. Only if we set out to seek (寻找) wisdom can we make a difference.

1. Why did the king gather all the wise men?

- | | |
|---------------------------------------|---|
| A. To help him rule the kingdom. | B. To teach him some knowledge. |
| C. To look for books for his kingdom. | D. To look for books of wisdom for him. |

2. What does the underlined word “condense” in Paragraph 2 mean?

- | | |
|--|--|
| A. To make the books smaller than ever. | B. To make the price of books lower. |
| C. To put much information into a small space. | D. To make the books easier than ever. |

3. How many years did it take to condense 500 books into one book?

- | | | | |
|-------------|--------------|--------------|--------------|
| A. 5 years. | B. 10 years. | C. 15 years. | D. 20 years. |
|-------------|--------------|--------------|--------------|

4. What can we learn from this passage?

- | | |
|--|---|
| A. Time and tide wait for no man. | B. Wisdom can make a country strong. |
| C. Wisdom won't come to you by itself. | D. The meaning of living is to find wisdom. |

Think of a simple object—a piece of chalk, for example. Are you remembering its name, its shape, its color or its size? Are you remembering what it is used for, or the sound it makes when the teacher writes on the blackboard? Scientists say that memory includes different parts of the brain, such as language and the ability of sense. They believe that you begin to create a memory when you notice something you're your senses. Then messages are sent to different brain cells which join together to form connections. A new connection goes into your short-term memory. It is stored there for about 30 seconds, and then it is either lost or stored in your long-term memory.

Having a good memory means making lots of connections and storing them in your long-term memory. To do this, you need to keep your brain in good shape. Eat plenty of brain food such as fish oil, fruit and vegetables. Laughter also makes your brain more active. Also, don't forget to exercise. So do some sports or just move around a lot in the house. Finally, get plenty of sleep. This will make your memories grow stronger.

When you want to remember new information, you must pay special attention. Use your senses—sight, smell, hearing and touching and keep repeating the information. To do well in your exams this year, turn off the TV, silence your mobile, and review your work regularly. To remember something special, use your imagination to create visual(视觉的) connections. For example, you need to take a pencil, an eraser, your ID card and chips to your next exam. Imagine the ID card as the body of an animal, the pencil its long neck, and the eraser its head. Your animal is hungry, so now imagine it eating a bag of chips. It may sound crazy, but its fun and it works. Another way is to do something different to your room. Turn a picture upside-down, or tie a sock around the door handle to remind yourself of something to remember.

1. At the beginning, the writer gives an example to _____.
A. lead in the topic of the article
B. show the importance of chalk
C. let readers remember the word
D. make readers know his favorite
2. How many ways are mentioned to have a good memory in Paragraph 2?
A. 2
B. 3
C. 4
D. 5
3. The main idea of the third paragraph is _____.
A. how to do well in exams
B. how to remember new information
C. why to review your work
D. what to eat to make memories stronger
4. Which of the following is TRUE according to the passage?
A. Memory has nothing to do with languages.
B. Laughter can help to improve our memory.
C. A picture of eating chips is the most useful.
D. Our brain is difficult to keep in good shape.
5. In order to remember new information, we should do the following EXCEPT _____.
A. using our senses
B. using our imagination to create visual connection
C. doing different to remind us
D. getting plenty of sleep

In our lives, pets have become much more than just animals that share our homes. They are cherished companions, offering unconditional love and support that enriches our daily existence in profound ways.

Dogs, often hailed as “man’s best friend,” are a prime example of the deep-seated bond between pets and humans. From the moment a puppy enters a family, it begins to form an emotional connection. They greet us with wagging tails and excited barks after a long day at work, instantly lifting our spirits. Dogs are not only great for companionship but also serve practical purposes. Service dogs, for instance, assist people with disabilities, whether it’s guiding the blind, alerting those with hearing impairments to sounds, or providing support to individuals with mobility issues. Their loyalty makes them invaluable partners in these roles.

Cats, with their independent yet affectionate nature, also hold a special place in many households. A purring cat curled up on our laps can bring a sense of calm and relaxation. They may seem aloof at times, but their gentle nuzzles and soft meows when they seek attention show their love for their human companions. Cats can also be great for reducing stress. Studies have shown that interacting with a cat can lower blood pressure and ease anxiety.

Small pets like rabbits, guinea pigs, and hamsters, though less commonly thought of in terms of close relationships, also offer unique forms of companionship. They may be more timid, but with patience and gentle handling, they can become comfortable around their owners. Watching these small creatures go about their daily activities, such as nibbling on food or playing in their cages, can be a source of simple joy.

The relationship between pets and humans is a two-way street. We provide them with food, shelter, and medical care, while they offer us emotional support, a reason to be more active (especially in the case of dogs that need walks), and a sense of purpose. In fact, for many people living alone, a pet can be their main source of social interaction.

However, this special bond also comes with responsibilities. We need to ensure that our pets are healthy, happy, and well-cared for. This includes regular vet check-ups, proper nutrition, and sufficient exercise (where applicable). In return, the love and loyalty our pets give us make all the efforts worthwhile.

In conclusion, the relationship between pets and humans is a beautiful and essential part of our lives. It teaches us about love, responsibility, and the simple pleasures that come from sharing our world with another living being. Whether it’s a dog, a cat, or a small furry friend, these pets become an integral part

of our families, and their presence makes our lives more fulfilling.

1. Why are dogs often called “man’s best friend”?

- A. Because they are the most popular pets.
- B. Because they can perform various tasks for humans.
- C. Because they offer unconditional love and practical assistance.
- D. Because they are easy to train.

2. How do cats help reduce stress?

- A. By always being affectionate and clingy.
- B. By purring and seeking attention in a gentle way.
- C. By playing energetic games with their owners.
- D. By being independent and not demanding much attention.

3. What is the significance (重要性) of small pets like rabbits and guinea pigs in human-pet relationships?

- A. They are mainly for show and decoration.
- B. They offer unique forms of companionship and simple joy.
- C. They are more intelligent than other pets.
- D. They require very little care compared to dogs and cats.

4. What does the author mean by “the relationship between pets and humans is a two-way street”?

- A. Pets and humans should walk on the street together.
- B. Both pets and humans should be trained.
- C. Humans should only focus on taking care of pets.
- D. Pets give and get care and love from humans.

Today, teachers find themselves in a challenging position regarding generative AI. As schools often adapt slowly to new technology, this new wave has raised an important question: Will AI help make education fairer, or will it create even bigger gaps in our schools?

We have been studying how public school teachers feel about using generative AI. Our research showed that poor training and unclear guidance could make existing differences among schools even worse.

We interviewed 22 teachers in a large public school district in the US that started using AI early and with great excitement. Many teachers said AI saved them hours of work each week. One teacher even called it a “thought partner” that reduces stress and lets them focus on what matters most: their students.

However, not everyone felt ready to use AI well. Some teachers said they did not have enough training to understand AI or use it properly in their lessons.

Past research on new technologies showed a clear pattern: Schools with fewer resources, especially those serving disadvantaged students, are usually the least prepared to help teachers make the most of new technologies. Meanwhile, well-resourced schools are much more likely to offer training. As a result, new technologies often make the education gap wider.

Our research also emphasized another point, which is especially important in the age of AI: Teaching is built on human relationships. As one middle school teacher said, a machine can provide information, but most kids need a social environment and a caring teacher to guide them. Teachers are crucial in determining how and whether AI, like all new technologies, is used to support their teaching and student learning. Studies show that schools with more resources can help teachers use technologies to make their connection with students stronger instead of weakening it. That's why we believe the choices we make about AI right now will have a huge impact on fairness in education.

1. What can we know about the 22 teachers interviewed?
 - A. Most of them considered AI a threat to their teaching jobs
 - B. They all received sufficient training on using AI in lessons
 - C. Many of them benefited from using generative AI in their work
 - D. They thought AI could completely replace teachers' guidance for students
2. We can know that schools with more resources _____.
 - A. Tend to use AI to weaken the connection between teachers and students
 - B. Are more likely to help teachers use AI in a student-friendly way
 - C. Have already solved the problem of education unfairness with AI
 - D. Pay less attention to teachers' training than schools with fewer resources

3. It can be inferred from Paragraph 5 that _____.
- A. Schools with fewer resources will stop using new technologies like AI
 - B. Disadvantaged students are not willing to accept AI-supported teaching methods
 - C. The education gap may become larger due to the unequal distribution of resources
 - D. Well-resourced schools will reduce training for teachers to control costs
4. What does the teacher's comment mean about the role of teachers in the age of AI?
- A. Teachers can be replaced by AI when providing knowledge to students
 - B. The human connection built by teachers is irreplaceable for students' growth
 - C. AI is better than teachers at creating a social learning environment for students
 - D. Teachers should learn from AI to improve their ability to guide students
5. What is the main idea of the passage?
- A. To advise teachers to use generative AI as a "thought partner" in daily work
 - B. To introduce the training problems that teachers face when using AI
 - C. To prove that well-resourced schools can make full use of AI in teaching
 - D. To discuss the double-edged impact of generative AI on education fairness

Inventions have played an important role in shaping the world we live in today. From the wheel to the Internet, these inventions have changed the way we live, work and communicate. Let's look back on some of the most important inventions in human history and their influence on society.

One of the earliest and most influential inventions is the wheel. The wheel has been used for transportation, farming, and manufacturing (制造业) for thousands of years. It completely changed the way goods were transported and traded, making it easier and faster to move from one place to another.

The telephone is perhaps one of the most recognizable inventions of all time. Alexander Graham Bell's invention in 1876 revolutionized communication, allowing people to talk to each other over long distances. It has become an important tool for businesses, governments, and individuals alike.

Finally, the Internet is perhaps the most transformative (变革性的) invention of our time. Created by Tim Berners-Lee in the 1980s, it has changed the way we get information, connect with others, and do business. It has also had a great influence on culture, entertainment, and social media.

In conclusion, inventions have played a key role in shaping human history and society. And inventors have created the great inventions. If we want to keep pushing the boundaries (界限) of what is possible, it is clear that our world needs more creative and talented inventors.

1. How does the writer develop his idea?

A. By giving examples.

B. By raising questions.

C. By comparing differences.

D. By explaining the result.

2. What's the influence of the wheel?

A. It divides the world into parts.

B. It helps people to talk to each other over long

distances.

C. It changes the way people get information.

D. It changes the way of food transportation and trade.

3. What does the underlined word "revolutionized" mean in Paragraph 3?

A. Invited.

B. Compared.

C. Changed.

D. Invented.

4. What can we know from the last paragraph?

A. Keys play a role in history and society.

B. Creative and talented inventors are needed.

C. It is not possible to invent more inventions.

D. Some inventions don't match well with modern life.

5. What is the best title for the text?

A. Inventors came from different times

B. Life in different countries in the world

C. Inventions in history and their influence

D. Information during human history and society

Disney's much-awaited second Zootopia movie, *Zootopia 2*, has set a new standard in China's film business. It broke the single-day box office record for foreign animated films.

The film won over audiences when it first came out on November 26, 2025. By 8 p. m. that day, it had made 213 million yuan. At the end of its first day, the number reached 228 million yuan. For people who work in the film industry, this amazing result was not a surprise.

Before its release, the film had already made history. It got 309.1 million yuan in pre-sales over nine days—setting a new record for animated films in China. It also got 254,000 screenings on its first day, which is the highest number for any foreign film in the Chinese market. This great excitement led to a high score of 9.7 out of 10 on major ticket-selling platforms after the film came out.

Several things helped the film achieve this huge success. First, the two much-loved characters—Officer Judy Hopps and Nick Wilde—came back for another interesting adventure. This brought fans back to the lively world of Zootopia. In their new case, they find out hidden facts about a new character named Gary De'Snake. As they work, they discover the situation is more complicated than they first thought.

The film also does a good job of talking about important ideas like accepting others and understanding each other. Its story is easy to follow. Besides, Disney ran a full marketing campaign. This included working with partners and holding special events all over China, which made more people know about the film. Most importantly, the movie's positive message about teamwork and bravery really touched the viewers.

Beyond making a lot of money, *Zootopia 2*'s success shows how closely Chinese audiences connect with these characters and their world. The film proves that well-made animated movies, with ideas like friendship and peace that everyone can understand, can do well both with critics and at the box office. These movies can even cross cultural lines.

1. What helps *Zootopia 2* succeed so much in China most?

- A. People have waited for its release for a long time
- B. The popular pair Judy Hopps and Nick Wilde come back

- C. Disney did a lot of marketing activities all over China
- D. Its positive message about working together and being brave touches viewers
2. We can know from the passage that Gary De'Snake's story _____.
- A. makes the film's plot more attractive and complex
- B. has no connection with Judy Hopps and Nick Wilde
- C. is the only reason why fans loved the film
- D. is too simple to interest the audience
3. Which sentence is TRUE according to the passage?
- A. *Zootopia 2* had more screenings on its first day than any other Chinese film
- B. The film got a score of 9.7/10 on ticket platforms before it came out
- C. The story of *Zootopia 2* focuses on the ideas of inclusion and understanding
- D. *Zootopia 2*'s box office by 8 p. m. on its first day was higher than its total that day
4. What can we learn about *Zootopia 2*'s pre-sales from the passage?
- A. It got over 300 million yuan in pre-sales within one week
- B. It set a new record for all foreign films in China
- C. It helped the film break the first-day box office record
- D. It was higher than the film's total first-day box office
5. What is the main idea of the passage?
- A. To tell about the story and characters of *Zootopia 2*
- B. To explain why *Zootopia 2* made so much money.
- C. To compare *Zootopia 2* with other foreign animated films
- D. To talk about *Zootopia 2*'s influence on culture around the world

The 15th National Games of China ended successfully on the evening of November 21, 2025, in Shenzhen. The big closing event took place at Qianhai Happy Theater.

This ceremony had the theme “Starry Sea” and was a wonderful show. It was the first time a National Games closing event happened outside a normal stadium, using the ocean and sky as its background. The performances mixed old traditions with new ideas. They showed traditional arts like lion dances and Cantonese opera along with modern music and dancing. A special part was the dragon boat performance, which joined sports with Chinese culture.

New technologies like 3D without glasses and robot technology were also shown, making the “tech + sports” theme clear. Around 120 performers from Guangdong, Hong Kong, and Macao played together in the “Greater Bay Area Symphony.” They sang the famous Cantonese song “Red Sun” and showed how closely connected the three areas are.

The Games themselves were very successful. Athletes made amazing achievements, breaking 8 world records, 5 youth world records, and 13 Asian records. Many young stars appeared: Zhang Zhanshuo, 18 years old, won five gold medals in swimming. Yu Zidi, just 13, broke the Asian record in the women’s 200m medley. On the track, Chen Yujie, 16, showed great speed and energy in short races.

At the end of the ceremony, the Games flag was given to Hunan Province, which will host the 16th National Games in 2029. This will be the first time the event happens in central China. The 15th National Games celebrated great sports moments and helped connect the Guangdong-Hong Kong-Macao area better through its shared hosting plan. As we wait for 2029, we can say: Goodbye, Guangdong! See you in Hunan!

1. Which of the following is true about the closing ceremony?

- A. It was held in a normal stadium as usual.
- B. It didn’t use any new technologies.
- C. Performers only came from Guangdong Province.
- D. It combined traditional arts with modern elements.

2. What can we know from the passage about the closing ceremony?

- A. It used more old-style things than new technology.
- B. The “Greater Bay Area Symphony” was the most liked part.
- C. It was the second time a National Games ceremony was held in the open air.
- D. The background mixed sea and air together, showing the Greater Bay Area style.

3. Why does the passage talk about the teenage athletes in Paragraph 3?

- A. To show that the Games help young athletes grow
- B. To show young athletes are more energetic than older ones
- C. To explain why so many records were broken
- D. To tell us who the most famous athletes were

4. What is different about the 16th National Games?

- A. Many places will host it together
- B. It will focus more on traditional culture
- C. It will help develop sports in central China.
- D. It will break more records than the 15th National Games.

5. What is the deeper meaning of the 15th National Games?

- A. It only focused on showing Chinese traditional culture.
- B. It promoted the connection in the Greater Bay Area.
- C. It proved that young athletes are better than older ones.
- D. It made Shenzhen the only host city of national sports events.

For the past 50 years, the highest-paying jobs have focused on knowledge work—especially in science, technology and analysis. But the rapid rise of generative AI is beginning to change that. Companies are already considering replacing certain white-collar roles with AI. This change raises an important question: Will the future economy still need as many human workers?

The impact affects not only future workers but also teachers and parents. For years, schools have focused on getting students ready for cognitive jobs. Now, with AI's development, we need to decide which skills students truly need.

In the past, machines took over simple physical tasks. But now, AI can write, create code, and process information in ways that seem human. As a result, some beginner-level knowledge jobs may reduce. However, AI still struggles with tasks that require deep reasoning, empathy(共情), or dealing with new situations. It cannot truly understand human feelings.

That's why "soft skills" will become more important than ever. Collaboration(协作), emotional awareness and creative problem-solving are difficult for AI to learn. The good news is that these skills can be taught in schools together with traditional subjects such as math and reading.

For example, teachers can use reflection exercises to help students recognize their own feelings. Tasks like "Write about a time you helped someone today" or "Describe how you solved a hard problem." encourage self-awareness and empathy.

Students can also practice solving open-ended, real-world problems such as designing a social campaign or discussing historical decisions. These activities help develop flexible thinking and teamwork—skills that AI cannot copy.

A new challenge is that students may depend on AI to complete tasks, ignore the learning process. But true understanding requires effort. Teachers should stress the value of slower learning—through handwriting and hands-on projects（实践项目）—so that students can learn key skills before using AI tools.

No one knows how AI will change the job market. However, the most important lesson schools can teach is this: Don't let shortcuts replace learning. Human abilities—especially the ability to work with others to solve difficult problems—will always matter.

1. What is special about AI compared with earlier automation(自动化)?

- | | |
|--------------------------------------|--------------------------------------|
| A. It can replace manual labor. | B. It can do some cognitive jobs. |
| C. It can finish work independently. | D. It can understand human emotions. |

2. Why are soft skills becoming more important?

- A. They are still difficult for AI to learn. B. They are necessary for controlling AI.
C. They are easier to measure and test. D. They can help companies save costs.

3. What can teachers do to help students build key skills?

- A. Stop students from using AI to do tasks. B. Reduce the teaching of traditional subjects.
C. Show the importance of slower learning. D. Encourage students to do more exercises.

4. What does the last paragraph want to tell us?

- A. AI's influence on the job market is totally unclear now.
B. Students should avoid using AI tools in their studies
C. Students should value learning, and human abilities are important.
D. AI will soon change all the existing jobs, we must be prepared well.

5. How does the author feel about the future of human workers?

- A. Worried. B. Doubtful. C. Uncaring. D. Optimistic

On November 1, 2025, the Grand Egyptian Museum (GEM 大埃及博物馆) officially opened to the public. It is one of the most wonderful cultural projects of the 21st century. The museum covers about 500,000 square meters. That is as big as 70 football fields or twice the size of the Louvre Museum in Paris. So, it is famous as the world's largest museum that focuses on just one civilization. What's special is that it is only two kilometers away from the Great Pyramids of Giza. This makes a great connection between the ancient wonders and modern building skills.

International media have spoken highly of the museum. The Financial Times said it is a “must-see place”. It also talked about the museum's excellent design, which gives visitors more than the usual museum experiences. National Geographic pointed out its unique location. It noted that the museum links the “view of the Pyramids with the treasures of Tutankhamun” very well. The building's design was made by Heneghan Peng Architects after an international competition. The modern structure respects and matches the ancient monuments, but it still has its own special style.

Inside the museum, visitors can see a fantastic collection of old things. Since Tutankhamun's treasures were found in 1922, this is the first time that all of them are shown together. These treasures include his famous golden mask and throne. A big staircase takes visitors past many royal statues and old objects. At the end, they can get an amazing direct view of the pyramids through the large glass wall. Unlike Cairo's old Egyptian Museum, which was only 10,000 square meters, this big space can show more than 100,000 artifacts at the same time. It lets visitors have a new and deep experience that they have never had before.

The opening of the museum is a very important moment for Egypt. People think it is key to making its tourism industry better. As The New York Times said, the GEM is “a bridge between past and future”. It connects ancient culture with modern ideas and dreams. This great museum not only keeps the wonderful past alive but also encourages young people to love the richness of ancient Egyptian civilization.

1. What does The New York Times say the GEM is used for?

- A. It connects the past with the present and future
- B. It helps make Egypt's tourism industry better
- C. It keeps ancient Egyptian civilization safe
- D. It gives visitors a new experience they've never had before

2. What can visitors do for the first time at the GEM?

- A. See the Great Pyramids directly through glass

- B. Walk on a big staircase with royal statues
 - C. See all of Tutankhamun's treasures shown together
 - D. Visit a museum designed by an international team
3. Why does the GEM's location near the Great Pyramids matter?
- A. It allows the museum to borrow artifacts from the pyramids easily
 - B. It creates a special connection between ancient and modern culture
 - C. It helps reduce the cost of building the modern museum
 - D. It makes the museum's glass wall more impressive to visitors
4. What can we infer about Egypt's expectation for the GEM?
- A. It hopes the museum will attract more young people to study architecture
 - B. It expects the museum to become the only cultural landmark in the world
 - C. It believes the museum will play a key role in developing its tourism
 - D. It wants the museum to replace the Louvre Museum's reputation
5. What does the international media's praise imply about the GEM?
- A. It has better artifacts than any other museum in the world
 - B. Its design and location make it a unique and valuable attraction
 - C. It will soon become the most visited museum in Egypt
 - D. Its opening has solved all of Egypt's tourism problems

Recently, China's Ministry of Education has released ten key measures to further improve the mental health of primary and secondary school students. Among these measures, developing healthy internet usage habits has drawn wide attention.

The background of these measures is the growing mental health challenges for students. With the rapid development of the internet, 97.3% of minors in China are internet users, according to the 6th Survey Report on Internet Usage of Chinese Minors. Too much internet use has caused problems like poor sleep, declining eyesight and distracted attention among students. Worse still, harmful online content, such as information that causes anxiety, encourages unhealthy competition, or is simply rude, seriously threatens their mental health.

To solve these issues, the measures put forward clear requirements. Schools must regulate the management of intelligent terminal products brought by students and strictly ban mobile phones and other electronic devices from entering classrooms. Meanwhile, students and parents are encouraged to jointly carry out a "Screen-Off Campaign" (息屏行动) to reduce too much dependence on the internet.

In addition, relevant departments will push website platforms to fulfill their supervisory responsibilities. They will also improve algorithm recommendation systems. This is to prevent harmful information from being sent to students. At the same time, they will firmly stop illegal behaviors online. The promotion of the "Minor(未成年人) Protection Mode" will also continue to make the online environment cleaner for young people.

These measures aim to guide students to use the internet healthily through the joint efforts of schools, families and society.

1. What is the main reason for releasing the ten key measures?
 - A. To make students spend more time on the internet
 - B. To deal with students' increasing mental health problems
 - C. To help the development of intelligent terminals
 - D. To make fewer minors use the internet
2. Which of the following is NOT a problem from using the internet too much?
 - A . Poor sleep quality
 - B . Declining eyesight
 - C . Enhanced concentration
 - D . Distracted attention
3. We can guess from the passage that _____.
 - A. the "Minor Protection Mode" helps make a better online environment.
 - B. relevant departments will stop using algorithm systems

C. mobile phones are allowed in school classrooms

D. all harmful online information can be easily kept away from

4. Which of the following statements is true according to the passage?

A. Too much internet use can help students improve their concentration.

B. Solving students' online health problems requires multi-party cooperation

C. The "Minor Protection Mode" has already stopped all illegal online behaviors.

D. "Screen-Off Campaign" is to completely ban students from using the internet.

5. Why does the article mention the "6th Survey Report on Internet Usage of Chinese Minors"?

A. To show the popularity of online education.

B. To provide evidence for the widespread internet use among minors.

C. To highlight the benefits of internet access.

D. To compare internet usage between different age groups.

Have you ever imagined a robot washing your hair for you? This is not a science fiction anymore thanks to the invention of AI hair washing machines. Many AI hair washing stores have been opened in several areas in Shenzhen, such as Nanshan, Futian and Longhua. It has become a hot topic on the Internet and more such stores are on the way.

AI hair washing is popular in Shenzhen, but it is not very expensive. With just 9.9 *yuan*, you can experience it. After a scalp (头皮) check, all you need to do is to lie down on a bed and put your head into the machine. Then, a worker will decide on the setting according to your hair length and your scalp type. After that, press the start key and the machine will operate, using infrared technology (红外技术) to send water to the exact right places. It can even change water temperature by itself. However, it doesn't mean that no human workers are required. Workers still need to help with things like preparing the towels and drying the hair.

Curious about the new technology, many people have tried this new way of hair washing. However, people have made different comments about this. Some say, "It works better than I thought and my hair is cleaner than I expected." However, others comment, "The machine is not good enough, because it can't get to my itchy (发痒的) spots correctly."

New things need time. I believe that the new machine will become better and make our lives more convenient in the future.

16. How did the writer introduce the topic in Paragraph 1?

- A. By raising a question.
- B. By telling his stories.
- C. By describing a scene.
- D. By giving an example.

17. What does the underlined part "are on the way" probably mean?

- A. Stay unknown.
- B. Keep appearing.
- C. Become outdated.
- D. Remain special.

18. What can we know about the AI hair washing in Shenzhen?

- A. It costs more than 10 *yuan*.
- B. It doesn't include a scalp check.
- C. It can be found in several areas.
- D. It has the same setting for everyone.

19. Why do many people try the AI hair washing service?

- A. Because it can dry their hair by itself.
- B. Because it's better than the traditional way.
- C. Because there are no other hair washing stores.
- D. Because they have an interest in the new technology.

20. What is the best title for the passage?

- A. The development of AI hair washing technology
- B. Workers' important role in AI hair washing stores
- C. AI hair washing: new service popular in Shenzhen
- D. Infrared technology: the secret of AI hair washing

①Do you often use social media (社交媒体) in your life? Social media is a place where users can share photos and talk to each other online. It is very popular—millions of people use social media every day. People are discussing whether social media has a positive or negative effect (积极或消极影响) on young people. Although some people think social media is a positive thing, many are worried about the pernicious things it brings to young people.

②James, a 15-year-old student, thinks that social media has many benefits (益处). “I get very nervous when I talk to people in real life—I find it so much easier to express myself when I use social media. Another benefit is that I hardly ever forget anyone’s birthday now because I can look it up online!” Lots of users agree that social media helps young people stay connected with their friends and make new friends from around the world.

③However, social media also has many problems. Social media may help young people find friends, but it also makes it easier for them to get hurt. Some parents believe that social media makes it harder for families to spend time together. They say their children are so crazy about social media that they pay less attention to the rest of their family. Many teachers think social media can distract (使分心) their students from schoolwork.

④It’s true that social media has some problems, and it is very important to control the time we spend online. However, social media can be a positive thing for young people.

13. What does the underlined word “pernicious” mean in Paragraph 1?

- A. Harmful. B. Strange. C. Amazing. D. Special.

14. What do some parents think of social media?

- A. It helps families get closer. B. It improves children’s communication skills.
C. It makes family time more difficult. D. It helps children make new friends around the world.

15. What’s the text mainly about?

- A. The ways of using social media. B. The importance of social media.
C. The reasons why social media is popular. D. The effects of social media on young people.

16. How is the text organized? (①=Paragraph 1, ②=Paragraph 2, …)

①Albert Einstein once said, “I have no special talents. I am only curious.” The greatest inventions in history would be impossible without curiosity (好奇).

②Curiosity can bring new discoveries. Benjamin Franklin is a great example. He was drawn to electricity and had a deep curiosity about its nature. He tried to find out all about it. For example, he flew a kite during a storm. His curiosity led him to invent the lighting rod. This invention protects buildings from lighting.

③Curiosity can also make people brave. Just look at Wan Hu, the Ming Dynasty pioneer of space exploration. He was so curious about space that he invented a “flying chair”! He lost his life while testing this invention. Although he failed, his curiosity gave future explorers ideas. People learnt from his example, and created safer ways to explore space.

④But curiosity is more than just doing dangerous things. It also drives people towards certain goals. Zhang Heng, a Chinese scientist and inventor, was curious about the world: how did everything in the world move? He spent years studying the sky and the earth. Finally, he drew China’s first star map, and invented the first earthquake detector. His curiosity continues to influence scientists today.

⑤As Jacques Cousteau said, “What is a scientist after all? It is a curious man looking through a keyhole, the keyhole of nature, trying to know what’s going on.” Curiosity is the key. It opens one door after another for us to discover a new world.

33. Why is Albert Einstein’s saying mentioned in Paragraph 1?

- A. To show that he was not proud. B. To introduce the topic of curiosity.
C. To explain the reason for his success. D. To compare him with other scientists.

34. Whose invention is still used today according to the text?

- A. Wan Hu’s. B. Jacques Cousteau’s. C. Zhang Heng’s. D. Benjamin Franklin’s.

35. Which is the topic sentence of Paragraph 4?

- A. How did everything in the world move?
B. Zhang Heng was curious about the world.
C. Curiosity also drives people towards certain goals.
D. Curiosity is more than just doing dangerous things.

36. How is the text organized? (①=Paragraph 1,②=Paragraph 2...)

The number of AI users in China reached 515 million as of June, an increase of 266 million compared to December 2024, according to a report released on Saturday.

The report, released by the China Internet Network Information Center, found that domestically developed AI large models have gained widespread popularity among users.

The report cited a survey showing that more than 90 percent of users prefer domestic large models as their first choice.

AI is being widely used across several fields—including intelligent search, content creation, office productivity assistants and smart hardware—while also being actively explored and used in areas such as agricultural production, industrial manufacturing and scientific research, the report said.

Young and middle-aged users with higher educational backgrounds make up the core user group of AI, according to the report. Among AI users, those aged under 40 account for 74.6 percent, and users with college, bachelor's or higher degrees make up 37.5 percent.

Additionally, with continuous technological advancements, China's influence in the global AI field has been steadily growing, making it a key driving force behind global AI innovation, the report said. As of April, China had filed about 1.58 million AI-related patent applications, accounting for 38.58 percent of the global total -- ranking first in the world. This shows that China plays a key role in global AI innovation.

31. How many AI users were there in China by June 2025?

- A. 266 million. B. 515 million. C. 1.58 million. D. 37.5 million.

32. The word “domestic” in Paragraph 3 most probably means “_____”.

- A. foreign B. outside C. native D. abroad

33. Which of the following is NOT a field where AI is widely used?

- A. Intelligent search. B. Space exploration.
C. Content creation. D. Office productivity assistants.

34. What can we infer from the number of AI users in China mentioned in the report?

- A. All users aged under 40 in China are using AI.
B. The number of AI users with college degrees is more than 200 million.
C. The number of AI users in China will be sure more than 800 million by the end of 2025.
D. The growth rate of AI users in China from December 2024 to June 2025 was relatively fast.

35. Why does the author write the last sentence “This shows that China plays a key role in global AI innovation”?

- A. To explain what a patent is. B. To give an example of an AI tool.
C. To describe who uses AI in China. D. To show the importance of China's work in AI.

Everyone knows magic tricks are fun, but not enough people realize that math can be as well.

Here is one of the most popular tricks to show you how amazing math can be.

Firstly, pick a friend with good math skills. To play the trick, your friend needs to know how to add numbers and do subtraction (减法).

Then, write down 1089 on a piece of paper without showing anyone.

Thirdly, ask your friend to write down a number with three different digits (数位). Tell him not to show you the number. Make sure the three digits cannot be the same. For example, he could pick 481.

Next, let your friend write down the number backwards. For example, 481 backwards is 184.

After that, make it into a subtraction problem. Now your friend has two numbers. Get him to subtract the smaller one from the larger one. In our example, the result should be $481-184=297$. If the result has only two digits, ask your friend to add a zero at the beginning.

Next step, reverse this number as well. Ask your friend to take his answer and reverse the digits order again. If he added the zero at the beginning, remind him to include it as part of the number. For example, the reverse of 297 is 792.

Here comes the most exciting part. As the final calculation, get your friend to add the last two numbers and write down the result. In our example, $792+297=1089$.

Finally, tell everyone that you know the last number your friend wrote down. Show others the piece of paper with the 1089 you've written down earlier.

In the trick, the last number will always be 1089. If your friend has a different answer, he did not follow instructions, or he made a mistake.

39. To play the trick, how many steps should you follow?

- A. 5. B. 6. C. 7. D. 8.

40. If your friend got “99” after doing the subtraction, what did he need to do?

- A. Go on with the other steps. B. Change the number into 099.
C. Tell others the number he got. D. Choose another number to start again.

41. What does the underlined part “reverse this number” in Paragraph 7 mean?

- A. Get the number subtracted. B. Turn the number upside down.
C. Write down the number backwards. D. Change the order of the number as you like.

42. What can we learn about the trick from the passage?

- A. It is the most popular trick. B. The numbers should be reversed twice.
C. The final number can't always be 1089. D. The trick is friendly to people bad at subtraction.

What's the largest animal in the world? Where is Denmark? Who made the first pizza?

To answer these questions, you may need an encyclopedia. An encyclopedia is a book with facts on topics in every field of knowledge. Which one should you choose? Encyclopedia Britannica is a good choice.

It is the oldest and largest English-language encyclopedia in the world. It was first published in the 18th century in Scotland. Many people think it is the best encyclopedia.

From the 18th century to the early 20th century, articles in Encyclopedia Britannica were long and hard to understand. It soon became the favorite encyclopedia of scholars. But later, more and more common people began to use Encyclopedia Britannica, because the articles became shorter and easier to read.

Today people still think articles in Encyclopedia Britannica are reliable (可靠的) and well-written. In 2004, it had about 120,000 articles, with 44 million words.

To buy the Encyclopedia Britannica, you have to spend around 1,400 dollars (about 11,200 *yuan*). It also has a CD-ROM version which costs about 50 dollars.

In 1994 Encyclopedia Britannica was first put online. You can read short introductions of articles for free from the website. But for the full text, you have to pay about 12 dollars a month or 70 dollars a year.

1. Which of the answers to the questions may be found in Encyclopedia Britannica?
A. What is the largest animal in the world? B. Who made the first pizza?
C. Where is Denmark? D. All of the above.
2. Why did common people dislike to use Encyclopedia Britannica at first?
A. Because it was too expensive.
B. Because they didn't have computers.
C. Because the articles in it were not easy to understand.
D. Because they didn't have any questions.
3. How much do you pay if you want to buy an Encyclopedia Britannica and its CD-ROM version?
A. About \$1,400. B. About \$1,450 C. About \$11,200 D. About \$70.
4. How long is the Encyclopedia Britannica online now?
A. For 29 years. B. For 12 years. C. For one century. D. For 18 years.
5. What is the best title for the passage?
A. Encyclopedia Britannica. B. How to Find Answers in an Encyclopedia.
C. Useful Websites in Our Daily Lives. D. The Power of Knowledge.

From checking social media every minute to being lost in computer games, we usually overuse technology. “For many people, a moment without your phone or computer in sight can feel like a lifetime.” the Daily Mail commented.

A computer model called Mindy may make many people think twice. A team from a US company built a three-dimensional (3D) model to show the negative effects technology can have on human bodies in less than 800 years.

“Spending hours looking down at your phone tires your neck and throws your backbone off balance.” explained Caleb Backe, a health and wellness expert (专家) in the US. This, in turn, will make it more difficult for the muscles in our neck to support the head, making our back hunched and our neck wide.

“The way we hold our phones can cause pain in certain muscles of your hands.” Nikola Djordjevic, a doctor in Serbia, told the team. It affects the elbows too, making your arm hurt a lot. Scientifically, it is called cubital tunnel syndrome (肘管综合征). That’s why Mindy has a 90-degree elbow, and her hands look like she’s always holding a mobile phone.

Some people also commented that human evolution (进化) may not work this way. They believe that only good changes would be kept over the years. For example, changes that can enable people to live longer, instead of the negative effect of technology.

However, human lifestyles nowadays still cause worries. A model called Emma was built by researchers in the UK in 2019 to show how the way people work at their desks could change them in 20 years.

The research team built Emma based on the health problems mentioned by over 3,000 workers in France, Germany and the UK. Emma’s back stays bent, and her legs are swollen because of the time

people spend in front of computers. With little time spent outdoors in the sun, her skin is pale, too.

While Mindy and Emma are just predictions about what may happen in the future, they remind us to think more about tech habits. Experts suggest taking breaks, stretching muscles, and balancing screen time with outdoor activities. After all, evolution is kind to those who get used to changes wisely—not those controlled by devices like phones and computers.

37. What does the underlined word “negative” in paragraph 2 mean?

- A. Useful. B. Harmful. C. Amazing. D. Hopeless.

38. Why did the researchers create “Mindy” and “Emma”?

- A. To introduce future technology.
B. To sell new types of models to doctors.
C. To show possible effects of overusing technology.
D. To explain how technology improves human health.

39. How does the article support its opinion about technology’s effects?

- A. By telling stories about future humans.
B. By explaining how human evolution works.
C. By comparing traditional and modern lifestyles.
D. By showing experts’ opinions and research models.

40. Which of the following may the writer agree with?

- A. Working outdoors is important. B. More models should be created.
C. Technology will make humans healthier. D. Using technology wisely helps us live better.

One of the favorite classes for Cheng Ning is the weekly information technology class. There she gets to experience painting and playing word games with AI robots. Cheng Ning and her classmates are from East China's Zhejiang Province. The province is one of the leaders to bring AI into classes of schools in China. Students have more chances to learn AI courses (课程).

To deepen the connection between AI and education, Zhejiang provides AI courses in primary and middle schools. It hopes to help students have a good foundation (基础) for their future studies.

Many cities in Zhejiang are connecting AI with education. In 2022, Hangzhou introduced an AI education platform (平台) from Tencent. Students can experience AI in class. For example, students can control AI robots as engineers on "Mars" to finish special tasks in the robot project.

Also, in Wenzhou, another city in Zhejiang, many schools have offered at least one AI course. Since 2023, Wenzhou has developed 700 AI education experimental schools. Most schools in Wenzhou have had a complete AI education teacher team. By the end of 2025, there will be 300 more experimental schools in Wenzhou.

AI courses will become more popular in primary and middle schools, and AI labs will be fully covered in every school in these cities and even across the province.

26. What is the purpose of introducing Chen Ning's favorite class?

- A. To show her great interest in AI. B. To start the topic about AI courses.
C. To introduce what Zhejiang is like. D. To encourage kids to join AI courses.

27. How did Zhejiang connect AI and education more deeply?

- A. By offering AI courses in schools. B. By using AI to finish difficult tasks.
C. By letting students do more experiments. D. By introducing the future of AI to students.

28. How many AI education experimental schools will Wenzhou have by the end of 2025?

- A. 300. B. 400. C. 700. D. 1000.

29. What is the structure of this passage? (P1= Paragraph 1)

30. What is the best title of this passage?

- A. The future of AI technology B. The uses of AI in education
C. The importance of AI education D. Examples of using AI technology

Charity is important. Not only because it can change people's lives, but also because it can change the world. By giving to charities, we can help those less lucky and support causes (事业) we believe in. Whether you're looking for a way to give back or just want to learn more about the work of charities, this post is for you.

A charity is an organization that helps people or communities in need. A charity may raise money from common people, companies and governments. Charities usually work on certain areas such as health care, education, disaster relief, and so on.

Charities provide services that are important to people in need: food banks provide food to hungry families; churches help people find cheap places to live in; hospitals provide free basic care to low-income patients; animal charities save homeless pets from certain death and find them new homes... The list is endless. They help improve the lives of millions of people every day.

Charities are good for you too. Helping others is good for your health and well-being. Volunteering for charities makes you feel like you're making a difference and contributing, which in turn builds a sense of community and reduces loneliness. Volunteering for a charity can also help develop a sense of purpose, build friendships or improve social networks, and increase self-confidence.

Charities don't just help people. There are also many charities that protect the environment and conserve natural resources. The Nature Conservancy, for example, is a global conservation organization that works to preserve the lands and waters on which all life depends. The World Wildlife Fund (WWF) has been working for more than 50 years to protect endangered species and their habitats.

Charities play an important role in our society. They provide vital services to millions of people every day and play an important role in our economy.

33. Who is this article written for?

- A. People in need of help. B. People working for charities.
C. People interested in charity work. D. People planning to raise money.

34. What does paragraph 2 mainly talk about?

- A. What charities are. B. How charities help people in need.
C. Why people give money to charities. D. Where people find information about charities.

35. Which picture best shows the structure of the article?

36. Why did the writer write this article?

- A. To ask people to learn more about WWF. B. To show charities' responsibility for nature.
C. To call for people to help with voluntary work. D. To explain the importance and roles of charities.

Ever thought about keeping a capybara as a pet? They are known for being friendly and social. But, owning a capybara is more than just feeding and housing them. Knowing their natural ways and social needs helps you decide if a capybara is right for your family.

Space and Living Environment

You need a lot of space for capybaras to move around comfortably. A good size for a pair is 12 feet by 20 feet, with a 55cm-high fence (栅栏) to keep them safe. This space lets them explore and play, which is good for their health.

Also, make sure they have a swimming hole at least 3.5 feet deep. Water is important for their health and keeping cool. Keep the temperature right, about 25°C, for a healthy home. And make sure their indoor area is safe at night for them to rest.

Social Needs

Capybaras love to be with others. Having at least two together is key to keep them happy and stress-free. They need to be with friends to act naturally and feel secure. Since they can live up to 12 years, you're making a big promise to care for them well.

By giving them enough space and friends, you can make a great home for your capybaras. This way, they can live a happy and healthy life.

Feeding and Food

It's key to know the right capybara food for their health. These pets eat mainly plants with grasses. They also like water plants and fruits, which give them important nutrients.

Owning a capybara can be pleasing but also comes with big responsibilities. These large animals are not just pets but are part of a social group that needs lots of company. Think carefully about if you can give them the life they need before bringing one home.

37. If you want to keep capybaras, what kind of home should you prepare for them?

- A. A home with low temperature. B. A home with a 30 cm-high fence.
C. A home with a 4-feet-deep swimming hole. D. A home with a 12 feet by 12 feet area.

38. What does the underlined word "secure" in Paragraph 4 mean?

- A. Frightened. B. Lonely. C. Quiet. D. Safe.

39. What does a capybara need according to the article?

- A. A safe and small space. B. Enough space and meat.
C. Some friends and right food. D. A short fence and many friends.

40. What is the purpose of the passage?

- A. To encourage people to keep capybaras as pets.
B. To introduce requirements of keeping capybaras.
C. To compare capybaras with other social animals.
D. To explain why capybaras prefer living in groups.

Now, exchange trips are getting more and more popular with students. Many young people want to go on these trips. They think it's a great chance to see new places, meet new people, and learn things they can't get from books.

Before you go, it's good to get ready in your mind. Try to be open to new things. Remember, life in another country might be different from home—and that's okay! Don't be afraid to make mistakes when you speak the new language. It's part of learning. Also, be ready to try things you've never done before, like eating strange-looking food or joining a new game.

Exchange trips have many wonderful benefits. First, they help you learn a new language better. In your daily life, you have to use the language: talking to your host family, buying snacks at the store, or asking for directions. This is much more useful than just studying words in a classroom. You'll get better at speaking and listening quickly.

Second, you'll learn a lot about other cultures. You can eat local food (maybe spicy or sweet, different from yours!), watch how people celebrate festivals, or see how families live. This makes you understand that the world is full of different ways of life, and that's interesting.

Third, you'll become more independent. You might need to plan your own time, solve small problems (like forgetting your way home), or take care of yourself when you feel a little sad. Doing these things makes you stronger and more confident.

However, there are some things to pay attention to. One common challenge is culture shock. For example, local customs might be very different from what you're used to—maybe people greet each other in a strange way, or food tastes completely new. To deal with this, it's helpful to learn about the country's culture before the trip. You can read books, watch videos, or talk to people who have been there. Keeping an open mind and trying to understand instead of judging will also make it easier to fit in.

Exchange trips are amazing experiences. They help you learn languages, know more about the world, and grow into a stronger person. With a little preparation, you'll have a great time and make memories that last forever.

1. Why do exchange trips help improve language skills better than classroom study?

- A. Classroom teachers are not as qualified as local people.
- B. Students have to use the language in real-life situations daily.
- C. Foreign countries have better language learning resources.
- D. There are no exams during exchange trips.

2. What is NOT mentioned as a way to deal with culture shock?

- A. Learning about the country's culture before the trip.
- B. Reading books and watching videos about the country.
- C. Avoiding talking to local people to reduce misunderstandings.
- D. Keeping an open mind and trying to understand local custom
3. What can we know from the passage?
- A. Exchange trips can help students understand and respect cultural differences.
- B. Culture shock is easy to avoid with no preparation.
- C. Host families will solve all problems for exchange students.
- D. Students need to be perfect in a foreign language before the trip.
4. What is the main idea of the passage?
- A. How to choose a good exchange program.
- B. The advantages and considerations of exchange trips.
- C. The history of student exchange programs.
- D. Why classroom learning is less effective than travel.
5. What is the author's attitude towards exchange trips?
- A. Negative B. Neutral C. Positive D. Doubtful

【答案】BCABC

【解析】文章介绍了学生交换旅行很流行，阐述其能提升语言、了解文化、增强独立性等好处，及应对文化冲击的注意事项，认为其是很棒的经历。

1. B 文章第三段明确提到，交换旅行中“在日常生活中必须使用语言（和寄宿家庭交谈、在商店买零食、问路等）”，这比课堂学习更有用。由此可知，真实生活中的日常使用是语言能力提升的关键，B 选项符合

2. C 第六段提到应对文化冲击的方法包括“提前了解该国文化”“读书、看视频”“保持开放心态并尝试理解”，而 C（避免与当地人交流）与文中“保持开放心态、融入当地”的建议相悖，且未被提及，故为正确答案。

3. A 第四段提到，交换旅行让人“了解到世界上有不同的生活方式”，这体现了对文化差异的理解与尊重，A 选项正确；B（不做准备也能避免文化冲击）与文中“提前了解文化有帮助”矛盾；C（寄宿家庭解决所有问题）与“变得独立、自己解决问题”不符；D（旅行前必须精通外语）与“不要害怕说错话，这是学习的一部分”相悖。

4. B 文章先介绍交换旅行的流行，接着阐述其好处（语言提升、文化了解、独立性增强），然后提到需要注意的问题（文化冲击及应对方法），最后总结其价值。整体围绕“交换旅行的优势与注意事项”展开，B 选项正确。

5. C 作者在文中用 “wonderful benefits” “amazing experiences” “great time” “memories that last forever” 等积极词汇描述交换旅行，且强调其对个人成长的帮助，态度明显是积极的，C 选项正确。

02

In Ancient Arab, there were many fables (传说), and people could learn a lot by reading the stories. Here is a story about wisdom. Long ago, a young prince had just recently become a king. In order to rule his kingdom, he decided to learn all the wisdom of the world. Therefore, he gathered all the wise men from his kingdom and abroad and ordered them to look for books for him to read and learn from.

Five years passed quickly. The wise men returned with their camels, carrying 5,000 books full of wisdom. Seeing so many books, the king was so shocked that he didn't know how to start. Then one day he had an idea—he ordered the wise men to condense all the 5,000 books and bring them back to him.

Another five years passed. The wise men again went to see the king, this time bringing 500 books, but the king still thought there were too many books for him to read.

Five more years passed. The wise men brought back 50 books. At this time, the king was troubled with many problems, but he still felt there were too many books.

During the next five years, the wise man worked hard to condense the 50 books into one book and presented it to the king. The king took no interest in reading this book, nor did he have time to learn from it. More problems broke out in his kingdom—his enemies endlessly attacked and diseases spread all over his country and many of his people became ill. He did not have the wisdom to solve these problems. He did not know what to do!

Waiting for wisdom to come to you is just a way of being lazy. If there is no action, there can be no gain. Only if we set out to seek (寻找) wisdom can we make a difference.

1. Why did the king gather all the wise men?

- | | |
|---------------------------------------|---|
| A. To help him rule the kingdom. | B. To teach him some knowledge. |
| C. To look for books for his kingdom. | D. To look for books of wisdom for him. |

2. What does the underlined word “condense” in Paragraph 2 mean?

- | | |
|--|--|
| A. To make the books smaller than ever. | B. To make the price of books lower. |
| C. To put much information into a small space. | D. To make the books easier than ever. |

3. How many years did it take to condense 500 books into one book?

- | | | | |
|-------------|--------------|--------------|--------------|
| A. 5 years. | B. 10 years. | C. 15 years. | D. 20 years. |
|-------------|--------------|--------------|--------------|

4. What can we learn from this passage?

- | | |
|--|---|
| A. Time and tide wait for no man. | B. Wisdom can make a country strong. |
| C. Wisdom won't come to you by itself. | D. The meaning of living is to find wisdom. |

【答案】1. D 2. C 3. B 4. C

【解析】本文主要通过一个故事表明智慧不会自己找上门，要自己主动去学习。

1. 细节理解题。根据“Therefore, he gathered all the wise men from his kingdom and abroad and ordered them to look for books for him to read and learn from.”可知国王召集所有智慧的人是为了让这些智慧的人帮助找到他能够阅读和学习的书。故选 D。

2. 词义猜测题。根据“Seeing so many books, the king was so shocked that he didn’t know how to start. Then one day he had an idea—he ordered the wise men to condense all the 5,000 books and bring them back to him.”及“Another five years passed. The wise men again went to see the king, this time bringing 500 books”可知看到这么多书，国王不知从何下手，他于是命令这些智者把这些书压缩成更少的书，并带回给他。即“condense”表示让“书中信息”更少。故选 C。

3. 细节理解题。根据“Five more years passed. The wise men brought back 50 books.”及“During the next five years, the wise man worked hard to condense the 50 books into one book and presented it to the king.”可知经过 10 年终于把 500 本书精简成 1 本书。故选 B。

4. 推理判断题。本文主要通过一个故事表明智慧不会自己找上门，要自己主动去学习。故选项 C“智慧不会自己找上门”符合题意。故选 C。

03

Think of a simple object—a piece of chalk, for example. Are you remembering its name, its shape, its color or its size? Are you remembering what it is used for, or the sound it makes when the teacher writes on the blackboard? Scientists say that memory includes different parts of the brain, such as language and the ability of sense. They believe that you begin to create a memory when you notice something you’re your senses. Then messages are sent to different brain cells which join together to form connections. A new connection goes into your short-term memory. It is stored there for about 30 seconds, and then it is either lost or stored in your long-term memory.

Having a good memory means making lots of connections and storing them in your long-term memory. To do this, you need to keep your brain in good shape. Eat plenty of brain food such as fish oil, fruit and vegetables. Laughter also makes your brain more active. Also, don’t forget to exercise. So do some sports or just move around a lot in the house. Finally, get plenty of sleep. This will make your memories grow stronger.

When you want to remember new information, you must pay special attention. Use your senses—sight, smell, hearing and touching and keep repeating the information. To do well in your exams this year, turn off the TV, silence your mobile, and review your work regularly. To remember something special, use your imagination to create visual(视觉的) connections. For example, you need to take a

pencil, an eraser, your ID card and chips to your next exam. Imagine the ID card as the body of an animal, the pencil its long neck, and the eraser its head. Your animal is hungry, so now imagine it eating a bag of chips. It may sound crazy, but its fun and it works. Another way is to do something different to your room. Turn a picture upside-down, or tie a sock around the door handle to remind yourself of something to remember.

1. At the beginning, the writer gives an example to _____.
A. lead in the topic of the article B. show the importance of chalk
C. let readers remember the word D. make readers know his favorite
2. How many ways are mentioned to have a good memory in Paragraph 2?
A. 2 B. 3 C. 4 D. 5
3. The main idea of the third paragraph is _____.
A. how to do well in exams B. how to remember new information
C. why to review your work D. what to eat to make memories stronger
4. Which of the following is TRUE according to the passage?
A. Memory has nothing to do with languages. B. Laughter can help to improve our memory.
C. A picture of eating chips is the most useful. D. Our brain is difficult to keep in good shape.
5. In order to remember new information, we should do the following EXCEPT _____.
A. using our senses B. using our imagination to create visual connection
C. doing different to remind us D. getting plenty of sleep

【答案】ACBBD

【解析】这篇短文主要介绍了关于记忆的三方面内容：大脑对事物如何进行记忆，怎么做才能有助于有好的记忆力，特殊关注以便记忆信息。

1. 推理判断题。根据后文“Scientists say that memory includes different parts of the brain, such as language and the ability of sense...”及后面两段主要围绕记忆描述，可知开头回想粉笔的各方面是为了引入记忆这一话题。故选 A。
2. 细节理解题。根据第二段中“Eat plenty of brain food such as fish oil, fruit and vegetables. Laughter also makes your brain more active. Also, don’t forget to exercise. So do some sports or just move around a lot in the house. Finally, get plenty of sleep. This will make your memories grow stronger.”可知提及了四种拥有好记忆的方法，故选 C。
3. 主旨大意题。根据第三段的中心句“When you want to remember new information, you must pay special attention. Use your senses—sight, smell, hearing and touch-and keep repeating the information.”可知主要介绍了怎么记住新信息。故选 B。

4. 推理判断题。根据第二段中“Laughter also makes your brain more active.”可知笑也能提升我们的记忆，故选 B。

5. 细节理解题。根据第三段“When you want to remember new information, you must pay special attention. Use your senses...To remember something special, use your imagination to create visual(视觉的) connections...Another way is to do something different to your room...”可知为了记住新的信息，我们应该使用我们的感官，利用我们的想象力创造视觉联系，做不同的事来提醒我们，故选 D。

04

In our lives, pets have become much more than just animals that share our homes. They are cherished companions, offering unconditional love and support that enriches our daily existence in profound ways.

Dogs, often hailed as “man’s best friend,” are a prime example of the deep-seated bond between pets and humans. From the moment a puppy enters a family, it begins to form an emotional connection. They greet us with wagging tails and excited barks after a long day at work, instantly lifting our spirits. Dogs are not only great for companionship but also serve practical purposes. Service dogs, for instance, assist people with disabilities, whether it’s guiding the blind, alerting those with hearing impairments to sounds, or providing support to individuals with mobility issues. Their loyalty makes them invaluable partners in these roles.

Cats, with their independent yet affectionate nature, also hold a special place in many households. A purring cat curled up on our laps can bring a sense of calm and relaxation. They may seem aloof at times, but their gentle nuzzles and soft meows when they seek attention show their love for their human companions. Cats can also be great for reducing stress. Studies have shown that interacting with a cat can lower blood pressure and ease anxiety.

Small pets like rabbits, guinea pigs, and hamsters, though less commonly thought of in terms of close relationships, also offer unique forms of companionship. They may be more timid, but with patience and gentle handling, they can become comfortable around their owners. Watching these small creatures go about their daily activities, such as nibbling on food or playing in their cages, can be a source of simple joy.

The relationship between pets and humans is a two-way street. We provide them with food, shelter, and medical care, while they offer us emotional support, a reason to be more active (especially in the case of dogs that need walks), and a sense of purpose. In fact, for many people living alone, a pet can be their main source of social interaction.

However, this special bond also comes with responsibilities. We need to ensure that our pets are

healthy, happy, and well-cared for. This includes regular vet check-ups, proper nutrition, and sufficient exercise (where applicable). In return, the love and loyalty our pets give us make all the efforts worthwhile.

In conclusion, the relationship between pets and humans is a beautiful and essential part of our lives. It teaches us about love, responsibility, and the simple pleasures that come from sharing our world with another living being. Whether it's a dog, a cat, or a small furry friend, these pets become an integral part of our families, and their presence makes our lives more fulfilling.

1. Why are dogs often called “man’s best friend”?
 - A. Because they are the most popular pets.
 - B. Because they can perform various tasks for humans.
 - C. Because they offer unconditional love and practical assistance.
 - D. Because they are easy to train.
2. How do cats help reduce stress?
 - A. By always being affectionate and clingy.
 - B. By purring and seeking attention in a gentle way.
 - C. By playing energetic games with their owners.
 - D. By being independent and not demanding much attention.
3. What is the significance (重要性) of small pets like rabbits and guinea pigs in human-pet relationships?
 - A. They are mainly for show and decoration.
 - B. They offer unique forms of companionship and simple joy.
 - C. They are more intelligent than other pets.
 - D. They require very little care compared to dogs and cats.
4. What does the author mean by “the relationship between pets and humans is a two-way street”?
 - A. Pets and humans should walk on the street together.
 - B. Both pets and humans should be trained.
 - C. Humans should only focus on taking care of pets.
 - D. Pets give and get care and love from humans.

【答案】1. C 2. B 3. B 4. D

【解析】本文是一篇说明文，围绕宠物与人类的关系展开，介绍宠物作为珍贵伙伴，给人类带来无条件的爱、情感支持、实际帮助等，强调宠物与人类的关系是生活中美好且重要的部分，让生活更充实。

1. 细节理解题。根据“Dogs, often hailed as ‘man’s best friend,’...They are great for companionship...”

Service dogs...assist people with disabilities...Their loyalty make them invaluable partners”可知，狗被称为“人类最好的朋友”是因为它们给予无条件的爱 and 实际帮助。故选 C。

2. 细节理解题。根据“Cats...A purring cat curled up on our laps can bring a sense of calm and relaxation...their gentle nuzzles and soft meows when they seek attention show their love...Cats can also be great for reducing stress”可知，猫通过咕噜咕噜叫、用温柔的方式寻求关注来帮助减压。故选 B。

3. 细节理解题。根据“Small pets like rabbits...also offer unique forms of companionship...Watching these small creatures go about their daily activities, such as nibbling on food or playing around in their cages, can be a source of simple joy”可知，小型宠物提供独特的陪伴和简单的快乐，故选 B。

4. 词句猜测题。根据“We provide them with food, shelter, and medical care, while they offer us emotional support...”可知，“宠物和人类的关系是双向道”意思是宠物和人类互相给予和获得关爱与照顾。故选 D。

05

Today, teachers find themselves in a challenging position regarding generative AI. As schools often adapt slowly to new technology, this new wave has raised an important question: Will AI help make education fairer, or will it create even bigger gaps in our schools?

We have been studying how public school teachers feel about using generative AI. Our research showed that poor training and unclear guidance could make existing differences among schools even worse.

We interviewed 22 teachers in a large public school district in the US that started using AI early and with great excitement. Many teachers said AI saved them hours of work each week. One teacher even called it a “thought partner” that reduces stress and lets them focus on what matters most: their students.

However, not everyone felt ready to use AI well. Some teachers said they did not have enough training to understand AI or use it properly in their lessons.

Past research on new technologies showed a clear pattern: Schools with fewer resources, especially those serving disadvantaged students, are usually the least prepared to help teachers make the most of new technologies. Meanwhile, well-resourced schools are much more likely to offer training. As a result, new technologies often make the education gap wider.

Our research also emphasized another point, which is especially important in the age of AI: Teaching is built on human relationships. As one middle school teacher said, a machine can provide information, but most kids need a social environment and a caring teacher to guide them. Teachers are crucial in determining how and whether AI, like all new technologies, is used to support their teaching and student

learning. Studies show that schools with more resources can help teachers use technologies to make their connection with students stronger instead of weakening it. That's why we believe the choices we make about AI right now will have a huge impact on fairness in education.

1. What can we know about the 22 teachers interviewed?
 - A. Most of them considered AI a threat to their teaching jobs
 - B. They all received sufficient training on using AI in lessons
 - C. Many of them benefited from using generative AI in their work
 - D. They thought AI could completely replace teachers' guidance for students
2. We can know that schools with more resources _____.
 - A. Tend to use AI to weaken the connection between teachers and students
 - B. Are more likely to help teachers use AI in a student-friendly way
 - C. Have already solved the problem of education unfairness with AI
 - D. Pay less attention to teachers' training than schools with fewer resources
3. It can be inferred from Paragraph 5 that _____.
 - A. Schools with fewer resources will stop using new technologies like AI
 - B. Disadvantaged students are not willing to accept AI-supported teaching methods
 - C. The education gap may become larger due to the unequal distribution of resources
 - D. Well-resourced schools will reduce training for teachers to control costs
4. What does the teacher's comment mean about the role of teachers in the age of AI?
 - A. Teachers can be replaced by AI when providing knowledge to students
 - B. The human connection built by teachers is irreplaceable for students' growth
 - C. AI is better than teachers at creating a social learning environment for students
 - D. Teachers should learn from AI to improve their ability to guide students
5. What is the main idea of the passage?
 - A. To advise teachers to use generative AI as a "thought partner" in daily work
 - B. To introduce the training problems that teachers face when using AI
 - C. To prove that well-resourced schools can make full use of AI in teaching
 - D. To discuss the double-edged impact of generative AI on education fairness

【答案】CBCBD

【解析】本文探讨生成式人工智能对教育公平的影响，研究表明其能助力教师工作，但资源不均或加剧教育差距，且教师的人文作用不可替代。

1. C 细节理解题。根据文中 "Many teachers said AI saved them hours of work each week. One teacher

even called it a ‘thought partner’”可知，受访的很多教师从生成式 AI 的使用中获益，选项 C 正确。

2. B 细节理解题。根据文中 “Schools with more resources can help teachers use technologies to make their connection with students stronger”可知，资源丰富的学校更能帮助教师以利于学生的方式使用 AI，选项 B 正确。

3. C 推理判断题。根据第五段内容，资源匮乏的学校难以帮助教师用好新技术，而资源充足的学校则相反，由此可推断资源分配不均会让教育差距变大，选项 C 正确。

4. B 推理判断题。根据教师的评价 “a machine can provide information, but most kids need a social environment and a caring teacher to guide them”可知，教师所建立的人文联结对学生成长是不可替代的，选项 B 正确。

5. D 主旨大意题。文章开篇提出 AI 对教育公平的双重影响问题，随后结合研究分析其利弊，核心是讨论生成式 AI 对教育公平的双刃剑效应，选项 D 正确。

06

Inventions have played an important role in shaping the world we live in today. From the wheel to the Internet, these inventions have changed the way we live, work and communicate. Let’s look back on some of the most important inventions in human history and their influence on society.

One of the earliest and most influential inventions is the wheel. The wheel has been used for transportation, farming, and manufacturing (制造业) for thousands of years. It completely changed the way goods were transported and traded, making it easier and faster to move from one place to another.

The telephone is perhaps one of the most recognizable inventions of all time. Alexander Graham Bell’s invention in 1876 revolutionized communication, allowing people to talk to each other over long distances. It has become an important tool for businesses, governments, and individuals alike.

Finally, the Internet is perhaps the most transformative (变革性的) invention of our time. Created by Tim Berners-Lee in the 1980s, it has changed the way we get information, connect with others, and do business. It has also had a great influence on culture, entertainment, and social media.

In conclusion, inventions have played a key role in shaping human history and society. And inventors have created the great inventions. If we want to keep pushing the boundaries (界限) of what is possible, it is clear that our world needs more creative and talented inventors.

1. How does the writer develop his idea?

A. By giving examples.

B. By raising questions.

C. By comparing differences.

D. By explaining the result.

2. What’s the influence of the wheel?

A. It divides the world into parts.

B. It helps people to talk to each other over long

distances.

C. It changes the way people get information. D. It changes the way of food transportation and trade.

3. What does the underlined word “revolutionized” mean in Paragraph 3?

A. Invited. B. Compared. C. Changed. D. Invented.

4. What can we know from the last paragraph?

A. Keys play a role in history and society. B. Creative and talented inventors are needed.

C. It is not possible to invent more inventions. D. Some inventions don't match well with modern life.

5. What is the best title for the text?

A. Inventors came from different times B. Life in different countries in the world

C. Inventions in history and their influence D. Information during human history and society

【答案】1. A 2. D 3. C 4. B 5. C

【解析】本文是一篇说明文。主要讲述了人类历史上一些最重要的发明及其对社会的影响。

1. 推理判断题。根据第二段“One of the earliest and most influential inventions is the wheel.”和第三段“The telephone is perhaps one of the most recognizable inventions of all time.”及第四段“Finally, the Internet is perhaps the most transformativ invention of our time.”可知，作者通过举例子说明他的观点。故选 A。

2. 细节理解题。根据第二段“It completely changed the way goods were transported and traded, making it easier and faster to move from one place to another.”可知，它彻底改变了货物运输和交易的方式，使人们从一个地方到另一个地方更容易、更快捷。由此可知，车轮改变了食品运输和贸易的方式。故选 D。

3. 词义猜测题。根据第三段“Alexander Graham Bell's invention in 1876 revolutionized communication, allowing people to talk to each other over long distances.”可知，亚历山大·格雷厄姆·贝尔在 1876 年的发明彻底改变了通信，使人们可以远距离交谈。由此可知，此处指电话改变了通讯方式，因此“revolutionized”意思是“彻底改变”，因此“Changed 改变”符合题意。故选 C。

4. 细节理解题。根据最后一段“If we want to keep pushing the boundaries of what is possible, it is clear that our world needs more creative and talented inventors.”可知，我们需要有创造力和才华的发明家。故选 B。

5. 主旨大意题。根据第一段“Inventions have played an important role in shaping the world we live in today. From the wheel to the Internet, these inventions have changed the way we live, work and communicate.”可知，发明在塑造我们今天生活的世界方面发挥了重要作用。从车轮到互联网，这些发明改变了我们生活、工作和交流的方式，再结合全文信息可知，本文主要介绍了轮子、电话和互联网这三项重大发明及其对社会的深远影响。因此本文的最佳标题为“历史上的发明及其影响”。

故选 C。

07

Disney's much-awaited second Zootopia movie, *Zootopia 2*, has set a new standard in China's film business. It broke the single-day box office record for foreign animated films.

The film won over audiences when it first came out on November 26, 2025. By 8 p. m. that day, it had made 213 million yuan. At the end of its first day, the number reached 228 million yuan. For people who work in the film industry, this amazing result was not a surprise.

Before its release, the film had already made history. It got 309.1 million yuan in pre-sales over nine days—setting a new record for animated films in China. It also got 254,000 screenings on its first day, which is the highest number for any foreign film in the Chinese market. This great excitement led to a high score of 9.7 out of 10 on major ticket-selling platforms after the film came out.

Several things helped the film achieve this huge success. First, the two much-loved characters—Officer Judy Hopps and Nick Wilde—came back for another interesting adventure. This brought fans back to the lively world of Zootopia. In their new case, they find out hidden facts about a new character named Gary De'Snake. As they work, they discover the situation is more complicated than they first thought.

The film also does a good job of talking about important ideas like accepting others and understanding each other. Its story is easy to follow. Besides, Disney ran a full marketing campaign. This included working with partners and holding special events all over China, which made more people know about the film. Most importantly, the movie's positive message about teamwork and bravery really touched the viewers.

Beyond making a lot of money, *Zootopia 2*'s success shows how closely Chinese audiences connect with these characters and their world. The film proves that well-made animated movies, with ideas like friendship and peace that everyone can understand, can do well both with critics and at the box office. These movies can even cross cultural lines.

1. What helps *Zootopia 2* succeed so much in China most?

A. People have waited for its release for a long time

- B. The popular pair Judy Hopps and Nick Wilde come back
- C. Disney did a lot of marketing activities all over China
- D. Its positive message about working together and being brave touches viewers
2. We can know from the passage that Gary De'Snake's story _____.
- A. makes the film's plot more attractive and complex
- B. has no connection with Judy Hopps and Nick Wilde
- C. is the only reason why fans loved the film
- D. is too simple to interest the audience
3. Which sentence is TRUE according to the passage?
- A. *Zootopia 2* had more screenings on its first day than any other Chinese film
- B. The film got a score of 9.7/10 on ticket platforms before it came out
- C. The story of *Zootopia 2* focuses on the ideas of inclusion and understanding
- D. *Zootopia 2*'s box office by 8 p. m. on its first day was higher than its total that day
4. What can we learn about *Zootopia 2*'s pre-sales from the passage?
- A. It got over 300 million yuan in pre-sales within one week
- B. It set a new record for all foreign films in China
- C. It helped the film break the first-day box office record
- D. It was higher than the film's total first-day box office
5. What is the main idea of the passage?
- A. To tell about the story and characters of *Zootopia 2*
- B. To explain why *Zootopia 2* made so much money.
- C. To compare *Zootopia 2* with other foreign animated films
- D. To talk about *Zootopia 2*'s influence on culture around the world

【答案】DACDB

【解析】迪士尼的《疯狂动物城 2》于 2025 年 11 月 26 日上映后创多项票房纪录，文章还分析了其成功原因及影片带来的相关启示。

1. D 细节理解题。根据文中 “Most importantly, the movie's positive message about teamwork and bravery really touched the viewers” 可知，团队合作与勇敢的积极主题打动观众是影片大获成功的最主要原因，故选项 D 正确。

2. A 细节理解题。根据文中 “In their new case, they find out hidden facts about a new character named Gary De'Snake. As they work, they discover the situation is more complicated than they first thought” 可知，盖瑞·德斯内克的相关剧情让影片情节更吸引人且更复杂，选项 A 正确。

3. C 推理判断题。根据文中 “The film also does a good job of talking about important ideas like accepting others and understanding each other” 可知，影片围绕包容与理解的主题展开，选项 C 正确。

4. D 细节理解题。根据文中 “it had made 213 million yuan. At the end of its first day, the number reached 228 million yuan” 和 “it got 309.1 million yuan in pre-sales over nine days” 可知，影片预售额高于首日总票房，选项 D 正确。

5. B 主旨大意题。文章先介绍影片票房等亮眼成绩，随后重点分析了角色回归、主题表达、营销推广等成功原因，核心是解释影片为何能收获高票房，选项 B 正确。

08

The 15th National Games of China ended successfully on the evening of November 21, 2025, in Shenzhen. The big closing event took place at Qianhai Happy Theater.

This ceremony had the theme “Starry Sea” and was a wonderful show. It was the first time a National Games closing event happened outside a normal stadium, using the ocean and sky as its background. The performances mixed old traditions with new ideas. They showed traditional arts like lion dances and Cantonese opera along with modern music and dancing. A special part was the dragon boat performance, which joined sports with Chinese culture.

New technologies like 3D without glasses and robot technology were also shown, making the “tech + sports” theme clear. Around 120 performers from Guangdong, Hong Kong, and Macao played together in the “Greater Bay Area Symphony.” They sang the famous Cantonese song “Red Sun” and showed how closely connected the three areas are.

The Games themselves were very successful. Athletes made amazing achievements, breaking 8 world records, 5 youth world records, and 13 Asian records. Many young stars appeared: Zhang Zhanshuo, 18 years old, won five gold medals in swimming. Yu Zidi, just 13, broke the Asian record in the women’s 200m medley. On the track, Chen Yujie, 16, showed great speed and energy in short races.

At the end of the ceremony, the Games flag was given to Hunan Province, which will host the 16th National Games in 2029. This will be the first time the event happens in central China. The 15th National Games celebrated great sports moments and helped connect the Guangdong-Hong Kong-Macao area better through its shared hosting plan. As we wait for 2029, we can say: Goodbye, Guangdong! See you in Hunan!

1. Which of the following is true about the closing ceremony?

A. It was held in a normal stadium as usual.

B. It didn’t use any new technologies.

- C. Performers only came from Guangdong Province.
- D. It combined traditional arts with modern elements.
2. What can we know from the passage about the closing ceremony?
- A. It used more old-style things than new technology.
- B. The “Greater Bay Area Symphony” was the most liked part.
- C. It was the second time a National Games ceremony was held in the open air.
- D. The background mixed sea and air together, showing the Greater Bay Area style.
3. Why does the passage talk about the teenage athletes in Paragraph 3?
- A. To show that the Games help young athletes grow
- B. To show young athletes are more energetic than older ones
- C. To explain why so many records were broken
- D. To tell us who the most famous athletes were
4. What is different about the 16th National Games?
- A. Many places will host it together
- B. It will focus more on traditional culture
- C. It will help develop sports in central China.
- D. It will break more records than the 15th National Games.
5. What is the deeper meaning of the 15th National Games?
- A. It only focused on showing Chinese traditional culture.
- B. It promoted the connection in the Greater Bay Area.
- C. It proved that young athletes are better than older ones.
- D. It made Shenzhen the only host city of national sports events.

【答案】DDACB

【解析】2025 年第十五届全运会在深圳落幕，闭幕式特色鲜明，赛事成果丰硕，赛事促进了大湾区联动，下届将由湖南承办。

1. D 细节理解题。根据第二段 “The performances mixed old traditions with new ideas”，可知闭幕式将传统艺术与现代元素结合，故选 D。
2. D 细节理解题。根据第二段 “using the ocean and sky as its background” 及第三段体现的大湾区元素，可知其背景融合海天，彰显大湾区风格，故选 D。
3. A 推理判断题。第三段提到多位年轻运动员取得佳绩，结合语境可推断是为体现赛事助力青年运动员成长，故选 A。
4. C 推理判断题。根据第五段 “this will be the first time the event happens in central China”，可知第

十六届全运会将推动中部地区体育发展，故选 C。

5. B 推理判断题。根据第五段 “helped connect the Guangdong-Hong Kong-Macao area better”，可知赛事深化了大湾区联动，故选 B。

09

For the past 50 years, the highest-paying jobs have focused on knowledge work—especially in science, technology and analysis. But the rapid rise of generative AI is beginning to change that. Companies are already considering replacing certain white-collar roles with AI. This change raises an important question: Will the future economy still need as many human workers?

The impact affects not only future workers but also teachers and parents. For years, schools have focused on getting students ready for cognitive jobs. Now, with AI’s development, we need to decide which skills students truly need.

In the past, machines took over simple physical tasks. But now, AI can write, create code, and process information in ways that seem human. As a result, some beginner-level knowledge jobs may reduce. However, AI still struggles with tasks that require deep reasoning, empathy(共情), or dealing with new situations. It cannot truly understand human feelings.

That’s why “soft skills” will become more important than ever. Collaboration(协作), emotional awareness and creative problem-solving are difficult for AI to learn. The good news is that these skills can be taught in schools together with traditional subjects such as math and reading.

For example, teachers can use reflection exercises to help students recognize their own feelings. Tasks like “Write about a time you helped someone today” or “Describe how you solved a hard problem.” encourage self-awareness and empathy.

Students can also practice solving open-ended, real-world problems such as designing a social campaign or discussing historical decisions. These activities help develop flexible thinking and teamwork—skills that AI cannot copy.

A new challenge is that students may depend on AI to complete tasks, ignore the learning process. But true understanding requires effort. Teachers should stress the value of slower learning—through handwriting and hands-on projects（实践项目）—so that students can learn key skills before using AI tools.

No one knows how AI will change the job market. However, the most important lesson schools can teach is this: Don’t let shortcuts replace learning. Human abilities—especially the ability to work with others to solve difficult problems—will always matter.

1. What is special about AI compared with earlier automation(自动化)?

- A. It can replace manual labor. B. It can do some cognitive jobs.
C. It can finish work independently. D. It can understand human emotions.
2. Why are soft skills becoming more important?
A. They are still difficult for AI to learn. B. They are necessary for controlling AI.
C. They are easier to measure and test. D. They can help companies save costs.
3. What can teachers do to help students build key skills?
A. Stop students from using AI to do tasks. B. Reduce the teaching of traditional subjects.
C. Show the importance of slower learning. D. Encourage students to do more exercises.
4. What does the last paragraph want to tell us?
A. AI's influence on the job market is totally unclear now.
B. Students should avoid using AI tools in their studies
C. Students should value learning, and human abilities are important.
D. AI will soon change all the existing jobs, we must be prepared well.
5. How does the author feel about the future of human workers?
A. Worried. B. Doubtful. C. Uncaring. D. Optimistic

【答案】BACCD

【解析】生成式 AI 冲击认知类工作，软技能愈发重要，学校需调整教学方向，培养 AI 难替代的人类核心能力。

1. B 细节理解题。根据第三段 “In the past, machines took over simple physical tasks. But now, AI can write, create code, and process information in ways that seem human”，可知 AI 与早期自动化的区别是能做部分认知类工作，故选 B。

2. A 推理判断题。根据第四段 “Collaboration, emotional awareness and creative problem-solving are difficult for AI to learn”，可知软技能重要是因 AI 难以掌握，故选 A。

3. C 细节理解题。根据第七段 “Teachers should stress the value of slower learning — through handwriting and hands-on projects”，可知教师应强调慢学习的重要性以帮助学生培养关键技能，故选 C。

4. C 主旨大意题。根据最后一段 “the most important lesson schools can teach is this: Don't let shortcuts replace learning. Human abilities...will always matter”，可知核心是让学生重视学习，人类能力很重要。故选 C。

5. D 推理判断题。根据文章强调人类软技能的不可替代性及 “Human abilities...will always matter”，可推断作者对人类工作者的未来持乐观态度，故选 D。

On November 1, 2025, the Grand Egyptian Museum (GEM 大埃及博物馆) officially opened to the public. It is one of the most wonderful cultural projects of the 21st century. The museum covers about 500,000 square meters. That is as big as 70 football fields or twice the size of the Louvre Museum in Paris. So, it is famous as the world's largest museum that focuses on just one civilization. What's special is that it is only two kilometers away from the Great Pyramids of Giza. This makes a great connection between the ancient wonders and modern building skills.

International media have spoken highly of the museum. The Financial Times said it is a “must-see place”. It also talked about the museum's excellent design, which gives visitors more than the usual museum experiences. National Geographic pointed out its unique location. It noted that the museum links the “view of the Pyramids with the treasures of Tutankhamun” very well. The building's design was made by Heneghan Peng Architects after an international competition. The modern structure respects and matches the ancient monuments, but it still has its own special style.

Inside the museum, visitors can see a fantastic collection of old things. Since Tutankhamun's treasures were found in 1922, this is the first time that all of them are shown together. These treasures include his famous golden mask and throne. A big staircase takes visitors past many royal statues and old objects. At the end, they can get an amazing direct view of the pyramids through the large glass wall. Unlike Cairo's old Egyptian Museum, which was only 10,000 square meters, this big space can show more than 100,000 artifacts at the same time. It lets visitors have a new and deep experience that they have never had before.

The opening of the museum is a very important moment for Egypt. People think it is key to making its tourism industry better. As The New York Times said, the GEM is “a bridge between past and future”. It connects ancient culture with modern ideas and dreams. This great museum not only keeps the wonderful past alive but also encourages young people to love the richness of ancient Egyptian civilization.

1. What does The New York Times say the GEM is used for?

- A. It connects the past with the present and future
- B. It helps make Egypt's tourism industry better
- C. It keeps ancient Egyptian civilization safe
- D. It gives visitors a new experience they've never had before

2. What can visitors do for the first time at the GEM?

- A. See the Great Pyramids directly through glass
- B. Walk on a big staircase with royal statues

- C. See all of Tutankhamun's treasures shown together
- D. Visit a museum designed by an international team
3. Why does the GEM's location near the Great Pyramids matter?
- A. It allows the museum to borrow artifacts from the pyramids easily
- B. It creates a special connection between ancient and modern culture
- C. It helps reduce the cost of building the modern museum
- D. It makes the museum's glass wall more impressive to visitors
4. What can we infer about Egypt's expectation for the GEM?
- A. It hopes the museum will attract more young people to study architecture
- B. It expects the museum to become the only cultural landmark in the world
- C. It believes the museum will play a key role in developing its tourism
- D. It wants the museum to replace the Louvre Museum's reputation
5. What does the international media's praise imply about the GEM?
- A. It has better artifacts than any other museum in the world
- B. Its design and location make it a unique and valuable attraction
- C. It will soon become the most visited museum in Egypt
- D. Its opening has solved all of Egypt's tourism problems

【答案】ACBCB

【解析】2025 年 11 月 1 日大埃及博物馆正式开放，它规模宏大、设计独特、馆藏丰富，获国际媒体赞誉，对埃及旅游业和文化遗产意义重大。

1. A 细节理解题。文中明确提到 “As The New York Times said, the GEM is ‘a bridge between past and future’”，即《纽约时报》称其是过去与未来的桥梁，也就是连接过去、现在与未来。故选 A。
2. C 细节理解题。根据 “Since Tutankhamun's treasures were found in 1922, this is the first time that all of them are shown together” 可知，游客在该博物馆能首次看到图坦卡蒙的所有珍宝一同展出。故选 C。
3. B 推理判断题。文中提到博物馆距吉萨大金字塔仅两公里，“This makes a great connection between the ancient wonders and modern building skills”，由此可推知其地理位置的意义在于搭建了古代与现代文化的特殊联系。故选 B。
4. C 推理判断题。文中指出 “The opening of the museum is a very important moment for Egypt. People think it is key to making its tourism industry better”，可推断埃及期望该博物馆能在旅游业发展中发挥关键作用。故选 C。
5. B 推理判断题。国际媒体称赞博物馆是 “必去之地”，肯定其出色设计和独特地理位置，这些

赞誉暗示其设计与位置使其成为独特且有价值的景点。故选 B。

11

Recently, China's Ministry of Education has released ten key measures to further improve the mental health of primary and secondary school students. Among these measures, developing healthy internet usage habits has drawn wide attention.

The background of these measures is the growing mental health challenges for students. With the rapid development of the internet, 97.3% of minors in China are internet users, according to the 6th Survey Report on Internet Usage of Chinese Minors. Too much internet use has caused problems like poor sleep, declining eyesight and distracted attention among students. Worse still, harmful online content, such as information that causes anxiety, encourages unhealthy competition, or is simply rude, seriously threatens their mental health.

To solve these issues, the measures put forward clear requirements. Schools must regulate the management of intelligent terminal products brought by students and strictly ban mobile phones and other electronic devices from entering classrooms. Meanwhile, students and parents are encouraged to jointly carry out a "Screen-Off Campaign" (息屏行动) to reduce too much dependence on the internet.

In addition, relevant departments will push website platforms to fulfill their supervisory responsibilities. They will also improve algorithm recommendation systems. This is to prevent harmful information from being sent to students. At the same time, they will firmly stop illegal behaviors online. The promotion of the "Minor(未成年人) Protection Mode" will also continue to make the online environment cleaner for young people.

These measures aim to guide students to use the internet healthily through the joint efforts of schools, families and society.

1. What is the main reason for releasing the ten key measures?

- A. To make students spend more time on the internet
- B. To deal with students' increasing mental health problems
- C. To help the development of intelligent terminals
- D. To make fewer minors use the internet

2. Which of the following is NOT a problem from using the internet too much?

- | | |
|---------------------------|-------------------------|
| A. Poor sleep quality | B. Declining eyesight |
| C. Enhanced concentration | D. Distracted attention |

3. We can guess from the passage that _____.

- A. the "Minor Protection Mode" helps make a better online environment.

- B. relevant departments will stop using algorithm systems
- C. mobile phones are allowed in school classrooms
- D. all harmful online information can be easily kept away from
4. Which of the following statements is true according to the passage?
- A. Too much internet use can help students improve their concentration.
- B. Solving students' online health problems requires multi-party cooperation
- C. The "Minor Protection Mode" has already stopped all illegal online behaviors.
- D. "Screen-Off Campaign" is to completely ban students from using the internet.
5. Why does the article mention the "6th Survey Report on Internet Usage of Chinese Minors"?
- A. To show the popularity of online education.
- B. To provide evidence for the widespread internet use among minors.
- C. To highlight the benefits of internet access.
- D. To compare internet usage between different age groups.

【答案】BCABB

【解析】文章大意：教育部发布十项措施改善中小学生心理健康，重点关注健康用网，分析措施出台背景、具体要求，旨在通过家校社协作引导学生健康用网。

1. B 推理判断题。根据 “The background of these measures is the growing mental health challenges for students” 可知，发布措施的核心原因是应对学生日益严重的心理健康问题。故选 B。
2. C 细节判断题。文中明确提到过度用网导致 “poor sleep（睡眠差）” “declining eyesight（视力下降）” “distracted attention（注意力分散）”，“Enhanced concentration（注意力提升）” 并非问题，与原文不符。故选 C。
3. A 推理判断题。根据 “The promotion of the 'Minor Protection Mode' will also continue to make the online environment cleaner” 可知，该模式有助于营造更好的网络环境。故选 A。
4. B 细节判断题。根据 “through the joint efforts of schools, families and society” 可知，解决问题需多方合作。故选 B。
5. B 推理判断题。提及该报告是为了用 “97.3% 未成年人上网” 的数据，证明未成年人上网现象普遍，为措施出台提供事实依据。故选 B。

12

Have you ever imagined a robot washing your hair for you? This is not a science fiction anymore thanks to the invention of AI hair washing machines. Many AI hair washing stores have been opened in several areas in Shenzhen, such as Nanshan, Futian and Longhua. It has become a hot topic on the Internet and more such stores are on the way.

AI hair washing is popular in Shenzhen, but it is not very expensive. With just 9.9 *yuan*, you can experience it. After a scalp (头皮) check, all you need to do is to lie down on a bed and put your head into the machine. Then, a worker will decide on the setting according to your hair length and your scalp type. After that, press the start key and the machine will operate, using infrared technology (红外技术) to send water to the exact right places. It can even change water temperature by itself. However, it doesn't mean that no human workers are required. Workers still need to help with things like preparing the towels and drying the hair.

Curious about the new technology, many people have tried this new way of hair washing. However, people have made different comments about this. Some say, "It works better than I thought and my hair is cleaner than I expected." However, others comment, "The machine is not good enough, because it can't get to my itchy (发痒的) spots correctly."

New things need time. I believe that the new machine will become better and make our lives more convenient in the future.

16. How did the writer introduce the topic in Paragraph 1?

- A. By raising a question.
- B. By telling his stories.
- C. By describing a scene.
- D. By giving an example.

17. What does the underlined part "are on the way" probably mean?

- A. Stay unknown.
- B. Keep appearing.
- C. Become outdated.
- D. Remain special.

18. What can we know about the AI hair washing in Shenzhen?

- A. It costs more than 10 *yuan*.
- B. It doesn't include a scalp check.
- C. It can be found in several areas.
- D. It has the same setting for everyone.

19. Why do many people try the AI hair washing service?

- A. Because it can dry their hair by itself.
- B. Because it's better than the traditional way.
- C. Because there are no other hair washing stores.
- D. Because they have an interest in the new technology.

20. What is the best title for the passage?

- A. The development of AI hair washing technology
- B. Workers' important role in AI hair washing stores
- C. AI hair washing: new service popular in Shenzhen
- D. Infrared technology: the secret of AI hair washing

【答案】16. A 17. B 18. C 19. D 20. C

【解析】本文是一篇说明文，主要介绍了深圳出现的人工智能洗头服务，包括其价格、操作流程、人们的不同评价以及作者对该技术未来发展的展望。

16. 推理判断题。根据第一段开头“Have you ever imagined a robot washing your hair for you?”可知，作者通过提出一个问题来引入“人工智能洗头机”这一主题。故选 A。
17. 词义猜测题。根据“Many AI hair washing stores have been opened in several areas in Shenzhen...”以及“it has become a hot topic on the Internet”可知，人工智能洗头店已在深圳多地开业且成热门话题，由此可推测“more such stores are on the way”指“更多此类店铺即将出现”。故选 B。
18. 细节理解题。根据“Many AI hair washing stores have been opened in several areas in Shenzhen”可知，C 选项“可在深圳多个区域找到”正确。故选 C。
19. 细节理解题。根据“Curious about the new technology, many people have tried this new way of hair washing”可知，人们尝试人工智能洗头服务是因为对这项新技术感兴趣。故选 D。
20. 最佳标题题。文章开篇引入深圳的人工智能洗头服务，随后介绍其价格、操作流程、人们的评价，核心围绕“深圳热门的人工智能洗头新服务”展开。C 选项“人工智能洗头：深圳热门的新服务”能概括全文主旨。故选 C。

13

①Do you often use social media (社交媒体) in your life? Social media is a place where users can share photos and talk to each other online. It is very popular—millions of people use social media every day. People are discussing whether social media has a positive or negative effect (积极或消极影响) on young people. Although some people think social media is a positive thing, many are worried about the pernicious things it brings to young people.

②James, a 15-year-old student, thinks that social media has many benefits (益处). “I get very nervous when I talk to people in real life—I find it so much easier to express myself when I use social media. Another benefit is that I hardly ever forget anyone’s birthday now because I can look it up online!” Lots of users agree that social media helps young people stay connected with their friends and make new friends from around the world.

③However, social media also has many problems. Social media may help young people find friends, but it also makes it easier for them to get hurt. Some parents believe that social media makes it harder for families to spend time together. They say their children are so crazy about social media that they pay less attention to the rest of their family. Many teachers think social media can distract (使分心) their students from schoolwork.

④It’s true that social media has some problems, and it is very important to control the time we spend online. However, social media can be a positive thing for young people.

13. What does the underlined word “pernicious” mean in Paragraph 1?

- A. Harmful. B. Strange. C. Amazing. D. Special.

14. What do some parents think of social media?

A. It helps families get closer.

B. It improves children's communication skills.

C. It makes family time more difficult.

D. It helps children make new friends around the world.

15. What's the text mainly about?

A. The ways of using social media.

B. The importance of social media.

C. The reasons why social media is popular.

D. The effects of social media on young people.

16. How is the text organized? (①=Paragraph 1, ②=Paragraph 2, ...)

【答案】13. A 14. C 15. D 16. B

【解析】本文是一篇议论文。文章围绕社交媒体对年轻人的影响展开讨论，通过列举不同观点进行分析论证。

13. 词句猜测题。根据前文“People are discussing whether social media has a positive or negative effect (积极或消极影响) on young people.”以及“Although some people think social media is a positive thing, many are worried about...”可知，这里说的是社交媒体给年轻人带来的不好的东西，“pernicious”意思应该是“有害的”，与“Harmful”意思相符。故选 A。

14. 细节理解题。根据“Some parents believe that social media makes it harder for families to spend time together.”可知，一些家长认为社交媒体让家人共度时光变得更加困难。故选 C。

15. 主旨大意题。本文开篇提出人们在讨论社交媒体对年轻人的影响，接着分别阐述了社交媒体对年轻人的益处以及存在的问题，所以文章主要围绕社交媒体对年轻人的影响展开。故选 D。

16. 篇章结构题。结合全文可知，文章第①段提出人们在讨论社交媒体对年轻人的影响这一话题；第②段阐述社交媒体对年轻人的积极影响；第③段转折，讲述社交媒体存在的问题；第④段进行总结，表明社交媒体虽有问题，但对年轻人也可以是积极的事物。整体结构是“提出问题—分析利弊—得出结论”，即“①/②③/④”。故选 B。

14

①Albert Einstein once said, “I have no special talents. I am only curious.” The greatest inventions in history would be impossible without curiosity (好奇).

②Curiosity can bring new discoveries. Benjamin Franklin is a great example. He was drawn to electricity and had a deep curiosity about its nature. He tried to find out all about it. For example, he flew a kite during a storm. His curiosity led him to invent the lighting rod. This invention protects buildings from lighting.

③Curiosity can also make people brave. Just look at Wan Hu, the Ming Dynasty pioneer of space exploration. He was so curious about space that he invented a “flying chair”! He lost his life while testing this invention. Although he failed, his curiosity gave future explorers ideas. People learnt from his example, and created safer ways to explore space.

④But curiosity is more than just doing dangerous things. It also drives people towards certain goals. Zhang Heng, a Chinese scientist and inventor, was curious about the world: how did everything in the world move? He spent years studying the sky and the earth. Finally, he drew China’s first star map, and invented the first earthquake detector. His curiosity continues to influence scientists today.

⑤As Jacques Cousteau said, “What is a scientist after all? It is a curious man looking through a keyhole, the keyhole of nature, trying to know what’s going on.” Curiosity is the key. It opens one door after another for us to discover a new world.

33. Why is Albert Einstein’s saying mentioned in Paragraph 1?

- A. To show that he was not proud. B. To introduce the topic of curiosity.
C. To explain the reason for his success. D. To compare him with other scientists.

34. Whose invention is still used today according to the text?

- A. Wan Hu’s. B. Jacques Cousteau’s. C. Zhang Heng’s. D. Benjamin Franklin’s.

35. Which is the topic sentence of Paragraph 4?

- A. How did everything in the world move?
B. Zhang Heng was curious about the world.
C. Curiosity also drives people towards certain goals.
D. Curiosity is more than just doing dangerous things.

36. How is the text organized? (①=Paragraph 1, ②=Paragraph 2...)

【答案】33. B 34. D 35. C 36. A

【解析】本文主要讲述了好奇心在人类历史中的重要性，并通过多个例子说明好奇心如何推动科学发现和发明创造。

33. 细节理解题。根据“Albert Einstein once said... The greatest inventions in history would be impossible without curiosity (好奇).”可知，引用爱因斯坦的话是为了引出“好奇心”这一主题。故选 B。

34. 细节理解题。根据“Benjamin Franklin... His curiosity led him to invent the lightning rod. This invention protects buildings from lightning.”可知，富兰克林发明的避雷针至今仍被用于保护建筑。故

选 D。

35. 主旨大意题。根据“But curiosity is more than just doing dangerous things. It also drives people towards certain goals.”可知，该段主旨句是“好奇心也会推动人们朝着特定目标前进”。故选 C。

36. 篇章结构题。文章结构为：①引出“好奇心”主题；②③④分别从“带来新发现、让人勇敢、推动目标”三个方面阐述好奇心的作用；⑤总结好奇心的意义。对应结构是“总（①）—分（②③④）—总（⑤）”，即选项 A 的图示。故选 A。

15

The number of AI users in China reached 515 million as of June, an increase of 266 million compared to December 2024, according to a report released on Saturday.

The report, released by the China Internet Network Information Center, found that domestically developed AI large models have gained widespread popularity among users.

The report cited a survey showing that more than 90 percent of users prefer domestic large models as their first choice.

AI is being widely used across several fields—including intelligent search, content creation, office productivity assistants and smart hardware—while also being actively explored and used in areas such as agricultural production, industrial manufacturing and scientific research, the report said.

Young and middle-aged users with higher educational backgrounds make up the core user group of AI, according to the report. Among AI users, those aged under 40 account for 74.6 percent, and users with college, bachelor's or higher degrees make up 37.5 percent.

Additionally, with continuous technological advancements, China's influence in the global AI field has been steadily growing, making it a key driving force behind global AI innovation, the report said. As of April, China had filed about 1.58 million AI-related patent applications, accounting for 38.58 percent of the global total -- ranking first in the world. This shows that China plays a key role in global AI innovation.

31. How many AI users were there in China by June 2025?

- A. 266 million. B. 515 million. C. 1.58 million. D. 37.5 million.

32. The word “domestic” in Paragraph 3 most probably means “_____”.

- A. foreign B. outside C. native D. abroad

33. Which of the following is NOT a field where AI is widely used?

- A. Intelligent search. B. Space exploration.
C. Content creation. D. Office productivity assistants.

34. What can we infer from the number of AI users in China mentioned in the report?

- A. All users aged under 40 in China are using AI.
- B. The number of AI users with college degrees is more than 200 million.
- C. The number of AI users in China will be sure more than 800 million by the end of 2025.
- D. The growth rate of AI users in China from December 2024 to June 2025 was relatively fast.
35. Why does the author write the last sentence “This shows that China plays a key role in global AI innovation”?
- A. To explain what a patent is. B. To give an example of an AI tool.
- C. To describe who uses AI in China. D. To show the importance of China’s work in AI.

【答案】31. B 32. C 33. B 34. D 35. D

【解析】本文介绍了中国 AI 用户数量、本土大模型的受欢迎程度、AI 的应用领域及中国在全球 AI 领域的影响力。

31. 细节理解题。根据“The number of AI users in China reached 515 million as of June”可知，截至 2025 年 6 月，中国 AI 用户数量为 5.15 亿。故选 B。

32. 词句猜测题。根据前文“domestically developed AI large models”，可推测 domestic 意为“本土的”，与 native 意思相近。故选 C。

33. 推理判断题。根据“AI is being widely used across several fields—including intelligent search, content creation, office productivity assistants and smart hardware”可知，AI 广泛应用的领域不包括太空探索。故选 B。

34. 推理判断题。根据“an increase of 266 million compared to December 2024”可知，从 2024 年 12 月到 2025 年 6 月，中国 AI 用户增长了 2.66 亿，增速相对较快。故选 D。

35. 词句猜测题。根据前文 “China had filed about 1.58 million AI-related patent applications...ranking first in the world” 可知，作者写最后一句话是为了体现中国在全球 AI 创新中的重要地位。故选 D。

16

Everyone knows magic tricks are fun, but not enough people realize that math can be as well.

Here is one of the most popular tricks to show you how amazing math can be.

Firstly, pick a friend with good math skills. To play the trick, your friend needs to know how to add numbers and do subtraction (减法).

Then, write down 1089 on a piece of paper without showing anyone.

Thirdly, ask your friend to write down a number with three different digits (数位). Tell him not to show you the number. Make sure the three digits cannot be the same. For example, he could pick 481.

Next, let your friend write down the number backwards. For example, 481 backwards is 184.

After that, make it into a subtraction problem. Now your friend has two numbers. Get him to

subtract the smaller one from the larger one. In our example, the result should be $481-184=297$. If the result has only two digits, ask your friend to add a zero at the beginning.

Next step, reverse this number as well. Ask your friend to take his answer and reverse the digits order again. If he added the zero at the beginning, remind him to include it as part of the number. For example, the reverse of 297 is 792.

Here comes the most exciting part. As the final calculation, get your friend to add the last two numbers and write down the result. In our example, $792+297=1089$.

Finally, tell everyone that you know the last number your friend wrote down. Show others the piece of paper with the 1089 you've written down earlier.

In the trick, the last number will always be 1089. If your friend has a different answer, he did not follow instructions, or he made a mistake.

39. To play the trick, how many steps should you follow?

- A. 5. B. 6. C. 7. D. 8.

40. If your friend got “99” after doing the subtraction, what did he need to do?

- A. Go on with the other steps. B. Change the number into 099.
C. Tell others the number he got. D. Choose another number to start again.

41. What does the underlined part “reverse this number” in Paragraph 7 mean?

- A. Get the number subtracted. B. Turn the number upside down.
C. Write down the number backwards. D. Change the order of the number as you like.

42. What can we learn about the trick from the passage?

- A. It is the most popular trick. B. The numbers should be reversed twice.
C. The final number can't always be 1089. D. The trick is friendly to people bad at subtraction.

【答案】39. D 40. B 41. C 42. B

【解析】本文是一篇说明文，介绍了一个神奇的数学魔术，通过一系列的数学操作，最终总能得到数字 1089。文章详细描述了魔术的步骤，并解释了如果结果不是 1089，则可能是操作不当或计算错误。

39. 细节理解题。根据文章中的步骤描述：首先选一个数学好的朋友；然后写下 1089；接着让朋友选一个三位数；再让朋友把这个数倒过来写；之后进行减法运算；如果结果只有两位数，在前面加 0；接着把这个结果再倒过来；最后把最后两个数相加。一共是 8 个步骤，故选 D。

40. 细节理解题。根据文章第六段“If the result has only two digits, ask your friend to add a zero at the beginning.”可知，如果减法结果只有两位数，需要在前面加一个 0。所以如果朋友得到“99”，他需要把它变成“099”，故选 B。

41. 词句猜测题。根据文章第七段“Ask your friend to take his answer and reverse the digits order again.”可知，“reverse this number”指的是把数字的顺序再次倒过来，即“把数字倒着写”，故选 C。
42. 推理判断题。根据文章描述，数字需要被倒过来两次：第一次是朋友最初选的三位数，第二次是减法结果后的数字。因此，选项 B“数字需要被倒过来两次”是正确的。故选 B。

17

What's the largest animal in the world? Where is Denmark? Who made the first pizza?

To answer these questions, you may need an encyclopedia. An encyclopedia is a book with facts on topics in every field of knowledge. Which one should you choose? Encyclopedia Britannica is a good choice.

It is the oldest and largest English-language encyclopedia in the world. It was first published in the 18th century in Scotland. Many people think it is the best encyclopedia.

From the 18th century to the early 20th century, articles in Encyclopedia Britannica were long and hard to understand. It soon became the favorite encyclopedia of scholars. But later, more and more common people began to use Encyclopedia Britannica, because the articles became shorter and easier to read.

Today people still think articles in Encyclopedia Britannica are reliable (可靠的) and well-written. In 2004, it had about 120,000 articles, with 44 million words.

To buy the Encyclopedia Britannica, you have to spend around 1,400 dollars (about 11,200 *yuan*). It also has a CD-ROM version which costs about 50 dollars.

In 1994 Encyclopedia Britannica was first put online. You can read short introductions of articles for free from the website. But for the full text, you have to pay about 12 dollars a month or 70 dollars a year.

1. Which of the answers to the questions may be found in Encyclopedia Britannica?

- A. What is the largest animal in the world? B. Who made the first pizza?
C. Where is Denmark? D. All of the above.

2. Why did common people dislike to use Encyclopedia Britannica at first?

- A. Because it was too expensive.
B. Because they didn't have computers.
C. Because the articles in it were not easy to understand.
D. Because they didn't have any questions.

3. How much do you pay if you want to buy an Encyclopedia Britannica and its CD-ROM version?

- A. About \$1,400. B. About \$1,450 C. About \$11,200 D. About \$70.

4. How long is the Encyclopedia Britannica online now?

A. For 29 years. B. For 12 years. C. For one century. D. For 18 years.

5. What is the best title for the passage?

A. Encyclopedia Britannica. B. How to Find Answers in an Encyclopedia.
C. Useful Websites in Our Daily Lives. D. The Power of Knowledge.

【答案】1. D 2. C 3. B 4. A 5. A

【解析】本文是一篇说明文，主要介绍了《大英百科全书》。

1. 细节理解题。根据“What’s the largest animal in the world? Where is Denmark? Who made the first pizza?”及“To answer these questions, you may need an encyclopedia.”可知，A、B、C 三个问题都可以在《大英百科全书》中找到，故选 D。

2. 细节理解题。根据“From the 18th century to the early 20th century, articles in Encyclopedia Britannica were long and hard to understand. It soon became the favorite encyclopedia of scholars. But later, more and more common people began to use Encyclopedia Britannica, because the articles became shorter and easier to read.”可知，普通人一开始不喜欢使用《大英百科全书》，是因为它里面的文章不容易理解，故选 C。

3. 细节理解题。根据“To buy the Encyclopedia Britannica, you have to spend around 1,400 dollars (about 11,200 yuan). It also has a CD-ROM version which costs about 50 dollars.”可知，购买《大英百科全书》大约需要花费 1400 美元，CD-ROM 版本需要大约 50 美元，所以一共需要大约 1450 美元，故选 B。

4. 细节理解题。根据“In 1994 Encyclopedia Britannica was first put online.”可知，1994 年，《大英百科全书》首次上线，距今大约 29 年了，故选 A。

5. 最佳标题题。根据“Encyclopedia Britannica is a good choice.”以及全文内容可知，本文主要介绍了《大英百科全书》，故选 A。

18

From checking social media every minute to being lost in computer games, we usually overuse technology. “For many people, a moment without your phone or computer in sight can feel like a lifetime.” the Daily Mail commented.

A computer model called Mindy may make many people think twice. A team from a US company built a three-dimensional (3D) model to show the negative effects technology can have on human bodies in less than 800 years.

“Spending hours looking down at your phone tires your neck and throws your backbone off balance.” explained Caleb Backe, a health and wellness expert (专家) in the US. This, in turn, will make it more difficult for the muscles in our neck to support the head, making our back hunched and our neck

wide.

“The way we hold our phones can cause pain in certain muscles of your hands.” Nikola Djordjevic, a doctor in Serbia, told the team. It affects the elbows too, making your arm hurt a lot. Scientifically, it is called cubital tunnel syndrome (肘管综合征). That’s why Mindy has a 90-degree elbow, and her hands look like she’s always holding a mobile phone.

Some people also commented that human evolution (进化) may not work this way. They believe that only good changes would be kept over the years. For example, changes that can enable people to live longer, instead of the negative effect of technology.

However, human lifestyles nowadays still cause worries. A model called Emma was built by researchers in the UK in 2019 to show how the way people work at their desks could change them in 20 years.

The research team built Emma based on the health problems mentioned by over 3,000 workers in France, Germany and the UK. Emma’s back stays bent, and her legs are swollen because of the time people spend in front of computers. With little time spent outdoors in the sun, her skin is pale, too.

While Mindy and Emma are just predictions about what may happen in the future, they remind us to think more about tech habits. Experts suggest taking breaks, stretching muscles, and balancing screen time with outdoor activities. After all, evolution is kind to those who get used to changes wisely—not those controlled by devices like phones and computers.

37. What does the underlined word “negative” in paragraph 2 mean?

- A. Useful. B. Harmful. C. Amazing. D. Hopeless.

38. Why did the researchers create “Mindy” and “Emma”?

- A. To introduce future technology.
B. To sell new types of models to doctors.

- C. To show possible effects of overusing technology.
D. To explain how technology improves human health.

39. How does the article support its opinion about technology's effects?

- A. By telling stories about future humans.
B. By explaining how human evolution works.
C. By comparing traditional and modern lifestyles.
D. By showing experts' opinions and research models.

40. Which of the following may the writer agree with?

- A. Working outdoors is important. B. More models should be created.
C. Technology will make humans healthier. D. Using technology wisely helps us live better.

【答案】37. B 38. C 39. D 40. D

【解析】本文主要讲述了过度使用科技对人体可能产生的不良影响，通过介绍 Mindy 和 Emma 这两个模型以及专家观点来阐述，呼吁人们明智使用科技。

37. 词句猜测题。根据“A team from a US company built a three-dimensional (3D) model to show the negative effects technology can have on human bodies in less than 800 years.”及结合后文介绍的科技给人体带来的不良影响可推测出，negative 意为“有害的”。故选 B。

38. 细节理解题。根据“A team from a US company built a three-dimensional (3D) model to show the negative effects technology can have on human bodies in less than 800 years.”和“A model called Emma was built by researchers in the UK in 2019 to show how the way people work at their desks could change them in 20 years.”可知，创建这两个模型是为了展示过度使用科技可能产生的影响。故选 C。

39. 细节理解题。根据“...explained Caleb Backe, a health and wellness expert (专家) in the US”，“... Nikola Djordjevic, a doctor in Serbia, told the team.”和“While Mindy and Emma are just predictions about...Experts suggest...”可知，文章中引用了健康专家 Caleb Backe、医生 Nikola Djordjevic 的观点，还介绍了 Mindy 和 Emma 这两个研究模型，通过这些来支撑科技影响的观点。故选 D。

40. 推理判断题。根据“After all, evolution is kind to those who get used to changes wisely—not those controlled by devices like phones and computers”可推知，作者认为明智地使用科技有助于我们更好地生活。故选 D。

19

One of the favorite classes for Cheng Ning is the weekly information technology class. There she gets to experience painting and playing word games with AI robots. Cheng Ning and her classmates are from East China's Zhejiang Province. The province is one of the leaders to bring AI into classes of schools in China. Students have more chances to learn AI courses (课程).

To deepen the connection between AI and education, Zhejiang provides AI courses in primary and middle schools. It hopes to help students have a good foundation (基础) for their future studies.

Many cities in Zhejiang are connecting AI with education. In 2022, Hangzhou introduced an AI education platform (平台) from Tencent. Students can experience AI in class. For example, students can control AI robots as engineers on “Mars” to finish special tasks in the robot project.

Also, in Wenzhou, another city in Zhejiang, many schools have offered at least one AI course. Since 2023, Wenzhou has developed 700 AI education experimental schools. Most schools in Wenzhou have had a complete AI education teacher team. By the end of 2025, there will be 300 more experimental schools in Wenzhou.

AI courses will become more popular in primary and middle schools, and AI labs will be fully covered in every school in these cities and even across the province.

26. What is the purpose of introducing Chen Ning’s favorite class?

- A. To show her great interest in AI. B. To start the topic about AI courses.
C. To introduce what Zhejiang is like. D. To encourage kids to join AI courses.

27. How did Zhejiang connect AI and education more deeply?

- A. By offering AI courses in schools. B. By using AI to finish difficult tasks.
C. By letting students do more experiments. D. By introducing the future of AI to students.

28. How many AI education experimental schools will Wenzhou have by the end of 2025?

- A. 300. B. 400. C. 700. D. 1000.

29. What is the structure of this passage? (P1= Paragraph 1)

30. What is the best title of this passage?

- A. The future of AI technology B. The uses of AI in education
C. The importance of AI education D. Examples of using AI technology

【答案】26. B 27. A 28. D 29. D 30. B

【解析】本文是一篇说明文，主要介绍了中国一些地区的学校开始提供人工智能课程。

26. 细节理解题。根据第一段中“Chen Ning and her classmates are from East China’s Zhejiang Province. The province is one of the leaders to bring AI into classes of schools in China. Students have more chances to learn AI courses (课程).”可知，介绍程宁最喜欢的课的目的是引出关于人工智能课程的话题。故选 B。

27. 细节理解题。根据第二段中“To deepen the connection between AI and education, Zhejiang provides AI courses in primary and middle schools.”可知，浙江是通过在学校开设人工智能课程将人工智能与教育更深入地联系起来。故选 A。

28. 推理判断题。根据第四段中“Since 2023, Wenzhou has developed 700 AI education experimental schools. Most schools in Wenzhou have had a complete AI education teacher team. By the end of 2025, there will be 300 more experimental schools in Wenzhou.”可知，到 2025 年底，温州将有 300 所新增实验学校，目前已有 700 所，所以总数是 1000 所。故选 D。

29. 篇章结构题。通读全文可知，第一段引入人工智能主题；第二、三、四段主要讲述了浙江人工智能与教育的联系；最五段进行总结并展望。故选 D。

30. 最佳标题题。通读全文可知，本文主要介绍了中国一些地区的学校开始提供人工智能课程。由此可推测，B 选项“人工智能在教育中的应用”最适合做文章的标题。故选 B。

20

Charity is important. Not only because it can change people's lives, but also because it can change the world. By giving to charities, we can help those less lucky and support causes (事业) we believe in. Whether you're looking for a way to give back or just want to learn more about the work of charities, this post is for you.

A charity is an organization that helps people or communities in need. A charity may raise money from common people, companies and governments. Charities usually work on certain areas such as health care, education, disaster relief, and so on.

Charities provide services that are important to people in need: food banks provide food to hungry families; churches help people find cheap places to live in; hospitals provide free basic care to low-income patients; animal charities save homeless pets from certain death and find them new homes... The list is endless. They help improve the lives of millions of people every day.

Charities are good for you too. Helping others is good for your health and well-being. Volunteering for charities makes you feel like you're making a difference and contributing, which in turn builds a sense of community and reduces loneliness. Volunteering for a charity can also help develop a sense of purpose, build friendships or improve social networks, and increase self-confidence.

Charities don't just help people. There are also many charities that protect the environment and conserve natural resources. The Nature Conservancy, for example, is a global conservation organization that works to preserve the lands and waters on which all life depends. The World Wildlife Fund (WWF) has been working for more than 50 years to protect endangered species and their habitats.

Charities play an important role in our society. They provide vital services to millions of people

every day and play an important role in our economy.

33. Who is this article written for?

- A. People in need of help. B. People working for charities.
C. People interested in charity work. D. People planning to raise money.

34. What does paragraph 2 mainly talk about?

- A. What charities are. B. How charities help people in need.
C. Why people give money to charities. D. Where people find information about charities.

35. Which picture best shows the structure of the article?

36. Why did the writer write this article?

- A. To ask people to learn more about WWF. B. To show charities' responsibility for nature.
C. To call for people to help with voluntary work. D. To explain the importance and roles of charities.

【答案】33. C 34. A 35. C 36. D

【解析】本文主要介绍了慈善的重要性、慈善机构的定义、工作内容、对个人及社会（含自然保护方面）的作用等，阐释慈善机构的重要性与角色。

33. 推理判断题。根据“Whether you're looking for a way to give back or just want to learn more about the work of charities, this post is for you.”可知，文章是写给对慈善工作感兴趣的人。故选 C。

34. 主旨大意题。根据“A charity is an organization that helps people or communities in need.”及结合本段内容可知，第二段主要介绍了慈善机构是什么及其筹款途径等基本性质。故选 A。

35. 篇章结构题。结合文章内容可知，第一段总起，阐述慈善的重要性；第二段介绍慈善机构是什么；第三段讲慈善机构为有需要的人提供的服务；第四段说慈善对个人的好处；第五段提及保护自然的慈善机构；第六段总结慈善在社会中的重要作用。整体是“总—分—总”结构，①总起，②③④⑤分述，⑥总结，对应结构 C。故选 C。

36. 主旨大意题。通读全文可知，文章从慈善的重要性引入，介绍了慈善机构的定义、工作内容、对个人和社会（包括自然保护）的作用等，整体是在解释慈善机构的重要性和角色。故选 D。

21

Ever thought about keeping a capybara as a pet? They are known for being friendly and social. But, owning a capybara is more than just feeding and housing them. Knowing their natural ways and social needs helps you decide if a capybara is right for your family.

Space and Living Environment

You need a lot of space for capybaras to move around comfortably. A good size for a pair is 12 feet by 20 feet, with a 55cm-high fence (栅栏) to keep them safe. This space lets them explore and play, which is good for their health.

Also, make sure they have a swimming hole at least 3.5 feet deep. Water is important for their health and keeping cool. Keep the temperature right, about 25°C, for a healthy home. And make sure their indoor area is safe at night for them to rest.

Social Needs

Capybaras love to be with others. Having at least two together is key to keep them happy and stress-free. They need to be with friends to act naturally and feel secure. Since they can live up to 12 years, you're making a big promise to care for them well.

By giving them enough space and friends, you can make a great home for your capybaras. This way, they can live a happy and healthy life.

Feeding and Food

It's key to know the right capybara food for their health. These pets eat mainly plants with grasses. They also like water plants and fruits, which give them important nutrients.

Owning a capybara can be pleasing but also comes with big responsibilities. These large animals are not just pets but are part of a social group that needs lots of company. Think carefully about if you can give them the life they need before bringing one home.

37. If you want to keep capybaras, what kind of home should you prepare for them?

- A. A home with low temperature. B. A home with a 30 cm-high fence.
C. A home with a 4-feet-deep swimming hole. D. A home with a 12 feet by 12 feet area.

38. What does the underlined word "secure" in Paragraph 4 mean?

- A. Frightened. B. Lonely. C. Quiet. D. Safe.

39. What does a capybara need according to the article?

- A. A safe and small space. B. Enough space and meat.
C. Some friends and right food. D. A short fence and many friends.

40. What is the purpose of the passage?

- A. To encourage people to keep capybaras as pets.
- B. To introduce requirements of keeping capybaras.
- C. To compare capybaras with other social animals.
- D. To explain why capybaras prefer living in groups.

【答案】37. C 38. D 39. C 40. B

【解析】本文主要讲述了饲养水豚作为宠物所需了解的条件，包括空间和生活环境、社交需求、饮食等方面的要求。

37. 细节理解题。根据第三段“Also, make sure they have a swimming hole at least 3. 5 feet deep.”可知，要确保它们有一个至少 3. 5 英尺深的泳池。故选 C。

38. 词句猜测题。根据第四段“They need to be with friends to act naturally and feel secure.”可知，结合水豚需要和朋友在一起，可推测“secure”意思是“安全的；安心的”。故选 D。

39. 细节理解题。根据第四段“Capybaras love to be with others. Having at least two together is key to keep them happy and stress-free.”以及倒数第二段“It’s key to know the right capybara food for their health.”可知，水豚需要朋友和合适食物。故选 C。

40. 主旨大意题。文章从空间和生活环境、社交需求、饮食等方面介绍了饲养水豚的要求。故选 B。
