| 24. A. normal | B. strong | C. weak | D. usual |
| 25. A. putting out | B. keeping on | C. lying down | D. giving up |

三、阅读 (本大题共三部分, 满分 40 分)

第一节 阅读理解 (共 15 小题, 每小题 2 分, 共 30 分)

A

Playing with words

A young painter cleverly mixes traditional Chinese painting with puns

95 后“草根毕加索”画家：将国画和谐音梗巧妙融合

A rooster is washing a mahjong tile with the Chinese character Fa (发) on it. This funny scene reminds us of the popular Chinese phrase gongxi facai (恭喜发财), through the clever use of homophony (谐音).

Zhang Mingxiang, 26, also known on social media as “Wo Shi Chao Ren CR”, created this interesting pun (双关语). The painter mixes traditional Chinese painting with homophonic elements (同音异义的元素). This creative style has got him over 1 million followers on Bilibili.

“I grew up with picture books,” Zhang said. “The more I read, the more I wanted to draw.” Zhang used to draw by himself in the classroom during his middle school years. When he began sharing his paintings online, he quickly got a large following. The inspiration to focus on cute animals came along in 2018 after he saw people selling Chinese calligraphy (书法) on Douyin. “The black and white seemed a bit boring to me,” Zhang said. “I remembered the cartoon books I read as a child. Suddenly, pictures of cute animals came into my mind.”

Once, he was trying to draw a Chinese story about Wu Song fighting a tiger. Then an idea hit him: Why not draw five squirrels (松鼠), which could then be called “wu song (五松)”?

Since then, he has begun to add homophonic elements to his wordplay. Zhang tries to show the dreams of everyday people with encouraging themes in his paintings.

“For example, when I considered drawing a great hawk (鹰) spreading its wings, I thought, ‘Why can’t it be a little chicken spreading its wings instead?’”

Now, Zhang also creates all kinds of cultural products with his artwork, including T-shirts and pillows (枕头). He hopes that his style and intellectual property (知识产权) will go abroad one day.

By ZHANG DONGYUE,

21st Century

The secrets behind Zhang’s likable style

Following timely topics

When a holiday or special time is around the corner, Zhang often shares paintings and videos about it. For example, before the start of a new semester, he might post artwork about “back-to-school blues” as experienced by animals. This shows their imagined sadness about having to return to school.

Making different characters

In Zhang’s paintings, each animal character has its own personality. For example, the horse wishes to be free, while the cow is stubborn (顽固的).

Choose the answer:

26. How does Zhang Mingxiang create his pictures?

- A. He shows his opinions on social problems in his pictures.
B. He takes ideas from his followers on Bilibili.
C. He expresses his wish for others to get rich in his paintings.
D. He makes use of homophony with Chinese characters.
27. What made Zhang focus on cute animals?
A. Cute animals were very popular among people online in 2018.
B. He read many black-and-white cartoon books in his childhood.
C. Calligraphy led him to the lively world of cute animals.
D. His calligraphy didn't sell well on Douyin.
28. What did Zhang use five squirrels to show?
A. Himself. B. Five trees. C. A tiger. D. A tiger fighter.
29. Why did Zhang change the hawk into a chicken?
A. To protect chickens. B. To change the tradition.
C. To show his dreams. D. To encourage people.
30. What is Zhang trying to do according to the last paragraph?
A. Live abroad. B. Change into a salesman.
C. Develop his business. D. Get intellectual property.

B

Millions of years ago, dinosaurs (恐龙) controlled (控制) the earth. And there were different kinds of dinosaurs on the earth. Some of them were no bigger than chickens, while some were about 90 feet long. But all of them had very small brains (大脑). Later on, there weren't any dinosaurs. What happened to them?

In the days of dinosaurs, the whole earth was warm and wet. There were many green forests. But the earth changed slowly all the time. When parts of the earth became freezing and dry, the forests there died. Then dinosaurs could not find enough food to eat. This must be one reason why dinosaurs died out.

There were also terrible fights between dinosaurs. Though there was no man to see any of the fights, the animal's footprints could tell us that the fights did happen.

What's another reason? We can make a guess. New kinds of animals might come to the earth. Some of them had big brains and were fast and strong. They could kill dinosaurs. Some ate dinosaur eggs, too.

There may be other reasons that we do not know about. Each year people will find some dinosaur footprints and bones. Scientists are trying to tell us more about dinosaurs.

31. Dinosaurs controlled the earth when _____.

- A. all the forests died out B. the earth became dry
C. the earth was snowy D. the earth was warm and wet
32. What does the underlined word “freezing” in Paragraph 2 mean?
A. Wet. B. Cold. C. Warm. D. Cool.
33. How many reasons why dinosaurs died out are talked about in the passage?
A. One. B. Two. C. Three. D. Four.
34. According to the passage, we are sure that _____.
A. not all dinosaurs had very small brains
B. scientists know everything about dinosaurs
C. different kinds of dinosaurs were on the earth
D. new kinds of animals came to the earth and killed dinosaurs
35. Which can be the best title for the passage?
A. Why Dinosaurs Died Out B. Where Dinosaurs Lived
C. When Dinosaurs Died Out D. What Dinosaurs Looked Like

C

Some fish weigh more than a fridge. Some fish look like cows. Now, getting to know these very special creatures is becoming easier. On a new website (www.eol.org), called the Encyclopaedia of Life (EOL), you will find basic facts on about 30,000 species-or kinds-of fish.

But as surprising as 30,000 fish sounds, it's just a baby step for the website. Its designers dream of making it the largest biological (生物学的) encyclopaedia ever, with a web page for every living specie.

Although there are already a lot of websites about living things, and a lot of encyclopaedias too, they're not the best tools for scientists, say the encyclopaedia's designers. Scientists need websites with information that has been double-checked by other scientists. A dream site would include links to all the basic research and also automatically (自动的) update itself as new research is published. Finally, even people who aren't scientists should be able to use such a site to get to know what's living in their backyards-or anywhere else in the world.

Think of it as one huge book that can keep growing in size—to millions of pages. If those pages were made of paper, the book would become large and heavy and hard to update. However, because it's used online. Anyone who has a computer can search its pages easily. Moreover, those new pages can be added quickly.

36. What's The Encyclopaedia of Life?
A. An organization studying special species.

- B. A website where people can find information of 30,000 fish.
C. A meeting where people discuss the research of the living things.
D. A large, heavy book which is a record of living things.
37. What is “a baby step” in paragraph 2?
A. An important project. B. A difficult problem.
C. A new beginning. D. A tiny success.
38. What can be inferred (推测) from today’s websites and encyclopaedias about living things?
A. They are not the best tools for scientists. B. They provide wrong information.
C. They seldom update the information. D. They are easy to search for information.
39. What’s the aim (目标) of the EOL designers?
A. To make the encyclopaedia popular.
B. To provide description of every species.
C. To give correct information to the scientists.
D. To challenge the other websites and encyclopaedias.
40. Which one is the best title of this passage?
A. A “Book” of life. B. A dream website.
C. An automatic encyclopaedia. D. A surprising tool.

第二节 阅读还原(共 5 小题, 每小题 1 分, 共 5 分)

以下是一篇短文, 请阅读全文, 并从下列方框里的六个句子中选择五个还原到原文中, 使原文的意思完整、连贯。

Hundreds of years ago, no dandelions (蒲公英) grew in North America. Then people came from Europe. They had dandelion seeds on their clothes. The seeds fell from their clothes onto the ground. 41. Most people believe that dandelions are weeds. They do not want them in their gardens. 42.
43. If the winter is not very cold, their leaves may stay green. 44. Each night their bright yellow flowers close up. When the sun shines the next day, they open up again. After several days, the yellow flower turns white and soft. A tiny brown seed forms at the bottom of each white petal (花瓣). When the wind blows, the petals float away.

Each white petal carries a seed away. This lets the dandelions spread their seeds all over. 45

- A. But some people think that dandelion flowers are pretty.
B. New dandelions grow where the seeds land.
C. When the spring arrives, their flowers come out.
D. Dandelions have beautiful yellow flowers.

E. Since then, dandelions have spread all over.

F. Dandelions do not die easily.

第三节 阅读匹配(共 5 小题, 每小题 1 分, 共 5 分)

下面的材料 A-F 分别是摘自某百科全书的信息。请根据五个人的需求, 选择最适合他们的信息, 并将其标号填入题前括号内。

_____ 46 _____ Ann: I study in the Architecture Department of Tsinghua University, and I want to be an architect like Liang Sicheng.	A. 13-year-old skateboarder Cui Chenxi won the women's street event on September 27 at the Asian Games. She becomes China's youngest ever Asian Games gold medalist. She is also the Chinese national team's youngest athlete competing in Hangzhou.
_____ 47 _____ Wendy: My little brother began to show interest in skateboarding when he was only four. I want to find him a role model.	B. The Shenzhou-16 crew members including Jing Haipeng, Zhu Yangzhu and Gui Haichao gave their first science lecture from China's Tiangong space station to students around the world. It was also the first ever given from the Mengtian lab module (梦天实验舱).
_____ 48 _____ Jack: I hear two scientists have won 2023 Nobel Prize in Physiology or Medicine. I want to learn more about them.	C. Katalin Kariko got this year's Nobel Prize in Physiology or Medicine along with Drew Weissman. Dr. Kariko began studying messenger RNA (信使核糖核酸) in the 1970s. Their ideas laid the groundwork (基础) for the COVID-19 vaccines that have saved millions of lives.
_____ 49 _____ Susie: My grandpa is always interested in unusual news around the world, and I want to know what I can tell him today.	D. Liang Sicheng (1901-1972) is considered to be "the father of modern Chinese architecture". He set up the Architecture Department of Tsinghua University in 1946. And he made a huge difference to Chinese architecture.
_____ 50 _____ Tony: Flying to space is always my dream, and I have attended lectures from space for three times.	E. Qiao Yu (1927-2022) was a famous songwriter in China. He wrote over 1 000 songs, and Unforgettable Tonight is one of them. It has been used as the closing song for CCTV Spring Festival Gala for over 30 years.
	F. Travis Gienger from the US set a new world record-he grew the world's heaviest pumpkin. The pumpkin weighs 1247 kg. It is heavier than four polar bears put together and has enough orange flesh (果肉) to make 687 pumpkin pies.

四、语法填空(共 10 小题, 每小题 1 分, 共 10 分)

阅读下面短文, 在空白处填入适当的内容 (不多于 3 个单词) 或括号内单词的正确形式。

Norman Bethune is one of _____ 51 _____ (famous) heroes in China. He was a Canadian doctor. He came to China to help the Chinese people and died for them.

Norman Bethune was born in 1890. He became a doctor in 1916 and went to Spain in 1936 to treat (治疗) the wounded (受伤的) soldiers during the war there. He soon realized that many people were dying 52 they did not get to hospital quickly enough. Dr. Bethune developed new ways of taking care of the sick. He invented special medical tools to use outside hospitals and close to the fighting areas so that doctors could treat the wounded more quickly. His 53 (invent) saved many people.

In 1938, Dr. Bethune came to China and helped treat the wounded during the Anti-Japanese War. At that time, there were few doctors, so he had to work very hard on his own. His experience of treating people in Spain was 54 (help) in China. He developed training courses for local doctors and nurses, and 55 (write) books so that they could learn about how he treated the sick.

Dr. Bethune worked very hard, he often forgot to rest or take care of 56 (him). Once, he even worked for sixty-nine hours 57 stopping and managed to save over a hundred 58 (life). One day in 1939, he 59 (cut) his finger during an operation, but he continued his work without treating it. In the end, he died of his wound.

Dr. Bethune's work 60 the Chinese people made him a hero in China. There are many books and films about him, and he is still remembered in both China and Canada today.

五、语篇填词(共 10 小题, 每小题 1 分, 共 10 分)

Huang Xuhua, the "Father of China's Nuclear Submarines," passed away in Wuhan on February 6, 2025, at the age of 99. As an i 61 mind in China's scientific field, he was famous as the chief d 62 of China's first nuclear submarine and received many important awards.

Born in Guangdong Province in 1926, Huang's b 63 marked the beginning of a life dedicated to technology. He studied shipbuilding at a university in Shanghai, where his t 64 in engineering began to shine. In 1958, the government chose him to o 65 a secret project in Beijing. For thirty years, he and his team faced p 66 unknown challenges, starting from zero to develop China's first nuclear submarine, Type 091. This process required them to r 67 every technical detail like writing in a n 68.

Huang spent his w 69 life helping China develop stronger military capabilities and technology. His contributions completely changed China's military capabilities. Though he experienced much s 70 during the project, his whole life was a masterpiece of dedication to the motherland.

六、书面表达 (15 分)

71. 根据以下提示, 写一篇关于英国著名作家查尔斯·狄更斯 (Charles Dickens) 的英语短文。

参考词汇: be born, at the age of, spend... doing, come out

提示表格:
