三、阅读理解 (本大题共 15 小题, 每小题 2 分, 满分 30 分)

A

AI, or artificial intelligence (人工智能), is everywhere today! From smartphones to smart homes, AI makes our lives easier. But what exactly is AI? Think of it as a super-smart computer that can learn, solve problems, and even understand human languages. Now, let's explore how AI helps us.

AI is like a helpful assistant in daily life. For example, voice assistants like Siri or Alexa can answer questions, set alarms, or control your home lights. They use "natural language processing" to understand what you say. In schools, AI tools help teachers grade homework faster and suggest personalized learning plans. Some apps even correct your spelling and grammar in real time!

AI also plays a big role in healthcare and education. In hospitals, AI can analyze X-rays and help doctors find diseases early. It's also used to develop new medicines. Meanwhile, in education, AI-powered apps like Duolingo teach languages by fitting in with your learning speed. Imagine having a 24/7 tutor (家庭教师) who knows exactly what you need!

Although AI can do many things, it's not perfect. Some people worry that it might take all jobs, like factory work or customer service. However, experts say AI will also create new jobs, like robot repair and AI programming. The key is to use AI wisely. For example, self-driving cars use AI to reduce accidents, but humans still need to monitor them.

Remember, AI is a tool—it doesn't replace humans, but it can make our work smarter. So let's accept AI with curiosity! By learning to use it responsibly, we can build a better future together.

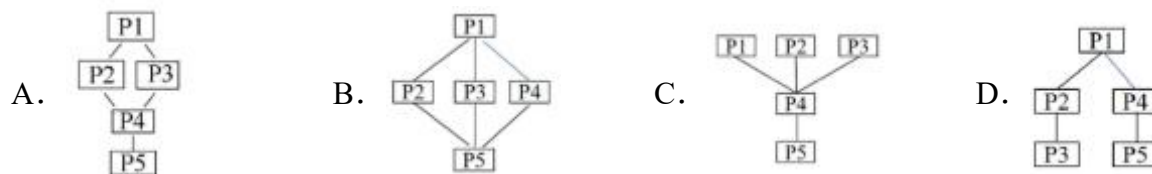

26. What does the underlined word "They" refer to?

A. Voice assistants. B. Home lights. C. Learning plans. D. Some apps.

27. Which of the following can summarize Paragraph Four?

A. AI will replace all human jobs. B. AI is helpful in healthcare and education.
C. AI is helpful but not perfect and needs wise use. D. AI can build a better future for humans.

28. What's the structure of the passage? (P1: Paragraph 1; P2: Paragraph 2...)

29. Where can we read the passage?

A. In an education newspaper. B. In an entertainment poster.
C. In a self-driving car ad. D. In a science magazine.

30. What's the best title for the passage?

A. AI: a powerful tool for our lives B. How to make an AI software
C. A tool which may replace humans D. The development history of AI

B

Summer is coming quickly. It's the time of the year in which people like to change their clothes for the new season. But how about adding something high-tech (高科技的) to the summer look? Let's check out some of the ways in which technology (技术) is changing the clothes people wear.

A Chinese research team has developed 3D printing techniques that can create clothes with the ability to change temperatures. The technology they used is those materials that change with the

environment. The team placed an object in the clothing that could be transformed (转换). It also absorbs (吸收) or gives off heat depending on the wearer's body temperature. Zhang Yongyi, a Chinese Academy of Sciences researcher, said it was the first time such clothing had been made using a controllable 3D printing method.

Scientists in South Korea have developed a kind of wearable clothes that create electricity (电) as wearers keep moving. Of course, it doesn't take much time or effort for people. Wearers only need to move naturally to power small electronic objects. The inside of the clothes produces energy, which is then stored. Although the clothes have an electronic object built in, they feel completely normal. Kim Sang-Woo, a professor at the Sungkyunkwan University, is proud of his team's development, saying, "It feels like a normal jacket."

In another amazing study, clothes could serve as devices (设备) themselves. A team of engineering students from the University of Washington, the US, have led these efforts by putting a special thing into cotton T-shirts. The clothing can then send the message that can be received by cellphones.

31. What is the main idea of the text?

- A. Advice on choosing clothes. B. High-tech changes in clothing.
C. The history of 3D printing. D. Famous scientists in technology.

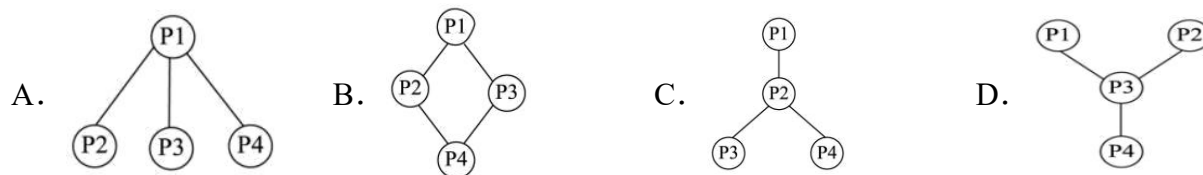

32. What can the Chinese 3D-printed clothes do?

- A. Change colors. B. Send messages. C. Store energy. D. Control temperature.

33. Why are the South Korean clothes special?

- A. They make power. B. They feel heavy. C. They use cotton. D. They change shape.

34. What is the structure(结构) of the passage? (P-Paragraph)

35. In which section of a magazine (杂志) can you read the text?

- A. Health and sport. B. History and culture.
C. Science and technology. D. Life and environment.

For Internet Safety

Think before you post! Before you post a photo or video online, you should ask yourself:

Use passwords! ♦ Keep your password safe and change it regularly (定期地).

◆ Is it against the law or rules? ◆ Will it make anyone feel uncomfortable? ◆ Could it affect your life? ◆ Would you be happy for your parents or friends to see it?	◆ Don't use your name or anything easy to guess. ◆ Don't share it with anyone, even your best friends. ◆ Use a mixture of capitals, numbers and special characters. ◆ If anyone knows your password, change it right now.
Pay attention to your privacy!◆ Use another name or a nickname (昵称) instead of your real name. ◆ Always make sure your settings are really private and choose who can see your account! ◆ Don't discuss your problems online. ◆ Only give your phone number to the people you actually know.	Don't trust everything online!◆ Don't fall for it—things aren't always what they seem! ◆ Everyone exaggerates (夸大其词)—you probably do it as well! ◆ Remember that most people only tell you the good bits. ◆ Don't be fooled by “free” offers ! 
Be Safe! Be Sure! Be Smart!

四、阅读还原 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

In the past few decades, a lot of us have used “Doctor Google” to try and figure out why we have aches, pains, or other health problems. 41 It is more convenient to use than ChatGPT. Doctors think this new AI will change their work completely and make patients’ lives better.

42 They say DeepSeek will give surgeons important and life-saving advice right away. The book also tells us that DeepSeek will be extremely useful for doctors. 43 The experts believe that AI will have a big effect on many parts of medicine. It can help doctors find out diseases, keep medical records, and even carry out clinical trials.

However, the experts also know that AI is not a perfect solution for all medical problems. DeepSeek might make small mistakes in its medical advice, even though it usually seems right. Sometimes, it gives wrong answers that look correct. 44 Patients can write down the information AI offers and take it to a real doctor. Doctors, on the other hand, can compare the advice of AI with their own knowledge and experience, and then make the best decisions for their patients. 45

- A. It’s like having a helper who knows all the medical knowledge.
- B. Experts have written a book called “The AI Revolution in Medicine”.
- C. So we should not use AI without doctors watching over.
- D. They have a great influence on the development of modern medicine.
- E. But now, there is a better tool for that, and that is DeepSeek.
- F. Only in this way can we use AI to help people perfectly.
