A. longer; long B. longest; long C. longest; longer D. longer; longest

二、语法选择 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

请通读下面短文, 掌握其大意, 根据语法和上下文连贯的要求, 从每小题 4 个选项中选出一个最佳的答案, 并将答题卡对应题目所选的选项涂黑。

Imagine—you are running to catch a train, only to find that you forgot your ID card! You cannot get on the train without it. Don't worry. In the near future, you will just need 11 digital ID on your smartphone.

Recently, Chinese government say they will introduce a digital version (版本) of the national ID cards this year. One of its purposes is to 12 meet the basic living needs of more than 100 million people who live away from their hometowns.

These people have to go to school or work at different 13. Sometimes in order to prove that “I am who I am”, they have to run back home to get 14 ID information. It wastes time, money and manpower. But Digital ID cards can allow people to get their personal information through a simple scan (扫描) with a smartphone. This way, everything 15 in just several seconds and people can get a lot of convenience. Meanwhile, the government will think about people who do not use smartphones, especially old people. They are trying to come up with some ways 16 them. Also, people’s personal information will be protected 17 they don’t need to worry that others get their personal information.

In fact, China 18 the early try of digital IDs since 2018. It allowed people in Quzhou, Hangzhou and Fuzhou to get them on Alipay. Digital IDs could be 19 used to open bank accounts, check into hotels and buy high-speed railway tickets and so on.

China’s first ID card came out 20 1984. The present ID card is the second-generation version. With the development of science, we believe more and more new technologies will appear in life.

三、完形填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

China has changed a lot in the years since I first moved here. One of the developments is cashless payment (无现金支付), which has 21 the way we live and shop.

China is not the 22 country to have cashless payment. I used a debit card (借记卡) to 23 things without cash for years in the US. But now I can use my phone instead. It’s super easy and 24.

One of the things I like most is that I can send and receive money 25 to and from my friends. That’s because it makes it so much easier to share the bill when we eat out together.

But like all technology, cashless payment has some _____ 26 _____ as well. What happens if your phone gets lost or stolen? There are also times when your phone's mobile Internet connection, _____ 27 _____ the store's Internet connection, might not work.

Not long ago, I went to a nearby convenience store (便利店) to buy some snacks. But when I got there, I found that the store's cashless payment system didn't work and they could only _____ 28 _____ cash. I didn't have any cash with me, so I had to _____ 29 _____ and leave without any snacks.

So although cashless payment is convenient, you should _____ 30 _____ carry a bit of cash in order to avoid any possible inconvenience.

| 30. A. never | B. hardly | C. always | D. seldom |

四、阅读理解（本大题共 15 小题，每小题 2 分，满分 30 分）

A

Zhao Shengliang, the head of the Dunhuang Research Center, gave a talk at Shenzhen Book City CBD Store on December 1, 2024. The talk was about how digital technology (数字技术) can help protect traditional culture.

“Dunhuang connects the Eastern and Western cultures,” Zhao said, “It shows how different cultures exchange ideas. Making the relics (文物) digital is very important because it can keep the old things from Dunhuang safe for always.”

Zhao showed how digital technology is used in Dunhuang's art projects. For example, in the Mogao Grottoes (莫高窟) Digital Tour Center, tourists can explore the Mogao Grottoes through virtual (虚拟的) tours, where tourists can “travel back” to the caves in ancient times.

According to Zhao, working with Huawei has made the visitor experience at Dunhuang much better. They have brought in an AR map. This map can provide AI-guided tours as well as interesting activities like taking pictures with a virtual (虚拟的) deer.

Dunhuang's Mogao Grottoes, with ancient art, are a UNESCO World Heritage Site. Although the Digital Dunhuang project has a long way to go, it shows a new idea of for protecting cultural relics and helps spread traditional culture across the world.

31. What was Zhao Shengliang's talk about?

- A. The use of Digital Technology. B. The history of the Mogao Grottoes.
C. The importance of Shenzhen Book City. D. The achievements of Dunhuang Research Centre.

32. Why is making Dunhuang relics digital important?

- A. Because it makes Dunhuang popular. B. Because it improves traditional culture.
C. Because it connects the East and the West. D. Because it keeps relics from Dunhuang safe.

33. Which one can replace the word "explore" in Paragraph 3?

- A. create B. celebrate C. study D. advise

34. What can tourists do in the Mogao Grottoes Digital Center?

- A. Take pictures with a real deer. B. Make picture with digital tools.
C. Design an AR map by themselves. D. Experience virtual tours to ancient times.

35. In which part of a newspaper can we read this passage?

- A. Culture B. Nature C. Education D. Business

B

Nowadays more and more children seem to get lost in a "sea of digital technology". To be honest, as they use digital technology too much, they are losing their skills to do simple things. They can't make toys themselves with hands or help mum cook dinner. And worst of all, they seem to be losing interest in communicating with others.

"I have talked with a number of teachers. They care about the rising numbers of young pupils who can play with computers or smart phones, but have few or no skills to make things." said a teacher, Colin Kinney. "Many pupils can't communicate with other pupils but their parents are glad to see the skills of their children to use a computer or a smart phone."

Instead of playing with other children, more and more children are choosing to stay indoors and quietly play on a tablet (平板电脑) on weekends and after school. How can a child grow up to be a very good artist unless he learns how to use a paint brush and develop his painting skill? How can a child learn to make friends as he gets older unless he learns to communicate with others at a young age?

Digital technology can be used for good or bad. We can use a stone to either break a window or build a house. We shouldn't **blame** the children. We should help them make right choices (选择). It is certainly necessary for children to know how to use digital technology in today's world, but what is more

important, we should encourage them to develop social abilities (能力), which are good when they grow up.

36. What's the worst problem in the first passage?

- A. Children can't make things themselves.
- B. Children make too many friends online.
- C. Children don't want to communicate with others.
- D. Children don't like helping mum cook meals at home.

37. According to Colin Kinney, which of the following is TRUE?

- A. Teachers don't notice that young pupils have few skills to make things.
- B. Many parents are very happy that their kids can use digital technology.
- C. Many teachers don't care if young pupils can play computers or tablets.
- D. Some parents are worried that their kids use digital technology too much.

38. What does the underlined word "blame" mean in Chinese?

- A. 表扬
- B. 原谅
- C. 评价
- D. 责怪

39. The passage is probably a _____.

- A. notice
- B. magazine
- C. diary
- D. report

40. What does the writer mainly want to tell us?

- A. It's very important for children to have social skills.
- B. It's very helpful for children to do some housework.
- C. It's necessary for parents to learn to use digital technology.
- D. It's difficult for teachers to make right choices for their pupils.

C

Have you noticed your life becoming a little easier? Now, when you go to a certain shopping mall, you can enjoy its free Wi-Fi there. When you want to take a taxi, you can book one with your phone. In fact, all these can be seen as the basic parts of a smart city. The idea of a smart city was brought up by the US company BM in 2010. Generally, a smart city is a city that uses digital technologies (数字科技) such as the Internet to improve city planning, save money and resources, and make our life convenient. How smart can a city be? Here are some great examples that we can learn from.

In 2009, Dubuque became the first smart city in the US. The city used smart water meters (水表) to take the place of traditional water meters. They can detect (探测) water waste and leakage and send data (数据) to let the house owner know. The same system is used for other city resources like electricity and natural gas. This way, people know how they use their resources and are glad to help reduce waste.

Santander in Spain also gives us a look at the future. If people point a phone toward a nearby bus stop, the phone immediately shows all bus lines that serve the stop as well as their arrival times. The government organized a research team and provided an app（应用程序）that collects data on almost everything : light, temperature, and the movements of cars and people. Opening the app near a supermarket provides immediate information on special.

41. What might people not do in the smart cities mentioned in the passage ?
- A. Booking a taxi with their phones.
B. Using the Internet without paying at any place.
C. Using digital technologies to make a better plan for the city.
D. Using a phone to check the arrival times of the buses.
42. The underlined word “convenient” is the closest to the meaning of _____.
A. useful B. normal C. suitable D. easy
43. According to the passage, which of the following is TRUE?
- A. Digital technologies are only used in smart phones.
B. An English company first raised the idea of a smart city.
C. The smart water meters can help to reduce the water waste.
D. A smart city is still an idea and hasn't come into being.
44. The example of Santander shows the use of smart systems in some aspects（方面）EXCEPT _____.
A. business B. health care C. traffic controlling D. public transportation
45. What is the main idea of the passage ?
- A. Digital technologies help improve city planning.
B. Smart cities will make our future life better and smarter.
C. Smart cities are very common in both Dubuque and Santander.
D. Spain and the USA take the leading position in building smart cities.

五、阅读还原（本大题共 5 小题，每小题 1 分，满分 5 分）

根据短文内容，从短文后的 A~F 选项中，选出 5 个适当的选项补全短文。

Artificial Intelligence (AI) (人工智能) has become an important part of our lives. How do you use it wisely? 46 Here are some steps and tips for you.

First, know your purpose. Whether you want to use AI for study, work, or fun, being clear about your goal is the key. 47 If you're a student, you might choose AI-assisted learning tools to improve your study.

Next, choose the right AI tools. There are many AI products on the market. 48 This will help to find the proper AI tools. For example, if you need help with writing, an AI-writing assistant could be a good choice.

When using AI, don't depend on it completely. Although AI can provide useful information, you should still think twice. 49 Check out the information AI gives you, especially in important situations like academic research or work projects.

Another important thing is to protect your privacy. AI often collects a lot of user information. 50 Read the privacy policies of AI tools carefully and don't provide unnecessary personal information.

Finally, keep learning about AI. As technology develops rapidly, new AI uses keep appearing. By staying updated, you can make the most of AI and use it in more creative ways.

- A. Try to avoid being misled by incorrect information.
- B. Different AI tools are designed for different purposes.
- C. Do some research to find the ones that suit your needs.
- D. Think about your purpose, tools, safety and more before you choose.
- E. AI can do a lot of things and it may replace human completely someday.
- F. Make sure that you understand how your information is used and protected.

六、语法填空（本大题共 10 小题，每小题 1 分，满分 10 分）

Ten years ago, I had a computer and it was much 51 (big) than this one that I have now. I only used it to chat 52 friends or do my homework. It 53 (be) a little difficult to operate. The screen was small, only 15 54 (inch). My life changed a lot because 55 it. It was the important part in my 56 (day) life. Now, I change this computer into a laptop. I use it to do many things like 57 (shop), watching films and playing computer games. I can type 58 a high speed and it is much 59 (easy) to control than the old one. And it is light enough for me 60 (carry) it everywhere.

七、单词拼写（本大题共 10 小题，每小题 1 分，满分 10 分）

- 61. If you want to lose _____ (weigh), it's a good idea to take a walk after dinner.
- 62. Our _____ (digit) lives are full of new experiences.
