四、阅读理解 (本大题共 15 小题, 每小题 2 分, 满分 30 分)

A

Usually it takes university students 3 years to get their degree (学位) in the UK. But language students need 4 years. They usually spend the third year abroad—they go to a country where the language they are learning is spoken. They can either work or study there. In this way, they can put what they have learnt in class into practice.

During their year abroad, students get a completely new experience. Many try to find other students to live with and some live with host families.

They can not only learn the language, but also come to understand the culture, the people, and the traditions of the country. That is an important part of language learning.

Ellen Rothnie, a student of French, spent her year abroad in Paris, France. She taught English in a language school. “Teaching my own language makes me understand what works and what doesn’t in language learning,” Ellen said. “And my students are also my friends. They show me how people speak and live in the country. That’s helpful in improving my French.”

The year abroad is great fun but can also be very stressful (压力大的), because students have to build a life in a new country alone. But once the students settle into (适应) their new way of life, it becomes easier and many would describe their year abroad as one of the greatest experiences of their lives.

Have you ever heard of the iceberg model (冰山模式)? It shows that what we see from the surface (表面) is only part of the story. There is a lot more going on under it. Recently, students from Chengdu Yucai Middle School used this model to understand different cultures.

“Culture is like an iceberg, as some parts of it can be seen and some cannot,” explained, teacher Liu Yue. Things like clothes, buildings and music are the part “above the water”. And the “unseen” part is the way people think, such as how we see life and death.

Inspired (启发) by this idea, 13-year-old Li Yixuan gave an example. “When we are praised by others, we’re likely to reply by saying ‘Not at all’ or ‘I’m not that great’” said Li. “This comes down to the humility (谦逊) that we Chinese have had since ancient times.”

Sun Boyin thought beyond our own culture. In 2021, actor Mirai Moriyama danced with the white clothes while funeral (丧葬的) music played during the opening of the 2020 Tokyo Games. It led some to say it was “strange and uncomfortable” to watch. But it turned out to be “Japan’s special way to show mourning for those who have passed away”, Sun said.

For some, this can be an enlightening class. “We can’t judge a culture only by what we see”, said Guo Yinyue. “If we want to fully understand a country’s culture. We need to think more about its invisible part so as to have better communication” said Shu Yuyang.

36. What is the unseen part of culture?

During my first year of learning Chinese, I found that my high school had a sister-school-exchange program (项目) in Nanjing, China. Every summer, some students can study there and stay with host families for two and a half weeks. When I first heard about the chance to go to China, I knew I couldn’t miss it.

Fast forward to summer, I waved my family bye and flew to Beijing. On the first morning in China, I experienced a Chinese breakfast unlike anything I had ever tried. We spent three days in Beijing, going around the city and visiting famous landmarks. The highlight of our trip was the Great Wall. Seeing it in person for the first time was amazing even though I had seen hundreds of videos and pictures before.

After our three days in Beijing, we took the train to Nanjing, where we would stay with our host families and attend classes given by our sister school. Although my host family did not speak English, they were super welcoming, which made me feel at home. On weekdays, we attended different classes at our sister school, including cooking, music, kungfu, custom, art, etc. I learned a lot about Chinese culture and how different it is from the American lifestyle.

Although the study has been over, I am forever thankful to my high school for giving me the opportunity to exchange in China and to immerse (沉浸在) myself in its culture and meet amazing friends who I still keep in touch with today.
