

(时间: 90 分钟, 满分: 100 分)

一、语法选择 (本大题共 15 小题, 每小题 1 分, 满分 15 分)

阅读下面短文, 按照句子结构的语法性和上下文连贯的要求, 从 1~15 各题所给的 A、B、C 和 D 项中选出最佳选项, 并在答题卡上将该项涂黑。

In a small town, there was a curious boy named Ted. He loved taking things apart and then ____1____ them back together. He usually succeeded, ____2____ sometimes he failed. One day, while he was watching his mother cook, he noticed that she had trouble ____3____ the sauce. He thought there must be another way and decided to invent ____4____ better.

After a ____5____ afternoon, Ted created a new invention. He took apart a broken wood mixer (搅拌机) and then connected it to a motor (电动机). It was able to stir things by itself ____6____ it got power from the motor. It was so convenient that anyone ____7____ stir the sauce easily. The next day, he showed ____8____ invention to his mother, who was surprised and encouraged him to improve it. Ted kept working and finally added a timer, making it even ____9____. The user could leave the tool on the table and not have to worry about the sauce burning.

____10____ his mom's support, he introduced it to his classmates. Later, ____11____ his schoolmates went to see it. Ted's invention became popular quickly. They used it ____12____ drinks and sauces, and it was easy to clean. At the School Science Festival, Ted received ____13____ award for his creativity. Since then, he ____14____ many inventions which help people live better lives.

It's meaningful to find out what you have an ____15____ in and keep going.

- | | | | |
|-------------------|----------------|-----------------|------------------|
| 1. A. put | B. puts | C. to put | D. putting |
| 2. A. or | B. so | C. and | D. but |
| 3. A. to stir | B. stirred | C. stirs | D. stirring |
| 4. A. nothing | B. something | C. anything | D. everything |
| 5. A. busy | B. busily | C. busier | D. busiest |
| 6. A. so | B. if | C. before | D. though |
| 7. A. could | B. need | C. must | D. should |
| 8. A. he | B. him | C. his | D. himself |
| 9. A. good | B. better | C. best | D. the best |
| 10. A. With | B. About | C. Without | D. Against |
| 11. A. hundred of | B. hundreds of | C. a hundred of | D. a hundreds of |
| 12. A. mix | B. mixed | C. mixing | D. to mix |
| 13. A. / | B. a | C. an | D. the |

14. A. invent B. invented C. has invented D. have invented
 15. A. interest B. interested C. interesting D. interestingly

二、完形填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

Wood-block (木版) printing was invented sometime between the 4th and the 7th century in China. The earliest book that we have 16 in 868 and was discovered in a Dunhuang cave. Wood-block printing took a long time because a new block was needed for every 17 in a book. By the 11th century printed books appeared all over China. They 18 books of Confucius' thoughts, dictionaries, and books on maths. In 1340, books could be printed using two 19, black and red.

Although the Chinese learnt about printing so 20, printing was not introduced into other parts of the world for hundreds of years. It is thought that when the great Italian traveler Marco Polo 21 China in the 13th century, he saw printed books. It is possible that Marco Polo brought that 22 to Europe. But printed books did not come to Europe 23 1450 when a German called Johann Gutenberg invented a printing machine. Twenty-four years 24, in 1474, an Englishman called William Caxton printed the 25 printed book in English. His second book was about the game of chess. Caxton printed about a hundred books, and some can still be seen today in museums.

16. A. was bought B. was printed C. was written D. was returned
 17. A. page B. letter C. paper D. line
 18. A. marked B. added C. included D. placed
 19. A. types B. factories C. tastes D. colours
 20. A. new B. early C. young D. slow
 21. A. stored B. controlled C. visited D. wrote
 22. A. tool B. machine C. book D. technology
 23. A. until B. while C. after D. since
 24. A. forward B. later C. back D. ago
 25. A. same B. exciting C. first D. last

三、阅读理解 (本大题共 15 小题, 每小题 2 分, 满分 30 分)

A

Long ago, in ancient China, there was a story about the invention of silk. People believed that silk was first invented by Leizu, the wife of the Yellow Emperor. Leizu learned how to make cocoons (蚕茧) into soft and strong cloth. This magical cloth became known as "silk", and it was so valuable that it was called "China's Gold". Following kings' orders, the Chinese kept the secret of making silk for centuries.

But then, something amazing happened! During the Han Dynasty, the brave officer Zhang Qian

traveled west as far as Central Asia and brought silk there. As years passed by, silk became so important that the trade road from Europe to China got its name—the Silk Road.

The Silk Road became a busy highway for traders who carried things across deserts and mountains. From China, people sold silk and tea. In return, they received treasures such as spices (香料), gold and silver from the West. At the very beginning, it was mainly about trade; then people began to share ideas, technologies and cultures. For example, Chinese inventions like papermaking were spread to the West, while new ideas about math and science came to China.

Most importantly, the Silk Road helped different cultures learn from each other. Art, music and even language were shared along this ancient road. In places like the Dunhuang Grottoes (敦煌石窟) in China, you can see how art pieces combined (融合) Eastern and Western styles into something distinctive. It can not be seen anywhere else.

The story of the Silk Road tells us how people from faraway lands could become friends through trade and shared ideas. Today, we remember the Silk Road as one of the greatest examples of cooperation and exchange in history. It shows us how important it is to learn about and respect each other's traditions, and that different cultures can work together to create amazing things.

26. Who invented silk in ancient China?

- A. Leizu. B. The kings. C. Zhang Qian. D. The Yellow Emperor.

27. What was spread from China to the West according to paragraph 3?

- A. Silk and gold. B. Tea and papermaking.
C. Spices and silver. D. New ideas of science.

28. What is the right order of the following facts from the passage?

- ① Zhang Qian traveled west with silk.
② Art and language were shared along the Silk Road.
③ Traders from China and the West exchanged things.
④ The Chinese were ordered to keep the secret of making silk.

- A. ①→④→③→② B. ①→③→④→② C. ④→①→③→② D. ④→③→②→①

29. What does the underlined word “**distinctive**” mean in paragraph 4?

- A. Special. B. Public. C. Popular. D. Strong.

30. What does the story of the Silk Road mainly tell us?

- A. The change of world trade. B. The introduction of silk cloth.

- C. The influence of technology in history. D. The importance of cross-cultural communication.

B

In a clear tank of water (水箱), fish are swimming happily. Wait a second, take a closer look at that blue one. It is actually a robot!

This scene happened at an event, the World Digital Education Conference, from May 14th to 16th in Wuhan, Hubei province. Besides blue ones, there were red and yellow robotic fish, too. It is scientists at Wuhan University who have made them.

At the length of about 53 centimeters, the fish were very lifelike. The joints (关节) in their heads and tails were made in a special way to let the fish move fast and easily. This is thanks to bionic engineering (仿生工程), which brings together nature and man-made things.

“I love to see the bionic fish,” Professor James Crabbe from Oxford University told Jiupai News, “It could tell us much more about fish swarming and how fish behave (表现).”

In fact, swarming in fish means they swim together in large groups. It helps them stay safe, find food and save energy (能量). Learning about swarming helps us understand how fish live and how changes in the environment matter to them.

As for the pretty colors of the bionic fish, they come from the LED lights on their bodies, said People’s Daily. These lights can also make shadows, giving the underwater world a party feel.

Even better, the bionic fish are smart. With the help of AI and sensors (传感器), they can “see” things in their way and learn to avoid them, said Changjiang Daily. The fish are already helping in the study of the Yangtze River’s water to help protect the environment. What amazing fish they are!

31. Which scene can be seen at the event in Wuhan?

32. What makes the bionic fish move fast and easily?

- A. Different colors. B. Special water tanks. C. Lifelike length. D. Body joints.

33. What can we know about swarming in fish?

- A. Swarming can keep fish free from any danger.
B. Swarming makes it harder for fish to feed themselves.
C. Swarming helps scientists learn about the habits of fish.
D. Swarming may change the living environment of fish.

34. Which goal may be achieved with bionic fish?

38. How does the “E-Cycle” app encourage recycling?

- A. By fixing up old phones. B. By offering coupons for old electronics.
C. By using more workers to collect trash. D. By educating people about recycling.

39. What is the best heading for the third piece of news?

- A. California’s Food Shortage Dangers B. Cameras on Robots Help Environment
C. Robot Farmers Help Grow Vegetables D. New Challenges in Farming

40. What does the above news focus on?

- A. Technology competitions in modern life. B. Green solutions for real problems.
C. Government decisions on weather changes. D. Development plans for a better life.

四、阅读还原 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

请认真阅读下面短文, 从短文后所给的六个选项中选出五个可以填入空白处的最佳选项, 并在答题卡上将该项涂黑。

Scientists Make Edible (可食用的) Electronic Things

What would you like for lunch? Maybe, a battery?

_____ 41 _____ Robofood, a program led by Dario Floreano from the Swiss Federal Institute, has been the first try. The program plans to create robots that can be eaten and foods that act like robots by mixing food science and robots in a new way.

According to the scientists, wings of the drone (无人机) were made from rice cakes glued together by using oil and chocolate. _____ 42 _____ And parts of the drone can also be eaten since they meet food safety standards set up by the United Nations for emergencies (紧急情况).

However, the main challenge is finding stronger edible materials for the drone’s wings to prepare for bad weather and high temperatures. _____ 43 _____

Robofood also developed an edible sensor to help examine stomach sickness. _____ 44 _____ Unlike other sensors out there today, it’s designed to be easily digested (消化), lowering the risk of leaving any remains inside the body.

_____ 45 _____ The world’s first fully edible batteries can help solve the growing problem of throwing away used batteries. Some parts of the battery are made of vitamin B2 and another natural element that can be found in many fruits including apples. So the new battery can be more friendly to nature.

- A. It can be eaten by the patient to check the conditions inside.
B. The invention of Robofood also helps with environmental protection.
C. Plenty of advanced drones are playing important roles in human health.
D. As everyone knows, chocolate may melt (融化) easily when the temperature is high.

E. Although it sounds unusual, this has already been realized by scientists as they develop electronic things you can eat.

F. This drone can find missing people or animals in emergencies and carry important food or medicine to them.

五、短文填空 (本大题共 15 小题, 每小题 1 分, 满分 15 分)

A. 语法填空 (本大题共 10 小题, 每小题 1 分, 满分 10 分)

阅读短文, 按照句子结构的语法和上下文连贯的要求, 在空格处填入一个适当的词或使用括号中词语的正确形式填空。

William Campbell, Satoshi Omura and Tu Youyou jointly won the 2015 Nobel Prize for medicine for their work against parasitic diseases. 85-year-old Tu 46 (award) this prize for her contribution to 47 (reduce) the death rate of malaria (疟疾), minimizing patients' suffering and promoting mankind's 48 (healthy). This is what science is all about.

As a matter of fact, Tu has won some attention when she 49 (get) the Lasker Award in 2011. But there is no way to compare her popularity back 50 the attention she is receiving today. As the first Chinese mainland Nobel Prize Winner of 51 (nature) science award, Tu's winning 52 (complete) surprised Chinese people, who have long been wondering when the first Chinese Nobel Laureate in natural science would appear.

Tu Youyou is the 53 (one) Chinese scientist to win a Nobel Prize for work carried out within China. She has spent 40 years' time on scientific research. Although the Nobel Prize did not come to her until four decades later, it is one of 54 most privilege rewards that recognize Tu's devotion in discovering artemisinin (青蒿素). Her record-breaking winning is a reminder that science is never about instant (立即的) 55 (succeed). There is no way to measure how much you spend on scientific research and compare it with how much reward you get.

B. 语篇填词 (本大题共 5 小题, 每小题 1 分, 满分 5 分)

Laszlo Biro (1899—1985) was the inventor of the ballpoint pen. He was b 56 in Budapest, Hungary. In the 1930s, when he w 57 as a newspaper editor, he used a fountain pen almost every day. However, he had to refill it all the time. The ink also did not dry easily, and it sometimes made a mess on the paper. Biro wanted a better pen that could a 58 such troubles. His brother, George, helped him develop a special ink. The ink dried easily. Then they made a new t59 of pen. There was a tiny ball at the tip of the pen. The ball rolled ink onto paper as it moved. They called it the "ballpoint" pen.

The ballpoint pen was a success. Everyone loved it. Now millions of people use it all over the world every day.

People will always remember Biro for his i 60 _____. Today in many English-speaking countries, people still use the word “biro” to refer to any kind of ballpoint pen.

六、完成句子（本大题共 5 小题，每小题 2 分，满分 10 分）

61. 许多重大事件影响了历史进程，例如，工业革命就是在 18 世纪发生的。

Many great events have influenced the course of history. _____, the Industrial Revolution _____ in the 18th century.

62. 每年都有大量的游客前往花果山。

_____ large _____ tourists go to Huaguo Mountain every year.

63. 中国人毫无疑问是最懂茶的内涵的人。

_____, the Chinese are the ones who best understand the nature of tea.

64. 他很懒，习惯依靠父母了。

He is lazy and is used to _____ his parents.

65. 如果他们听到了，又会取笑我的。

If they hear it, they _____ me again.

七、书面表达（15 分）

66. 近年来，中国新四大发明在网络上广受热议。假如你是李华，你们学校围绕中国新四大发明(Four Great New Inventions of China)”主题举办了一场关于“最实用的发明”的投票活动(voting activity)。请你根据以下表格的内容写一篇文章，介绍这次活动及结果；并选择其中一项你最喜欢的发明，分享你的想法。

The Most Practical Invention				
Inventions	 shared bike	 online	 high-speed train	 online shopping
Percentage	10%	35%	30%	25%
Your favourite invention and reason(s)				

注意：

- 词数：80 词左右；
- 不得透露学校、姓名等任何个人信息。

In recent years, the Four Great New Inventions of China have made our life more and more convenient.

What do you think of these inventions? I'd love to hear from you soon.
