

（时间：90 分钟，满分：100 分）

一、单项选择（本大题共 15 小题，每小题 1 分，满分 15 分）

1. My brother doesn't like playing _____ chess. He likes playing _____ football.
A. the; the B. /; the C. the; / D. /; /
2. You can use my bike if you promise _____ it back tomorrow afternoon.
A. giving B. to give C. not giving D. not to give
3. —Do you agree _____ me?
—Yes, I do. I will try to eat more fruit and vegetables. They are good _____ my health.
A. with; for B. with; at C. to; for D. to; at
4. —Mr. Green, can you _____ some questions?
—Sorry, I'm busy. I can't _____ them.
A. answer; answer to B. answer; reply to C. reply; answer D. reply; reply to
5. The officer ordered his men _____ the people in the city.
A. for protecting B. to protect C. protect D. to protecting
6. The students want to challenge _____.
A. them B. they C. themselves D. himself
7. I received a beautiful dress on my _____ birthday. I like it very much.
A. twelve B. twelveth C. the twelfth D. twelfth
8. A _____ boy can sing the English song very well.
A. ten-year-old B. ten years old C. ten-years-old D. fifth years old
9. More than _____ people died in the war between the two countries two years ago.
A. two millions B. two million C. million of D. two million of
10. Please raise your hand _____ you agree with us.
A. unless B. if C. although D. before
11. _____, it is necessary for him _____ the meeting.
A. Instead of; to attend B. Instead; to attend C. Instead of; attending D. Instead; attending
12. —What's the city flower of Nantong?
—Chrysanthemum. It's _____ peace, nobility (高尚) and so on. And people like to enjoy them around Double Ninth Festival.
A. a symbol of B. a list of C. a cycle of D. a sense of
13. Some rules are almost the same _____ in the world, but rules of etiquette can be different from place to place.

A. somewhere B. anywhere C. nowhere D. everywhere

14. _____ sugar in this recipe is too much.

A. A number of B. The amount of C. The number of D. A large amount of

15. The World War II happened _____.

A. in the 1940s B. in the 1940 C. in 1940s D. in 1940's

二、完形填空（本大题共 10 小题，每小题 1 分，满分 10 分）

In foreign countries, some people do not like the number 13. They don't think 13 is a _____16_____ number. For _____17_____, they don't like to live on the thirteenth floor.

My friend Jack has got the same _____18_____. He doesn't like the number 13, either.

One day he _____19_____ some friends to dinner. When _____20_____ of his friends arrived, he asked them to sit around the table. He began to count the people in his mind when they were _____21_____ the delicious food. Suddenly (突然) he cried out, "Oh, there are thirteen people here!" Everybody's face turned _____22_____ except (除了.....之外) Mr. Brown. He said _____23_____ with a smile on his face, "Don't worry, my dear friends! We have _____24_____ people here. My wife, Mrs. Brown, will have a _____25_____ in a few weeks. She is in the family way now."

All of them became happy again.

"Congratulations (祝贺)!" they said to Mr. and Mrs. Brown. They enjoyed the nice food and had a good time that evening.

|----------------|--------------|--------------|--------------|
| 16. A. lucky | B. happy | C. big | D. special |
| 17. A. care | B. example | C. long | D. sure |
| 18. A. idea | B. way | C. situation | D. problem |
| 19. A. helped | B. found | C. needed | D. invited |
| 20. A. few | B. some | C. several | D. all |
| 21. A. cooking | B. buying | C. having | D. sending |
| 22. A. red | B. black | C. white | D. green |
| 23. A. slowly | B. strangely | C. angrily | D. unluckily |
| 24. A. twelve | B. thirteen | C. fourteen | D. fifteen |
| 25. A. friend | B. guest | C. baby | D. mother |

三、阅读理解（本大题共 15 小题，每小题 2 分，满分 30 分）

A

Each number is special and has its own beauty. They are basic elements (元素) of mathematics for counting, measuring, and solving equations (方程). Numbers hold a lot of fun facts and stories. Today,

we invite you on a journey through some of them.

Zero

The ancient Babylonians (巴比伦人) invented zero, and it is the greatest number in the world. It was the age of Henry VI (亨利六世) when he became King of England (he was nine months old) . Also when he became King of France (he was eleven months old). It's the total number of snakes in Ireland (because of the cooler and wetter environment).

Three

Three is a creepy number in some cultures. In Vietnam, it's bad luck to have three people in a photo as the one in the middle might die. It's the number of people who have been to the bottom of the ocean (the Mariana Trench). It's (on average) the number of days you can survive without water, the number of weeks you can survive without eating and the number of minutes you can survive without taking a breath.

Seven

Ah, Number Seven. It's seen as lucky or mystical (神秘的) in some cultures. It appears all the time. Seven days of the week. Seven ancient wonders. Seven Dwarves too. It's the estimated (估计) number of Northern white rhinos left in the world.

Ten

Human children need around 10 hours of sleep a night (you'd need two hours if you were a giraffe and twenty-two hours if you were a koala). 10 percent of the world is left-handed. The world's largest omelette (煎蛋) was 10 metres wide. 10 percent of people in the world live on islands.

26. What can people use numbers to do EXCEPT?

A. To count. B. To measure. C. To solve equations. D. To go traveling

27. How old was Henry VI when he became King of England?

A. One year old. B. Eleven months old. C. Nine months old. D. Six months old.

28. What can we know about Three and Seven?

A. Three is unlucky in some cultures. B. Seven is bad luck in Vietnam.
C. Seven sometimes appear in our lives. D. People can survive 3 weeks without water.

29. How much sleep does a child need every night?

A. 22 hours B. 10 hours C. 8 hours D. 2 hours

30. Where can we probably read this article?

A. In a health magazine B. In a sports newspaper
C. In a Maths blog D. In a travel guide

B

The Best Language for Learning Math

What is the best language for learning math? Hint: You are not reading it

Chinese, Japanese and Korean all have simpler number words. They express math concepts (概念) more clearly than English. The language gap has drawn lots of attention. Several recent studies have linked weaker math abilities in English-speaking children to English number words.

Chinese, for example, has just ten basic number words. English, however, has more than two dozen. The trouble starts at “11”. English has a word (“eleven”) for that number. Chinese, Japanese and Korean have words that can be translated as “ten-one”—spoken with the “ten” first. That makes it easier for children to understand the place value. Student can easily see the number system is based on units of 10.

English number words over 10 don't make the place value clear. Words for numbers 13 to 19 change the order of the ones and tens. Children are more likely to confuse (困惑) 17 with 71. Therefore, children working with English number words have a harder time doing complex (复杂的) calculations. They make more mistakes.

It also feels more natural for Chinese speakers than for English speakers to use the “make-a-ten” method. When adding two number, Chinese students often break down the numbers into parts and regroup them into tens and ones. For example, 9 plus 5 becomes 9 plus 1 plus 4. This method greatly helps students work out math problems. Many teachers in America are teaching their students the “make-a-ten” method. However, they are having a hard time because of the confusing English number words.

Now, you should feel lucky that you are learning math in China. Thanks to your mother language, all the math problems have become less difficult and less confusing.

31. According to the article, several recent studies have found a relationship between English number words and _____.

- A. Weaker math abilities in young learners of English
- B. Weaker math abilities in English-speaking children
- C. Stronger math abilities in young learners of English
- D. Stronger math abilities in English-speaking children

32. According to the article, how many basic number words are there in English?

- A. Ten. B. Eleven. C. More than a dozen. D. More than two dozen.

33. The first three paragraphs mainly talk about _____.

- A. why Asian languages can make math learning easier.

B. why Asian are better at math than English speakers.

C. how Asian children do basic calculations within ten.

D. how children's math abilities are judged in different. countries.

34. According to the article, if you use the “make-a-ten” method to work out math problems, 8 plus 7 will become _____.

A. $6 + 2 + 7$

B. $7 + 1 + 7$

C. $8 + 1 + 6$

D. $8 + 2 + 5$

35. The underlined expression “Thanks to” in the last paragraph can be replaced by “_____.”

A. Instead of

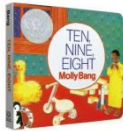

B. Because of

C. According to

D. In addition to

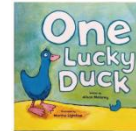

C

Ten, Nine, Eight by Molly Bang

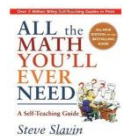

It is a children's picture book written by Molly Bang. It came out in 1983. It is about counting numbers from one to ten. The little girl does it every night before getting ready for bed.

One Duck, Another Duck by Charlotte Pomerantz

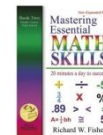

It came out in 1984. In the book, Danny and his grandmother go to the pond to see the ducks. And he starts to count them. Danny later writes a book. It makes counting from one to ten an exciting surprise.

All the Math You'll Ever Need by Steve Slavin

Are you tired of using a calculator to work out some numbers? Are you worried if it gives the wrong answer? Try the book *All the Math You'll Ever Need*, the friendliest, funniest, and easiest counting program around.

Mastering Essential Math Skills by Richard W. Fisher

Thousands of students use this book each year. It is a perfect choice for students who are having problems in Maths. It shows you how to quickly and correctly use your Maths skills in your study and life.

36. Who are the first two books for?

A. Parents.

B. Workers.

C. Children.

D. Teachers.

37. Which words should you NOT use to describe (描述) *All the Math You'll Ever Need*?

A. The fastest.

B. The funniest.

C. The friendliest.

D. The easiest.

38. Which is NOT true according to the passage?

A. *Ten, Nine, Eight* is about counting numbers.

- B. Danny later writes a book about counting numbers.
 C. Steve Slavin needs a calculator to work out numbers.
 D. Many students use *Mastering Essential Math Skills* each year.

39. What does the underlined word “it” refer to?

- A. The book. B. The calculator. C. The teacher. D. The program.

40. What is the passage mainly about?

- A. Ways to count numbers. B. Ways to learn Maths well.
 C. Four people who are good at Maths. D. Some good books about Maths.

四、阅读还原 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

阅读短文, 从所给的选项中选出能填入空白处人最佳选项, 使短文通顺、连贯。选项中有一项为多余选项。

Nowadays, computers and the Internet are playing an important part in our life. 41 When you use the computers, you usually need to set passwords (密码). But not all the passwords are safe. How can you make your passwords safe? 42

First, use capital (大写) letters in your password. It will be difficult for others to get into your account (账户). It only takes a hacker (黑客) 13 minutes to work out a six-letter password made of small letters. 43

Second, use numbers and symbols in your password. 44 Sometimes such passwords are not easy to remember, but they are really safe.

45 If you do so, hackers will guess your passwords easily. You should change your passwords about every 90 days. In that way, hackers won't guess your passwords.

- A. Here are some suggestions (建议) for you.
 B. So please don't use computers too often.
 C. It will be much safer than the simple number password.
 D. Some people even say that they can't live without them.
 E. Third, never use personal information for your passwords.
 F. But the same password in capital letters takes a hacker 10 hours to work out.

五、短文填空 (本大题共 15 小题, 每小题 1 分, 满分 15 分)

A(语篇填词)

A long time ago, there was a king in India. The king's favorite game was chess. One day the king challenged an old man to a game. He promised to give the old man any p46 if he won the game. The old man said if he won the game, he would like one g47 of rice for the first square of the

chessboard, two for the second, four for the third, and then d 48 the amount for each of the rest of the squares. They played the game for a long time. Finally, the old man won. So the king ordered his men to collect a bag of rice. He put one grain on the first square, two on the second, and so on. The king quickly r 49 the problem—even with all the rice in the country, he would still not have enough rice to put on all the squares! How w 50 the old man was!

B(语法填空)

阅读下面短文，在空格处填入一个适当的词或使用括号中词语的正确形式填空。

Wang Haoze, China's first woman spaceflight engineer, thanked her teacher.

"I think I'm lucky to be part of the country's space program because I didn't study space at first," the 34-year-old astronaut said. "I studied at Southeast University from 2009 51 2015. Professor Gu Fan, who led me to the space industry (航空业), often discussed the topics of space with us. He also encouraged us 52 (work) in the space industry."

With the help of Professor Gu, Wang worked at the Beijing Acrospace Propulsion Institute (北京航天推进研究所) in 53 summer of 2015. At the institute, Wang studied and developed new models of rockets. Faced with new 54 (challenge) and knowledge, she enjoyed learning and finishing difficult tasks 55 (successful).

Three years after working on rockets, she joined the 56 (three) generation (代) of astronauts. "I have never imagined I can have a chance to become an astronaut," Wang said. So far, she 57 (spend) hard time with teammates in lots of tests. 58 she met a lot of difficulties, she never gave up.

"59 we try our best to complete every task, we can make our 'space home' much 60 (good) in the future." She said.

六、完成句子（本大题共 5 小题，每小题 2 分，满分 10 分）

61. 我喜欢读书而不是跳舞。

I enjoy reading _____.

62. 昨天在我考虑片刻之后，我向爸爸挑战进行了一场象棋比赛。

After thinking about it _____, I _____ my father _____ a chess game yesterday.

63. 我刚刚把老师讲的都写下来了。

I _____ what the teacher said just now.

64. 由于温室效应的效果，地球的温度正在上升。

_____ the greenhouse effect, the Earth's temperature _____.

65. 公交车的司机毫不犹豫的停下了车。

The bus driver stopped the bus _____.

七、书面表达(15 分)

66. 请以“日常生活中的数字”为题写一篇短文。内容提示：

- 1. 你认为数字在我们日常生活中重要吗?
- 2. 日常生活中，我们都在什么时候会使用到数字?
- 3. 假如我们的生活中没有了数字，那会是怎样的呢?

要求：80 词左右，可适当发挥。

【点拨】

1.人称：第一人称 2.时态：一般现在时	谋篇布局
1. calculation 计算 2. solve problems 解决问题 3. show the prices 展示价钱 4. in a mess 处于混乱	好词
Without numbers, it will be difficult for us to even tell the time. 没有了数字，即使是报时对我们来说也是件难事。	好句
